Erratum to: Eur J Pediatr
DOI 10.1007/s00431-008-0722-1

There was an important mistake in our paper:

On the last paragraph of discussion, "5" was missing in front of " days".

The corrected text would be: coronary investigation should be performed in patients younger than 1 year who have presented with an unexplained fever lasting more than **5 days** and any of the clinical manifestations supporting the diagnosis of KD. "

The online version of the original article can be found at <http://dx.doi.org/10.1007/s00431-008-0722-1>.
