

## Cabinet Office, Government of Japan (CAO)— Japan's International Cooperation on DRR: Mainstreaming DRR in International Societies

Setsuko Saya

#### Abstract

The Disaster Management Bureau of the Cabinet Office of Japan has a mandate to coordinate policies and systems for all phases of disaster risk reduction in Japan. The bureau took a key role to host the the Third UN World Conference on Disaster Risk Reduction (WCDRR), which was held in Sendai City, Miyagi Prefecture, 14–18 March, 2015. Japan has suffered from various disasters, including earthquakes, volcanic eruptions, floods, landslides, tsunamis and others and took active roles in international cooperation for disaster risk reduction at the World Conference on Natural Disaster Reduction in Yokohama, Japan in 1994, the World Conference on Disaster Reduction in Kobe, Japan in 2005 and the World Conference on Disaster Risk Reduction in Sendai, Japan in 2015. At the WCDRR in Sendai, Japan, the Government of Japan advocated the importance of "mainstreaming DRR (Disaster Risk Reduction)". The Cabinet office encouraged and supported the International Consortium on Landslides (ICL) to propose the ISDR-ICL Sendai Partnerships 2015–2025 as a voluntary commitment to the WCDRR.

## Keywords

World conference on disaster risk reduction (WCDRR) • Sendai framework for disaster risk reduction (SFDRR) • Sendai cooperation initiative for disaster risk reduction (SCIDRR) • ISDR-ICL sendai partnerships • Cabinet office of japan

# Mission of the Cabinet Office in Disaster Management

In Japan, the Disaster Management Bureau of the Cabinet Office has a mandate to coordinate policies and systems for all phases of disaster risk reduction, including disaster risk mitigation and preparedness, emergency response, and recovery and reconstruction. It also has responsibility for overall coordination among relevant ministries and agencies in responding to large-scale disasters. As part of the government reform of 2001, the Minister of State for Disaster

grate and coordinate disaster risk management policies and measures of ministries and agencies. In the Cabinet Office, which is responsible for securing cooperation and collaboration among related government organizations in wide-ranging issues, the Director-General for Disaster Management undertakes the planning of basic disaster management policies and response to large-scale disasters, as well as conducting overall coordination (Fig. 1).

Management was established in the Cabinet Office to inte-

The disaster management system has been continuously reviewed and revised following the lessons learned from large-scale disasters in the past. The Central Disaster Management Council, which consists of the Prime Minister as the Chair, all members of the Cabinet, heads of major public corporations and experts, develops the Basic Disaster Management Plan, establishes basic disaster management

**Fig. 1** Preparation of Hazard Maps (as of the end of March 2013) (Cabinet office 2015b). Hazard maps for landslides have been completed for 81% of the 1606 municipalities in Japan. *Right* photo shows recent landslides triggered by a typhoon (824 mm cumulative

rainfall and 118.5 mm/hour peak hourly rainfall) in Izu-Oshima Island, in Tokyo. In all, 35 persons died, 4 persons were missing, and 86 houses were destroyed

policies, and plays a role of promoting comprehensive disaster countermeasures. The Council also deliberates important issues on disaster management upon requests from the Prime Minister or the Minister of State for Disaster Management.

In extreme disaster events that cannot be handled by the prefectural governments, the Major Disaster Management Headquarters led by the Minister of State for Disaster Management or the Extreme Disaster Management Headquarters led by the Prime Minister is established, depending on the scale and impact of a disaster. The Cabinet Office is responsible for collection and dissemination of accurate information, reporting to the Prime Minister, and establishment of the emergency activities system, including the Government's Disaster Management Headquarters, and overall cross-jurisdictional coordination among relevant ministries and agencies for disaster response (Fig. 2).

## The Third WCDRR and the Cabinet Office

The Sendai Framework for Disaster Risk Reduction (SFDRR) 2015–2030, the successor framework to the Hyogo Framework for Action (HFA) 2005–2015, was adopted at the Third WCDRR, as the guideline for disaster risk reduction in countries around the world.

Over the coming 15-year period, promoting the SFDRR will be the responsibility of the international community, and of Japan as a country that has led the world in the field of disaster risk reduction (Fig. 3).

