

Monetary Equivalents

Selected amounts of money (referred to in the text by *) and their value today (2002) to the nearest pound/dollar. Note: in pre-decimal British currency 12d = one shilling (1s) and 20 shillings = £1. On decimalization (15 February 1971) one shilling became 5p. Therefore (for example) £12 12s = £12.60 and 18s = 90p.

<i>Date</i>	<i>Amount</i>	<i>UK Sterling today</i>	<i>US Dollars today</i>
7 April, 1900	£12 12s	£786	\$1270
22 April, 1900	£27 10s 6d	£1717	\$2790
5 December, 1903	£2000	£123 482	\$193 000
