This book of rehabilitation and physical treatments is intended to the rehabilitation doctors and to the kinesiotherapists. It is dedicated to the pathology of the intervertebral disks of the lumbar spine, the thoracic and the cervical spine. Each segment is studied with diagnosis of assessment, with the diagnostic tests and the therapeutic procedures, with a specific chapter for the patients in postoperative rehabilitation.

Very perfectly illustrated, it will also interest the orthopedic surgeon and the neurosurgeon to know the treatments pre and postoperative their patients.

Compliance with ethical standards

Conflict of interest The author declares that he has no competing interests.
