M.G. Hadfield and R.E. Young: Planctosphaera (Hemichordata: Enteropneusta) in the Pacific Ocean

Due to a printer's error the second paragraph of the second column is incorrect. We would therefore like to ask all subscribers to cut out this corrected version and adhere it over the original text in the journal. May we please ask you to excuse this unfortunate error.

Springer-Verlag

on its almost purely oceanic distribution, suggested that it was the larva of an abyssal enteropneust. Damas and Stiasny (1961) had also concluded that the parent of *P. pelagica* lived at great depth.

This giant larva is here reported from the Pacific Ocean. Because the Pacific Ocean specimens have not been compared with type material by the authors, and because the taxon *Planctosphaera pelagica* is applied to a larva and not an adult, we use the term "planctosphaera" in this paper as a common name and not as a technical taxon.
