

Cardiovascular antibody imaging

Cardiovascular adrenergic function imaging

Miscellaneous cardiovascular imaging agents

Technical aspects of imaging

Kenneth A. Brown, MD

CORRECTION

In the Khaw and Narula article, "Antibody Imaging in the Evaluation of Cardiovascular Diseases," that appeared in the September/October 1994 issue of the JOURNAL, the reference to "guanosine monophosphate-140" on page 471 should have read "a-granule membrane protein GMP-140." In Figure 8, page 465, Narula J should be the first author in the reference. The disclosure on page 473 is for Dr. Khaw.
