In the case description section, the sentence “A repeat dedicated brain FDG-PET scan performed on day 9, under burst suppression, showed diffuse hypermetabolism with persistent relative hypermetabolism in the left ventral striatum and septalarea (Fig. 1b).” should read as “A repeat dedicated brain FDG-PET scan performed on day 9, under burst suppression,

showed diffuse hypometabolism with persistent relative hypermetabolism in the left ventral striatum and septal area (Fig. 1b).”
