

Index

- Ab initio calculations, 233
Ab initio MO method, 247, 251
Absolute helicities 268
Activation energies, 423–426, 452, 454–456
Acryloyl residue, 11
Ag colloids, 387
Aggregates, 314
 head-to-tail mode, 314
 head-to-head mode, 315
Aggregates of the azo chromophore, 42
Alkali-metal cation, 402
Alkaline-earth metal cation, 404, 405
2-Alkoxy benzopyrans, 262, 274, 276, 278
Amino acid, 410
Amorphous polymer, 10
Amphiphilic azobenzene PVAS, 47
Anthracenopyran moiety, 320
Antibody, 401
Antigen, 401
Apparatus for fatigue resistance measurement, 130, 145–149
Apparent absorption coefficient, 74
Artificial receptor, 393
2-Aryl-2-methyl benzopyrans, 262, 274, 291
Atomic interaction energies, 251
Au electrode, 397, 399
Aza-crown ether, 403, 406
Azobenzene(s), 16, 39, 398
Azobenzene-attached acrylamide, 398
Azo-modified polymers, 45
 1-Azonaphthalene, 29
- Barriers energy to thermal racemization, 269, 271
Barriers to thermal enantiomerization, 273, 280, 281
Benzo-1,4-oxazines, 262, 273, 277
Benzopyrans, 262, 273
Benzopyran moiety, 301, 305
Benzothiazoline moiety, 360
Benzothiazolinic spiropyran, 251
- Benzothiazolino spiropyran, 13, 93–95, 359, 362, 363
Benzoxazolino spiropyran, 359
Benzyl viologen, 213
Bianthrone, 451, 453, 455
 folded form, 452
 twisted form, 452
Bibenzopyran, 360
Bilayer membrane, 10
Bipyridinium salts, 213
Birefringence, 37
Bis-merocyanines, 419
Bispiropyran, 317
Bis-spiropyran, 418–420
Bistable photochemical system, 189
Bithioxanthylidene, 455, 456
Bovine serum albumine (BSA), 401
4-Bromo N-salicylidene aniline, 255
- Canonical quinoid structure of merocyanine, 309
6-Carboxy-8-nitro spiropyran, 426
8-Carboxy spiropyran, 426
Charge transfer interaction, 445
Chemically Induced Dynamic Electron Polarization, (CICEP), 223
Cholesteric phases, 34
Cholesterol liquid crystal, 10, 31
Chromatography enantioselective liquid, 263, 265
Chromenes, 153, 184, 185, 187
2H-Chromene, 303, 314, 330, 331
 diphenyl and dimethyl chromenes, 330, 331
2H-Chromene moiety, 84, 360, 381, 388
Chromophores, 419, 420
 α -Chymotrypsin, 399
Coherent anti-Stokes Raman scattering (CARS), 358, 366, 370, 371
Cinnamates, 39
Circular dichroism, 267, 268

- Cis-cisoid X isomer, 68, 69, 71
 Cisoid intermediate, 371
 Cis-trans-cis (CTC) isomer, 372, 375
 Classical (spontaneous) Raman spectroscopy, 358–360, 363–366
 CNDO/S calculations, method, 253,303
 CNDO/2 method, 251
 Colorability, 74
 “Commander molecules,” 52
 “Command surfaces,” 39
 Commercial spirooxazines and chromenes, 153, 154
 Complementary hydrogen bond, 406
 Concanavalin, 397, 398
 Configuration interaction (CI), 242
 Conical intersection, 256
 Conrotatory mode, 249
 Continuous irradiation, 170, 175, 183, 194, 195
 Crowned spirobenzopyrans, 404–406,410
 Crowned spironaphthoxazine, 404
 Crowned spiropyran, 402, 403
 Cryptand spirobenzopyrans, 405
 Cyclic voltammetry, 217
 Cyclodextrin, 217
 1,3-Cyclohexadiene, 255,256
 Cytochrome c, 400
 Cytochrome c oxidase, 400