In accordance with the Sendai Cooperation Initiative for Disaster Risk Reduction (SCIDRR) announced by Prime Minister Shinzo Abe, Japan will contribute to the mainstreaming of disaster risk reduction in the international community by effectively combining the promotion of structural and non-structural supports, as well as global

Fig. 2 Programme of 3rd WCDRR (Cabinet office 2015a) The figure shows a list of the major meeting and sessions: Official Plenary Session, High-level partnership dialogues, Ministerial Roundtables, and Working Sessions, and their themes

Fig. I-2-3	Major Meetings and Sessions During the WCDRR
------------	--

Session Title	Schedule	Theme
Official Plenary Session	Mar. 14-17 (SatTues.)	Official statements by Member State delegations, international organizations, and other major groups
	15:00-18:00 March 14 (Sat.)	Mobilizing Women's Leadership in Disaster Risk Reduction
High Level Partnership Dialogues	15:00-18:00 March 16 (Mon.)	Risk Sensitive Investment: Public-Private Partnerships
	10:00-13:00 March 17 (Tues.)	Inclusive Disaster Risk Management: Governments, Communities, and Organizations Acting Together
	10:00-13:00 March 15 (Sun.)	Reconstructing After Disasters: Building Back Better
	15:00-18:00 March 15 (Sun.)	International Cooperation in Support of a Post-2015 Framework for Disaster Risk Reduction
Ministerial Roundtables	undtables 10:00-13:00 March 16 (Mon.) Governing Disaster Risk: Overcoming Challenges 15:00-18:00 March 16 (Mon.) Reducing Disaster Risk in Urban Settings	Governing Disaster Risk: Overcoming Challenges
		Reducing Disaster Risk in Urban Settings
	15:00-18:00 March 17 (Tues.)	Public Investment Strategies for Disaster Risk Reduction
Working Sessions	Mar. 14-17 (SatTues.)	Sessions (34) were held on the following four themes: (1) Progress on the existing HFA Priorities for Action (2) Emerging Risks (3) Commitments to Post-HFA Implementation (4) Accelerating Post-HFA Implementation

	Theme	Working Session Title	Schedule
ı	Progress on Existing HFA Priorities for Action	Governance and Development Planning at National/Local Levels (Priority 1)	10:00-11:30 March 15 (Sun.)
		Risk Identification and Assessment (Priority 2)	15:00-16:30 March 14 (Sat.)
b		Early Warning (Priority 2)	17:00-18:30 March 14 (Sat.)
		Education and Knowledge in Building a Culture of Resilience (Priority 3)	10:00-11:40 March 16 (Mon.)
		Underlying Risk Factors (Priority 4)	10:00-11:30 March 16 (Mon.)
5		Preparedness for Effective Response (Priority 5)	12:00-13:30 March 17 (Tues.)

**Fig. 3** The working session "Underlying Risk Factors" (Cabinet office 2015a). The figure lists the initial 5 working session within 33 working sessions held in WCDRR. The working session "Underlying Risk Factors (Priority 4) was co-organized by the International Consortium on Landslides (ICL), UNESCO, the Japanese Ministry of Land, Infrastructure, Transport and Tourism (MLIT) and other pertinent

organizations. "ISDR-ICL SENDAI PARTNERSHIPS 2015–2024 for global promotion of understanding and reducing landslide disaster risk, Tools for Implementing and Monitoring the Post-2015 Framework for Disaster Risk Reduction and the Sustainable Development Goals" was adopted in this session

cooperation and region-wide cooperation; contributing a total of four billion dollars to fields related to disaster risk reduction and providing human resource development for 40,000 people over the next four years.

Japan will also continue to promote international cooperation in DRR through measures that include multilateral cooperation through international agencies such as the UN, regional cooperation in Asia, and intergovernmental cooperation. The following sections discuss these activities.

## Japan's Role in International Disaster Management

Japan has cultivated knowledge, systems and technologies in disaster countermeasures as a result of its numerous disaster experiences. Due to its geographical and climate conditions, Japan has long been vulnerable to all types of disasters, including earthquakes, tsunamis, floods, storm surges, high waves, slope failures, volcanic eruptions, debris flows, and heavy snows. Utilizing that expertise, Japan is cooperating in the efforts of disaster reduction in the world, making an important visible contribution to the international societies.

The number of disasters around the world is increasing, and disasters remain a major drawback to sustainable development. Reducing vulnerabilities to natural hazards and damage caused by them is an inevitable challenge in the international community. Almost every year, disasters hit worldwide and a great many people are killed and there is huge damage to the local and world economies. In the past 30 years, (1984–2013), more than 247 million people were

killed and more than US\$2.4 trillion was lost in damages. Approximately 80% of the casualties are concentrated in low- to middle income countries, making the vicious cycle of disasters and poverty another challenge.

The Government of Japan advocated the importance of "mainstreaming DRR" at the Third WCDRR. The primary meaning of "DRR mainstreaming" is making prior efforts in initiatives to mitigate damage from disasters in particular; in other words, to ensure that DRR efforts are reflected in all policies on a widespread basis. All sectors are affected once a disaster strikes, and DRR cannot be achieved unless advanced preparations are made in all types of policies. Japan has been building a disaster management system with relevant ministries and agencies, public agencies, local governments, and others under the Central Disaster Management Council, comprising all relevant Cabinet ministers (Fig. 4).

