

## **Erratum**

In the article "The Application of Special Relativity to the Right-Angled Lever" by S. J. Prokhovnik and K. P. Kovács [*Found. Phys.* **15**, 163 (1985)] the same symbols,  $l_x$ ,  $l_y$ , were inadvertently employed for the lengths of the arms of the lever as well as for the lengths of the springs attached to those arms, parallel to the  $x$  and  $y$  axes, respectively. This duplication does not affect the argument or the results obtained, as is easily seen. It might, however, be a source of confusion to the reader.
