**Correction to:** *Journal of Immigrant and Minority Health*  
<https://doi.org/10.1007/s10903-020-01025-2>

The original version of the article unfortunately contained small errors in Table 1 and the text under Result section. These errors do not affect the paper's main findings in any way.

The below listed are the errors in Table 1.

- Footnote 'a' should be deleted and Column 6 renamed 'Primary countries or regions of origin'. Instead of 'Not Available', the country/region column should say Africa for Wong et al.'s paper. Pakistan has been added as a primary country for Hocking et al.
- The PTSD tool for Kaltenbach et al. is PSS-I/PCL-5 not the HTQ as reported before. The study country in Kashyap et al. is the USA not Australia and the PTSD

tool is the HTQ not PCL. Heeren et al. used the HSCL-25 and PDS in addition to the MINI.

- Whitsett et al. conducted a prospective cohort study, not a cross-sectional study as reported. Boersma used a case-control design.

The correct Table 1 is presented here.

In the second paragraph under the 'Results' section, the sentence 'with the USA (19% of studies) and Australia (19%) most frequent.' should be read as 'with the USA (24% of studies) most frequent.' and the sentence '71% of studies were cross-sectional' should read '67% of studies were cross-sectional'.

---

The original article can be found online at <https://doi.org/10.1007/s10903-020-01025-2>.