It is imperative that all stakeholders in countries around the world work to create systems to address DRR during ordinary times, before a disaster strikes. The SFDRR adopted at the Third WCDRR includes numerical DRR goals to advance this concept of mainstreaming DRR. It includes prior DRR investment and fundamental disaster prevention measures in the recovery phase after a disaster strikes, in adherence with the "Build Back Better" principle, and establishes a concept of DRR governance as the responsibility, not only of governments, but of all stakeholders, with diverse stakeholders fully performing their respective roles. Implementation of these measures in the international community will lead to the mainstreaming of DRR. To this end, Japan will continue to actively cooperate in the area of international DRR as a leader in the DRR field.

Fig. 1-3-1 Outline of the Sendai Cooperation Initiative for Disaster Risk Reduction (SCIDRR)

## Sendai Cooperation Initiative for Disaster Risk Reduction (SCIDRR)

### 1. Basic Concept

- Disasters are an obstacle to poverty eradication and sustainable development, and thus a threat to human security.
- Mainstreaming of disaster risk reduction (DRR) introducing the DRR perspective in all development policy and planning - is important. Clearly positioning DRR in the post-2015 development agenda is important from the perspective of resource mobilization.
- High attention to the efforts for "adaptation" at the climate change negotiation where an agreement is required by the end of this year. Firm DRR efforts will contribute to the climate change negotiation.
- Japan will build with the international community a society that is resilient to disasters by sharing with the world its knowledge and technology as a country advanced in DRR.

#### 2. Basic Policies

- Japan attaches particular importance to the three points in DRR policies outlined below, building on the experience of the past 10 years since the formulation of HFA.
- (1) Investment in DRR from the long-term perspective

Prior investment in DRR is more cost-effective than post-disaster emergency response and recovery and contributes to sustainable development.

#### (2) Build Back Better

The post-disaster phase provides an opportunity to implement drastic measures to build countries and regions that are resilient to disasters.

### (3) Collaboration between the central governments and various actors

Addressing with networks including local governments, private companies, NGOs/CSOs, international organizations and regional organizations, with the central government taking the initiative.

- Japan will take the following perspectives into consideration in implementing cooperation.
- (1) The human security approach and promoting women's participation (women, children, the elderly and persons with disabilities)
- (2) Cooperation based on the perspective of adaptation to the impacts of climate change
- (3) Utilizing Japan's knowledge and technology
- Cooperation through effectively combining (i) non-material assistance, (ii) material assistance and (iii) global and region-wide cooperation.

#### 3. Concrete Measures

## DRR cooperation totaling to 4 billion US dollars and training of 40 thousand from 2015 to 2018

#### Non-material assistance

- Assistance for establishing laws, institutions and systems, human resource development and other technical assistance
- Laws and regulations relating to DRR (basic acts on disaster countermeasures, laws and regulations on the use of land / building
- Basic DRR plans, master plans for flood control, master plans for urban planning, land-use plans, urban planning
   Assistance to and strengthening setup of DRR branches in government
- Assistance to build and strengthen partnership systems among the public and private sectors and NGOs Disaster risk assessment (development hazard maps, research assistance for adaption to climate change, etc.)
- Technologies for disaster observation, prediction and warning (ICT, earth observation, geospatial information)
- Community-based DRR, disaster education
  Human resource development, training, technology transfer for DRR policy planning and emergency disaster relief Training to promote women's leadership in DRR

#### Material assistance

- Economic and social infrastructure development with Japanese technology as prior investment in DRR ("quality growth")
- Countermeasures against flooding, debris flow, landslides and storm surges, forest improvement for disaster reducti
- Satellites necessary for disaster observation, perdition and warning, and information and communication infrastructure
   Improvement of buildings quality (earthquake resistance, wind resistance)
- Provision of equipment related to DRR
   Transportation, lifeline and public facilities resilient to disasters, DRR-related information and communication facilities
- Recovery and reconstruction assistance

## Global and region-wide cooperation

Assistance for UNISDR and IRP, region-wide cooperation

- · Assistance for the monitoring of the global targets and the improvement of its methods, as well as for the development of indicators
- Development of international disaster statistics
  Dissemination of information on good practices of "Build Back Better" including efforts from the Tohoku region
- Assistance for efforts to build region-wide institutions and systems (Sentinel Asia, Asian Disaster Reduction Center, AHA Centre, etc.)
  Assistance for countermeasures against climate change (including Green Climate Fund (GCF))
- · Collaboration between regional cooperation of each region and Japan's bilateral cooperation

Fig. 4 Sendai cooperation Initiative for Disaster Risk Reduction (SCIDRR) (Cabinet office 2015a). Prime Minister Shinzo Abe, Japan, announced the Sendai Cooperation Initiative for Disaster Risk Reduction (SCIDRR) which consists of Basic Concept, Basic Policies, Concrete measures of non-material assistance, material assistance as well as global and region-wide cooperation by contributing a total of four billion dollars to fields related to disaster risk reduction and providing human resource development over the next four years
