Erratum to: Planted forest development in Australia and New Zealand: comparative trends and future opportunities

David Rhodes^{1*} and Michael Stephens²

After publication of our work (Rhodes and Stephens 2014), we realised that incorrect data was included in Table five (Table 1 here). Specifically, most of the mean annual increment values and some of the rotation lengths were misquoted. The correct version of Table five (Table 1 here) is provided here.

Table 1 Australian regional growth rates for wood plantations

Species	Mean Annual Increment (m ³ ha ⁻¹ year ⁻¹)	Rotation length (years)	Region(s)
Temperate eucalypts (pulpwood)	16 - 25	10 - 14	Tasmania, South Australia, New South Wales, Victoria, Queensland, south-west Western Australia
Temperate eucalypts (sawlog)	13 - 20	25 - 45	Tasmania, South Australia, New South Wales, Victoria, Queensland, south-west Western Australia
<i>Araucaria</i> spp.	13 - 15	50	Queensland, northern New South Wales
<i>Pinus radiata</i>	16 - 21	30	Tasmania, Victoria, New South Wales, south-west Western Australia, South Australia
<i>Pinus elliotii</i> and <i>P. caribaea</i> hybrids	12 - 18	30	Queensland, northern New South Wales
<i>Eucalyptus nitens</i>	15	15	Tasmania
