Correction to: Bull Eng Geol Environ (2017)

<https://doi.org/10.1007/s10064-017-1183-4>

In the reference list of the published online paper, the information captured below is wrong:

Ramesh, M. V. (2017). Slope stability investigation of Chandmari in Sikkim, Northeastern India. In Workshop 390 on World Landslide Forum (pp. 363–369). Springer, Cham.

The correct reference should be:

Thambidurai P, Ramesh MV (2017) Slope stability investigation of Chandmari in Sikkim, Northeastern India. In: Mikos M, Tiwari B, Yin Y, Sassa K. (eds), Advancing

Culture of Living with Landslides. Workshop on World Landslide Forum 2017, Ljubljana, Slovenia. 363–369. Cham, Switzerland: Springer.

The reference citation under “**Mathematical formulation and derivation**” heading will now become:

Many researchers have performed slope stability analysis in India using slope mass rating and other different techniques (Singh and Verma 2007; Singh et al. 2013; Thambidurai and Ramesh 2017).
