European Space Agency (ESA)

History. Established in 1975, replacing the European Space Research Organization (ESRO) and the European Launcher Development Organization (ELDO).

Members. Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, the Netherlands, Norway, Poland, Portugal, Romania, Spain, Sweden, Switzerland, United Kingdom. Canada takes part in some projects under a co-operation agreement.

Activities. ESA is the intergovernmental agency in Europe responsible for the exploitation of space science, research and technology for exclusively peaceful purposes. Its aim is to define and put into effect a long-term European space policy that allows Europe to remain competitive in the field of space technology. It has a policy of co-operation with various partners on the basis that pooling resources and sharing work will boost the effectiveness of its programmes. Its space plan covers the fields of science, Earth observation, telecommunications, navigation, space segment technologies, ground infrastructures, space transport systems and microgravity research.

Headquarters: 8–10 rue Mario Nikis, 75738 Paris Cedex 15, France.

CERN – The European Organization for Nuclear Research

Founded in 1954, CERN is the world's leading particle physics research centre. By studying the behaviour of nature's fundamental particles, CERN aims to find out what our Universe is made of and how it works. CERN's biggest accelerator, the Large Hadron Collider (LHC), became operational in Sept. 2008. One of the beneficial byproducts of CERN activity is the Worldwide Web, developed at CERN to give particle physicists easy access to shared data. One of Europe's first joint ventures, CERN now has a membership of 21 member states: Austria, Belgium, Bulgaria, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Israel, Italy, the Netherlands, Norway, Poland, Portugal, Slovak Republic, Spain, Sweden, Switzerland, United Kingdom. Some 6,500 scientists, half of the world's particle physicists, use CERN's facilities. They represent 500 institutions and 85 nationalities.
