DOI 10.1007/978-3-319-30852-4_3

Below is the equation given in chapter 3 of page 90.

$$K(\vec{r}, \vec{r}', \{\vec{r}_j\}) = \left[\int \exp\left\{i\vec{k} \cdot (\vec{r} - \vec{r}')\right\} L(\vec{k} \rightarrow) d\vec{k} \right] \cdot \left[1 + \sum_{j=1}^n \Gamma_j(\vec{r}, \vec{r}') \right]$$

The Equation 3.3 should be changed as follows:

$$K(\vec{r}, \vec{r}', \{\vec{r}_j\}) = \left[\int \exp\left\{i\vec{k} \cdot (\vec{r} - \vec{r}')\right\} L(\vec{k}) d\vec{k} \right] \cdot \left[1 + \sum_{j=1}^n \Gamma_j(\vec{r}, \vec{r}') \right]$$
