

Contributors

Paul Brook is a Senior Lecturer in service work and consumption at Manchester Metropolitan University Business School. He writes on service work, emotional labor, and labor process theory. Recent publications offering critical assessments of Hochschild's emotional labor theory have appeared in *Capital & Class* and *Work, Employment & Society*. His ongoing research is the development of a Marxist theorization of emotional and "whole person" labor power from within labor process theory.

Sara Carpenter is a PhD candidate in the Adult Education and Community Development program at the Ontario Institute for Studies in Education of the University of Toronto and a faculty member in the Community Worker program at George Brown College, Toronto, Canada. A former community organizer and educator, Sara's research and teaching focus on democracy promotion, citizenship learning, poverty, and imperialism. She is the co-editor (with Shahrzad Mojab) of *Educating from Marx: Race, Gender, and Learning* (Palgrave, 2011).

Chik Collins is a Senior Lecturer in Politics in the School of Social Sciences at the University of the West of Scotland. He is the author of *Language, Ideology and Social Consciousness: Developing a Sociohistorical Approach* (Ashgate, 1999) and of numerous book chapters and journal articles on language and social change, the cultural-historical tradition, urban policy, and community development. He has worked with a number of community organizations in the west of Scotland. More recently he has focused on the problem of health and mortality in Scotland, and its relationship to neoliberalism after 1980.

Helen Colley is Professor of Lifelong Learning in the Education and Social Research Institute at Manchester Metropolitan University and a Fellow of the National Institute of Careers Education and Counselling (NICEC). Her research focuses on inequalities of gender and class in postcompulsory and lifelong learning and, in particular, the construction of emotion in labor power. Her publications include *Mentoring for Social Inclusion* (2003, Routledge Falmer) and an edited collection, *Young People and Social Inclusion* (2007, Council of Europe).

Peter E. Jones is Principal Lecturer in Communication Studies at Sheffield Hallam University. A linguist by background, his research spans a broad range of issues in language, communication, and discourse theory. He also writes on Marxist philosophy and theory and its influence on psychology and semiot-

ics. He is currently writing a book, *Language, Communication and Human Potential in Vygotsky's Tradition*, for Cambridge University Press.

Peter McLaren, formerly Professor at the Graduate School of Education and Information Studies, University of California, Los Angeles, is now Professor at the School of Critical Studies in Education, Faculty of Education, University of Auckland. He is one of the leading practitioners of Critical Pedagogy in the United States as well as one of its leading advocates worldwide. He was the inaugural recipient of the Paulo Freire Social Justice Award presented by Chapman University, California, April 2002. He also received the Amigo Honorifica de la Comunidad Universitaria de esta Institución by La Universidad Pedagógica Nacional, Unidad 141, Guadalajara, Mexico. Two of his books were winners of the American Education Studies Association Critics Choice Awards for outstanding books in education. He is the author and editor of more than 40 books and his writings have been translated into 20 languages.

Shahrzad Mojab, Professor, is an academic-activist teaching in the Department of Adult Education and Counselling Psychology, Ontario Institute for Studies in Education of the University of Toronto. She specializes in educational policy studies; Marxist-feminism, gender, state, and diaspora; women, war, and learning; and feminism and antiracism pedagogy. She is the editor of *Women, War, Violence, and Learning* (2010, Routledge) and the co-editor (with Sara Carpenter) of *Educating from Marx: Race, Gender and Learning* (Palgrave, 2011).

Victoria Perselli teaches research in professional practice in the School of Education at Kingston University, UK. Her current research interests include practitioner research methods, research paradigms, and pedagogy for critical leadership.

Anna Stetsenko is Full Professor in the Ph.D. Program in Developmental Psychology, with joint appointments in the Ph.D. Program in Urban Education and the Center for the Study of Women and Society, all at The Graduate Center of the City University of New York. Her research revolves around topics at the intersection of human development and education including mind, identity, personhood, and agency. In recent publications, she has developed an innovative dialectical approach of *Transformative Activist Stance* as the grounding for human development and learning in a changing world. This approach encompasses cutting-edge advances in dynamic systems theory, situated and embodied cognition, and cultural-historical activity theory frameworks. It has radical implications in helping to close a number of traditional gaps including theory versus practice, individual versus social, and objectivity versus ethics.

Terry Wrigley worked for many years as a secondary school teacher of English and various related roles, and was until recently a Senior Lecturer in Education at the University of Edinburgh. His teaching, research, and writing span and connect diverse fields of interest: school development, pedagogy, curriculum reform, social justice, and education for citizenship. He edits the journal *Improving Schools* and his many publications include three books: *The Power to Learn* (2000), *Schools of Hope* (2003), and *Another School is Possible* (2006). He is co-editor of the book *Changing Schools*, to be published in 2011.
