Publisher's Note Springer Nature remains neutral with regard to jurisdictional claims in published maps and institutional affiliations.

The authors regret that in our paper it is stated that 2.5 mM NaCl (lysis buffer solution) and 0.3 mM NaOH (electrophoresis buffer solutions) were used, it should of course be 2.5 M NaCl and 0.3 M NaOH. Further it is stated that the S9-mix was prepared by only adding 2 mM NADPH, it should of course be 2 mM NADPH and 2 mM NADH.

The authors would like to apologise for any inconvenience caused.

The original article can be found online at <https://doi.org/10.1007/s12403-019-00328-6>.
