Due to an editing error, Fig. 7 did not contain several key numbers and an explanation of the numbers in the figure note. The correct Fig. 7 and note are copied below.

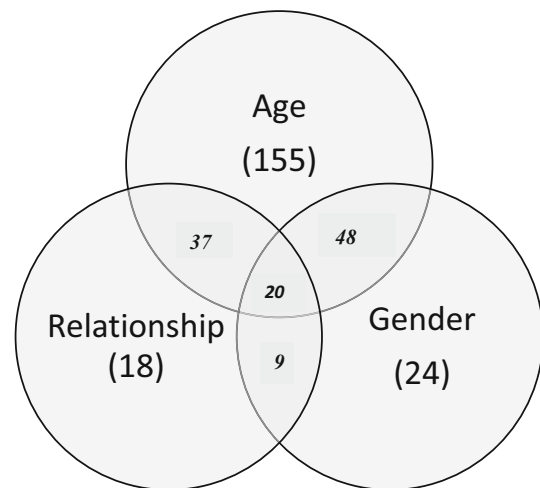

Fig. 7 Venn diagram of patterns of polymorphism for 311 polymorphic sexual offenders reported by Stephens, Seto, Goodwill, and Cantor (2016). *Note* The numbers in parentheses refer to the number of offenders who displayed that type of victim polymorphism (e.g., 155 displayed victim age polymorphism). The **bolded** and *italicized* numbers in the intersections refer to the number of offenders who were polymorphic in multiple domains; for example, 20 individuals displayed victim age, gender, and relationship polymorphism in their sexual offending history
