

Addendum

Rapid microwave synthesis and optical activity of highly crystalline platinum nanocubes – ADDENDUM

Clare Davis-Wheeler Chin, Sara Akbarian-Tefaghi, Juana Reconco-Ramirez, and John B. Wiley

doi: <https://doi.org/10.1557/mrc.2017.137>, Published by Materials Research Society with Cambridge University Press, 14 January 2018

In Davis-Wheeler Chin et al.,¹ the following funding acknowledgments were inadvertently omitted:

Support from the National Science Foundation (CHE-1412670) is gratefully acknowledged. Also, C. D.-W. C. would like to thank the Louisiana Board of Regents for her Graduate Fellowship.

The authors apologize for this omission.
