### Erratum to: Boundary-Layer Meteorol DOI 10.1007/s10546-011-9640-2

The text beneath Eq. 16, including Eq. 17, should read: “Below  $h_{m\text{-eff}}$ , the drag contribution is estimated by the same method as was used for uniform arrays:

$$F_{D1} = 0.5\rho \hat{U}_{hm\text{-eff}}^2 C_D A_f^*(h < h_{m\text{-eff}}) \quad (17)$$

where  $\hat{U}_{hm\text{-eff}}$  is the reference wind speed at  $h_{m\text{-eff}}$  from Eq. 1, and  $A_f^*(h < h_{m\text{-eff}})$  is the unsheltered frontal area of the blocks below  $h_{m\text{-eff}}$ .”
