Correction to: Community Mental Health Journal
<https://doi.org/10.1007/s10597-018-0290-4>

The original version of this article unfortunately contained a mistake in EAT-26 values under “Patients Receiving Treatment for an ED in their Sector” section.

The correct sentence is as follows:

In addition, patients had significantly lower scores (i.e. less symptoms) at the end of treatment on the EAT-26

total score (M pre = 27.56, SD = 14.3; M post = 16.64, SD = 12.22) ($t(43)$ = 4.93, p = .000), and on depressive symptoms, as measured by the CES-D, from pre (M = 1.26, SD = 0.63) to post-treatment (M = 0.99, SD = 0.57) ($t(43)$ = 3.00, p = .005).

The original article can be found online at <https://doi.org/10.1007/s10597-018-0290-4>.
