Erratum to: J Neurol DOI 10.1007/s00415-017-8398-y

The author would like to correct the errors in the publication of the original article. The corrected details are given below for your reading.

In “Discussion”, first sentence of the fourth paragraph should read as:

The pooled event rate of 19% per year for future ICH in patients with probable CAA is higher than the future risk of recurrent ICH previously reported after ICH: 1.3–2.9% per year following deep ICH and 2.5–14.3% per year following lobar ICH [33].

The online version of the original article can be found under doi:[10.1007/s00415-017-8398-y](https://doi.org/10.1007/s00415-017-8398-y).