 Degradation products, 382, 386, 388
 Dialkoxyanthracenes, 254
 Diamino anthraquinone moiety (residue), 35
 Diarylethene(s), derivatives, 244, 247, 249, 255, 256
 1,4-Diazabicyclo [2,2,2] octane (DABCO), 110, 129, 131
 Dichroic dyes, 41, 48
 Dicyano diphenyl barbaralane, 458
 Dicyano semibullvalene, 458
 1,2-Di (3-furyl) ethene, 250, 251
 Dihydroindolizines, 178, 254
 Dimethylene succinic anhydride, 339
 3',3'-Dimethyl-6-nitro spiro[indoline-2,2'-(2H-1)]benzothiopyran], 315
 3,3-Dimethyl oxindole, 76, 123, 129, 387, 388
 6,8-Dinitro spiropyran (merocyanine), 401
 Dioctadecydimethyl ammonium chloride, 221
 Dipalmitoyl-phosphatidylcholine, 221
 1,2-Diphenyl ethene, 250, 251
 1-Diphenylmethylene anthrone, 455
 Diphenyl methylene xanthene, 455
 7,7-Diphenyl[7H]pyrano[3,2-e]indole, 183
 Diphenyl viologen, 214
 2,2'-Dipyridinium salts, 218
 4,4'-Dipyridinium salts, 217
 Disrotatory mode, 249
 Dixanthenylidene, 455
 Dodecyltrimethylammonium chloride, 221
 Doublet state, 212
 Durability, 66
 Dynamical method, 177

 Electron Nuclear Double Resonance (ENDOR), 214,222
 Electron Paramagnetic Resonance (E.P.R.), 211–217, 219–228, 230, 233, 235, 253
 Electron Spin Echo Modulation (ESEM), 221, 222
 Electron spin resonance spectrometry, 139
 Electron transfer, 211, 217, 219, 222, 223, 229
 Egg phosphatidylcholine (egg PC), 410
 Enantiomeric purities, 265
 Enantiomerization, 271–273, 280
 Enantiomers, separation, 262,265
 Energy of intermolecular interactions, 314
 Enol-keto tautomeric, 436
 Equilibrium constants, 431, 432, 434, 435, 450
 1-Ethyl-1'-cetyl-4,4'-bipyridinium dibromide, 223
 Ethyl viologen, 213, 217
 Extended Hückel method, 251
 E-Z photoisomerization of azobenzenes, 17
 E-Z photoisomerization of doped azobenzene, 34
 E-Z thermal isomerization of azobenzenes, 16

 Fatigue resistance, 115
 Ferrioxalate, 168, 173
 Fischer's method, 198, 199
 Flash photolysis, 167, 195, 432
 9,9'-Fluorenylidene anthrone, 455
 1-Formyl imino-2(IH)-naphthalenone, 133
 1-Formyl-β naphthol, 123
 Free radicals, 212
 Free volume, 44, 45
 Fulgides, 21, 338
 adamant-2-ylidene-(1'-methyl-3'-indolyl-ethylidene)succinic anhydride, 348,349
 arylidene derivatives, 339–343
 furyl fulgides, 20
 indole series, 343–347
 isomers, 341
 Fulgide derivatives, 253, 255

- Glucose oxidase (GOD), 400
Grafted spiropyran on PS, PMMA, PHMA, PI polymers, 92
Guanine, 407, 408
Guanosine, 407, 408
Guest-host cells, 41
- Hammett equation, 81
1,3,5-Hexatriene, 255, 256
p-Hexyl azobenzene, 44
Homeotropic alignment, 39
Host-guest chemistry, 52
 α -Hydrazone- β keto esters, 39
Hydrogen transfer, 436
2-Hydroxymethyl pyridine, 53
2-(2'-Hydroxy phenyl) benzothiazole, 255
6-Hydroxy-1',3',3'-trimethyl spiro[2H-1-benzopyran-2,2' indoline], 69
- INDO calculations, 214, 215, 218
Indoline moiety, 81, 301, 381
Indoline spirothiopyrans, 315
Indolino-nitrospiropyran, 363-365
Indolino-spirobenzoxazines, 265
Indolino-spirobenzopyrans, 288, 360, 371, 380
Indolino-spirobenzoxazines, 284, 360, 371, 372, 373, 380
Indolino spiropyran, 298, 359, 372
Inductive effects, 81
Infrared (IR) spectroscopy, 358-364
IR, Raman spectroscopy, 445
In-plane alignment photocontrol, 39, 47
Intramolecular hydrogen bonding, 447, 449
Intramolecular proton transfer, 436
Isotactic copolymer, 13
- Laser flash photolysis (LFP), 227, 228
Length of the C spiro-O bond, 304
Leucohydroxyde, 398
Leucohydroxyde-attached acrylamide, 398
L-glutamic acid, 396
Linearly-polarized light, 24, 38, 39
Liposomal bilayers, 410
Liquid crystal, 10
Liquid-crystal-induced circular dichroism (LCICD), 34
Liquid-crystalline polyesters, 35
Lone electron pair (LEP), 298, 299, 301, 317, 318, 322, 327, 330
Long-chain alkyl silylating reagents, 39
Low-mass liquid crystals, 33
L-lysine, 394
- Marbled texture, 44
McConnell relation, 213
Mechanism of photooxidation of spirooxazines, 124
Merocyanine, 226, 228, 229
Merocyanines, 129, 133, 141
Mesoionic compound, 253
Mesomeric effects, 81
3-Methacryloxymethyl-5-nitro salicylaldehyde, 52, 53
Methacryloxy thiosalicylaldehyde, 53
Methacryloyl residue, 11
2-Methacryloyloxymethyl pyridine, 53
8-Methoxy-6-nitro BIPS, 126, 131, 366, 382, 385
Methylmethacrylate (MMA), 25, 28, 53
Methyl viologen, 213, 214
Micelle, 10
Micelles, 220-222
Micro Raman spectrometer, 373
MNDO-AM1 calculations, 253
MNDO calculations (semi empirical), 249, 253
MNDO method (MOPAC), 325
MNDO/3 method, 254
MNDOC/MRSDCI method, 249, 255
MO calculations, 213, 218
Molar absorptivity, 432, 454
Molar extinction coefficient, 75, 79
Molecular packing, 314
Molecular recognition, 393
Monoclonal antibody, 401
Multifunctional artificial receptor, 408
Multiplicity of the photoreactive state, 67
- NAD(P)H, 399
Nafion, 217
4H-Naphthalenoneperimidines, 333, 338
Naphthopyran moiety, 320
o-Naphthoquinone, 133
Naphthoquinonemethido dyes, 243
Naphth[1,2-d]oxazole, 123
Nematic liquid crystals, 39, 44
Nematic-isotropic transition temperature (T_{NI}), 33
Nematic phases, 31
N-ethyl-N'-trimethylaminopentyl-4,4'-bipyridine, 217
N-formyl-3',3'-dimethyl oxindole, 129
Ni(II) phthalocyanine complex, 242, 243
6-Nitro BIPS, 366, 369
6-Nitrospiro benzopyran, 11

