**Correction to: Semin Immunopathol (2018) 40:113–124**  
<https://doi.org/10.1007/s00281-017-0662-9>

The presentation of Fig. 2 was incorrect.

The correct version of Fig. 2 is given below.

**Fig. 2** Complement components and activation products in the AD brain. Examples of AD brain sections stained with different complement antibodies: plaques stain strongly for C1q, MAC and CFH. Neurons are also strongly positive for CFH. Aβ40 staining of plaques is shown as a control
