The *European Journal of Applied Physiology* continues to publish original research as well as theoretical and modeling papers in the field of human, integrative and translational physiology. The profile and standard of this journal, not only depends on the quality of the submitted manuscripts, but also on the referees' comprehensive evaluations of the form and content of these articles. The whole editorial team most gratefully appreciates these time consuming efforts and

would like to acknowledge the crucial contributions they have made over the past year. In contrast to our previous acknowledgements however, we are not allowed to publish the names of our contributing referees, due to the current GDPR regulations. We thank you for your understanding.
