

ERRATUM

To the article “Modeling the residual strength of a fibrous composite using the residual Daniels function,” by Yu. Paramonov, V. Cimanis, S. Varickis, and M. Kleinhofs, Vol. 52, No.4, 2016, pp. 497-506.

On page 500, Eq. (12) should be

$$s_i = (s_i^0 - s_{i-1})\mathcal{E} + s_{i-1},$$
$$s_i^0 = k_C s^+ \sqrt{[1 - rv(s_{i-1})/n]} = k_C s^+ \sqrt{[1 - r\widehat{F}_{X_L}(s_{i-1})]}, \quad i = 1, 2, \dots$$
