

## Erratum

To the article "Quenching of Photoluminescence in Cadmium Selenide Nanocrystals in External Electric Fields for Different Excitation Photon Energies" by L. I. Gurinovich, M. V. Artemyev, A. P. Stupak, S. Ya. Prislop-skii, S. V. Zhukovsky, and S. V. Gaponenko, Vol. 79, No. 1, pp. 95–103, March, 2012. The wrong figure, which is a repeat of Fig. 4, appears above the caption to Fig. 5 on page 100.

The correct figure together with the caption appears below:

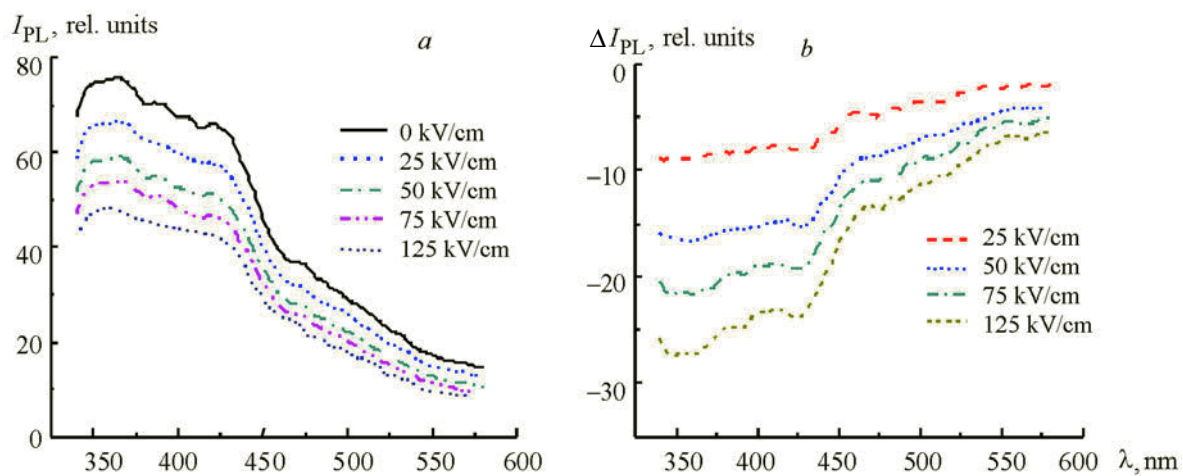

Fig. 5. Photoluminescence excitation (a) and differential excitation (b) spectra of CdSe nanorods with average particle length/diameter 20:5 nm (matrix layer thickness  $\Delta h_M \sim 40 \mu\text{m}$ ) in external electric fields of 0 to 125 kV/cm;  $\lambda_{\text{det}} = 630 \text{ nm}$ .
