Citation: Li, S. P., W. Hou, and G. L. Feng, 2018: Atmospheric circulation patterns over East Asia and their connection with summer precipitation and surface air temperature in eastern China during 1961–2013. *J. Meteor. Res.*, **32**(4), 670–670, doi: 10.1007/s13351-018-8777-z.

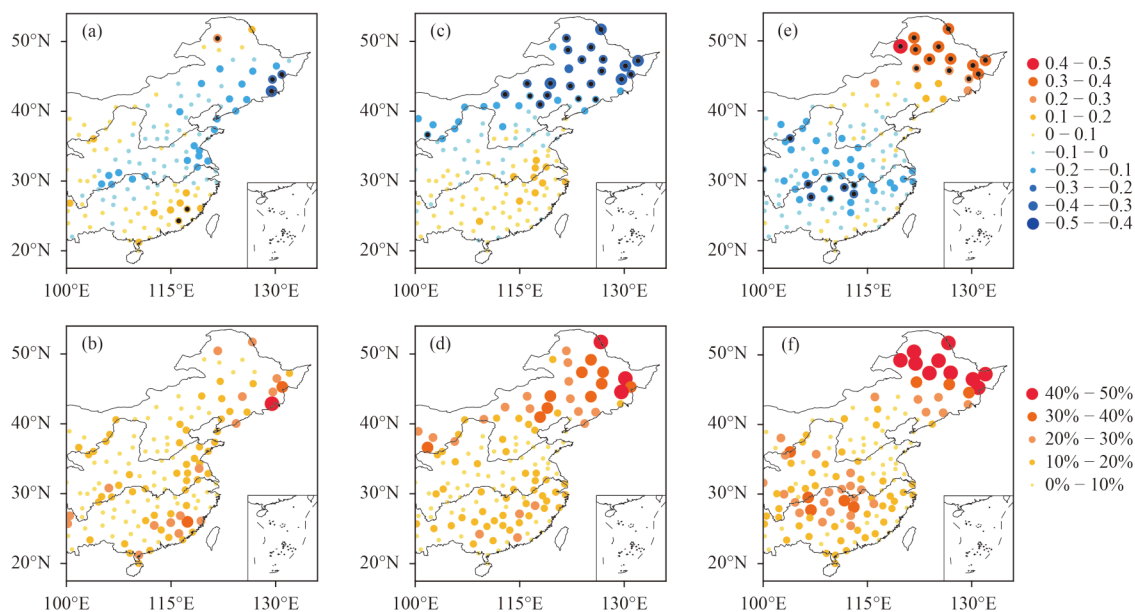

Fig. 6. As in Fig. 5, but for the summer SAT (°C).

This corrigendum is to report a figure error in Li et al. (2018) entitled “Atmospheric Circulation Patterns over East Asia and Their Connection with Summer Precipitation and Surface Air Temperature in Eastern China during 1961–2013”. In Li et al. (2018), Fig. 6a should be replaced by the figure (Fig. 6a) here.

We sincerely apologize for the mistake and hope that this error does not reflect poorly on the paper’s overall quality. It is important to note that the conclusions about

SAT anomalies patterns in eastern China still hold.
