ERRATUM

EXTRATERRESTRIAL ORGANIC COMPOUNDS IN METEORITES

OLIVER BOTTA and JEFFREY L. BADA

Due to an unfortunate misunderstanding during the summer holiday season, this paper was published before the author’s comments on the galley proofs were received; the publishers regret this and apologise to all concerned.

Significant changes are as follows:

p. 413, last line:............ (Brearley, 1997).

p. 420, line 4 of Section 2.2.1.3: In order to release bound amino acids and make .

..............

p. 433, line 3 of Section 3.3: ............ sulfonates and alkyl phosphonates have been identified in Murchison by .

.............

p. 445, line 7, and elsewhere: ............ the presence of solid C=N— (not CDN—) bearing material ............

p. 449, line 15: ............ as cyanopolyyynes like HC—N, carbon-chain species . .

........

p. 452, line 5: ............ Meier et al., 1998b) ............
