Retraction note: Psychon Bull Rev.

<https://doi.org/10.3758/s13423-017-1376-7>

The authors have retracted this article (Saltzman and Myers, 2018) because upon re-review of the data, a programming error was found that led to unequal presentations of items during the test phases of the experiment. The conclusions drawn are therefore unreliable. The authors have performed a full replication of the original dataset and submitted a new manuscript for peer review. All authors agree with this retraction.

Publisher's note Springer Nature remains neutral with regard to jurisdictional claims in published maps and institutional affiliations.