- 6-Nitrospiro [indoline-benzopyran], 15
 8-Nitro spiro[indoline-benzopyran], 426
 6-Nitrospiropyran, 39
 Nitro-substituted spiropyran, 68, 72
 Nitroxides, 212, 227, 228, 234
 5-Nitro-o-vanillin, 76, 387, 388
 N-methylated guanine, 408
 N-methyl pyridinium chloride, 214
 ^1H , ^{13}C , NMR, 421, 425, 436, 443, 445, 448–452
 ^1H NMR Nuclear Overhauser Effect (NOE), 247
 NMR, solid state, 421, 446
 N,N'-bis (salicylidene) diamines, 446
 N,N'-dihydro-4,4'-dipyridinium dichloride, 213
 N,N'-dihydro-4,4'-dipyridyl, 213
 N \rightarrow N proton transfer, 316
 Non-azaheterocyclic spiropyran, 111
 Non linear optics, 253
 ^1H Nuclear magnetic resonance (NMR) spectroscopy enantioselective, 266, 267
 Nucleobase, 406
 Nucleobase receptor, 406
 Nucleoside, 407
- Oligoxyethylene diacetate (OOEAc), 410
 Optical, kinetic and fatigue resistance, properties of commercial pigments, 154–164
 Orbital interactions, 300, 303, 318
 Out-of-plane alignment photocontrol, 331
 Oxaindan moiety, 320
 2-Oxaindan spiropyran, 320
 photochromism, 324
 Oxaindano-spirobenzopyran, 283
 Oxaindano-spiroanthropyran, 283
 Oxazine moiety, 325
 Oxidation in dark solutions, 136
- Pariser–Parr–Pople method, (PPP), 241, 242, 253
 Permanent merocyanines, molecular structure, 306–311
 crystals, 314
 hydrogen bond, 311
 solvation, 310
 trans-cisoid isomer, 311, 313, 314
 trans-transoid isomer, 311, 313, 314
 Permanent (open form) merocyanine, 372, 373
 Photobirefringence, 36, 37
 Photochemical fatigue, 110, 112–114, 145
 Photochemical properties of spiropyran, 315
 Photochemical rate equation, 170
 Photochromic liquid crystalline polymer, 31
 Photochromic polymers, 9
 Photochromic Schiff bases, 254
- Photochromism of sydnone, 253
 Photocoloration, 68, 73, 78
 Photocoloration quantum yields, 74
 Photocontrol of antigen-antibody reaction, 401
 Photocontrol of ionic conduction, 408
 Photocontrolled transport, 410
 Photodegradation, 68, 73, 75, 78, 101–110, 168, 182, 183, 191–193, 195, 203
 Photodichroism, 25, 36, 48, 49
 Photoexcitation, 66, 84, 110
 Photofunctionality, 9
 Photoinduced birefringence, 25, 37
 Photokinetic factor, 168, 197
 Photoinduced ionic conductivity change, 408
 Photomerocyanines (open forms), 361, 364, 366, 372, 375
 Photomodulation of peptide conformation, 394
 Photon-heat mode, 247
 Photon-photon mode, 249
 Photooxidation, 68, 73, 382, 386, 388
 Photoreceptor, 397
 Photoregulation for cation-binding of spiropyran, 408
 Photoregulation of enzyme activity, 398
 Photoregulation of protein characteristics, 397
 Photoresponsive liquid-crystal, 39
 Photostability of fulgides, 151–153
 Photostability, 74
 Photostationary method, 177, 195, 198
 Photostationary state, 175, 177, 189, 197
 Pimers, 216
 Polarization holography, 25
 Polarization photochromism in polymer solids, 24
 Polarization photochromism of liquid-crystalline polymers, 35
 Polarized light induced dichroism, 24
 Poly[4'-(2-acryloyloxy ethyl) ethylamino]-4-nitro azobenzene, 53
 Poly carbonate, 20
 Poly (L-glutamate) film, 34, 35
 Polymeric Langmuir–Blodgett films, 10, 33, 39, 44
 Polymeric materials, 9
 Polymeric matrix, 9
 Polymeric mesophases, 31
 Polymers doped with photochromic compounds, 24
 Polymethyl (ethyl) methacrylate (PM(E)MA), 25, 28
 Poly (N-vinyl-2 pyrrolidone), 18, 19

