

Proposition 46

Crafting a Knowledge Management Results Framework

In a Word Managing for results requires a coherent framework for strategic planning, management, and communications based on continuous learning and accountability. Results frameworks improve management effectiveness by defining realistic expected results, monitoring progress toward their achievement, integrating lessons into decisions, and reporting on performance.

Background

On May 4, 2009, at the 42nd Annual Meeting of the Board of Governors of ADB, Haruhiko Kuroda—ADB President and concurrent Chairperson of ADB’s Board of Directors—stressed the importance of knowledge to that organization:

To be fully effective, we must also consciously and actively blend knowledge with financing. We will focus on developing, capturing, and sharing knowledge in all our work, ensuring that ADB serves an intermediary role for both financing and knowledge.

Enhancing Knowledge Management Under ADB's Strategy 2020

Bite off more than you can chew, then chew it.

—Ella Williams

When it comes to getting things done, we need fewer architects and more bricklayers.

—Colleen Barrett

On July 31, 2009, President Kuroda then approved *Enhancing Knowledge Management under Strategy 2020: Plan of Action for 2009–2011* (2009) to advance the knowledge management agenda under *Strategy 2020: The Long-Term Strategic Framework of the Asian Development Bank (2008–2020)* (2008). Four pillars support the plan of action: (i) sharpening the knowledge focus in ADB's operations—to add value at regional, country, and project levels, (ii) empowering the communities of practice—to collaborate for knowledge generation and sharing, (iii) strengthening external knowledge partnerships—to align and leverage external knowledge, and (iv) further enhancing staff learning and skills development—to enhance opportunities for staff to learn. The four pillars are closely related: the set of actions/outputs that make up the first focuses on adding value to ADB's operations in its developing member countries; the other three sets deal with how that might be achieved.

ADB's plan of action for knowledge management connotes a pragmatic, step-by-step approach: the initial actions/outputs are for a 3-year time frame; in October 2009, measures for their implementation were incorporated into ADB's Work Program and Budget Framework (2010–2012); and progress is to be monitored and reviewed at the time of ADB's annual budget review by the Regional and Sustainable Development Department in ADB, in consultation with ADB's Budget, Personnel, and Management Systems Department and Strategy and Policy Department.

Crafting a Knowledge Management Results Framework

ADB’s plan of action does not discuss but flags aspects that support and facilitate knowledge management practices, viz., budgetary allocations, business process improvements, and information technology. These *Knowledge Solutions* showcase the expected outcomes, useful results indicators, specific activity indicators, targets, and sources of verification that comprise the knowledge management results framework for ADB’s plan of action. The framework was prepared after extensive internal consultations. It is an important instrument used to assess and improve performance and help identify problems and their solutions. It is the basis for reporting. (These *Knowledge Solutions* also disclose the approach to progress reporting and what will condition ratings of progress in adoption.) The framework is expected to promote a stronger culture of results and performance for knowledge management in ADB.

Notes

- The impact targeted is that indicated in ADB (2004)
- The primary outcomes, listed in *Knowledge Management in ADB*, that the plan of action supports are (i) an improved management system; (ii) improved business processes and information technology solutions for knowledge capture, enrichment, storage, and retrieval; (iii) improved organizational culture for knowledge sharing; (iv) well-functioning communities of practice; and (v) expanded knowledge sharing, learning, and dissemination through external relations and networking
- From 2010, the annual knowledge management survey will be augmented by an annual survey gauging staff perceptions of competencies to learn for change in ADB
- The annual *Forum on Learning* is expected to focus on CoPs—yet cut across the other three pillars—and focus on what was learned in the preceding year in practical ways with measurable outcomes that leverage multipliers
