Commun. Math. Phys. **97**, 59–78 (1985)

The coefficient of  $a^2 \sum_{\mu, \nu} \text{Tr}(D_\mu F_{\mu\nu} D_\nu F_{\mu\nu})$  in Eq. (62) should be

$$(2c_1 - 2c_2 - 2c_3 + \frac{1}{6}) \quad \text{instead of} \quad (2c_1 - 2c_3 + \frac{1}{6}).$$

The value of  $r_1$  for the operator  $\mathcal{O}_2$  in Table 2 should be

$$-\frac{1}{6} \quad \text{instead of} \quad +\frac{1}{3}.$$

These alterations have absolutely no bearing on the main results of the paper.