- Poly (perfluorosulfonate (PPFS-Li), 410
Polyphosphazenes, 15
Polysiloxanes, 15
Polystyrene (PS), 20
Poly (tetrahydrofuran), 19, 53
Poly (trityl methacrylate) on silica, 265, 269
Polyurethane films, 382
Polyvinyl alcohol (PVA) 25, 40
Poly (vinyl chloride) (PVC), 408
Positive and negative thermochromism, 432,443
Potassium tert-butoxide, 230, 231
Previtamine **D**₃, 255, 256
3-*i*-Propyloxy-8-methoxy-3' methyl6-nitro-[benzo-thiazolino-[2,2']-[2H-1]-benzopyran], 180–182
Pyrroles, 220
Pyrroloquinolinoquinone (PPQ), 399
- Quantum yield, 170, 177, 181, 195, 255
Quinoidal structure, 369, 370, 372, 374
Quinoid structure of merocyanine, 308, 309
Quinone derivatives, 254
- Radical anion, 211, 218, 230, 231, 233, 234
Radical cation, 211, 212, 214, 217-219, 223
Radical ions, 212
Random coil α -helix conversion, 396
Regulation of liquid crystal alignment, 39
Relative configurations, 267
Reorientation of azobenzenes, 29
Ring-opening process (step), 361, 371
Rubling treatment, 47
- Salicylaldehydes, 76
Salicylidene-meta aminopyridines, 439
Salicylidene-para aminopyridines, 439
Salicylidene Schiff bases, 445,446
Salicyl-Schiff bases, 436
Saturated five-membered ring
 azaheterocyclospiropyrans, 96–99
Saturated six-membered ring
 azaheterocyclospiropyrans, 99, 100
Schlieren texture, 44
Self-organization of liquid crystals, 50
Semi bullvalenetetracarboxylates, 458
Side-by-side interaction, 47
Single-ionic conducting system, 410
Singlet oxygen reactivity, 124
Smectic phases, 31
Sodium 1,2-bis (2 ethylhexyl carbonyl)-1-ethanesulfonate (AOT)reversed micelles, 411
- “Soldier molecules,” 52
Sol-gel inorganic matrices, 21
Solvatochromism, 374,385,418
Specific rotation [α], 267
Spin-coated films, 40
Spin -coating of amorphous azopolymers, 37, 39
Spin density and spin density distribution, 212-215, 230, 231, 234
Spin-probes, 234, 235
Spin trapping, 227, 234
Spiro [benzopyran-naphthopyrans], 283
Spirobenzopyrans, 262, 278, 280, 282
Spiro benzoselenazolino benzopyran, 12, 53
Spiro[bibenzopyrans], 115, 117,360
Spirobinaphthopyrans, 281
Spiro center, 301, 306, 315, 317, 322, 325, 329
Spiro compounds, 226, 227
Spirocyclic cyclohexadienone perimidine, 333, 338
Spiro cyclopropene fluorene, 53
Spiro [dithiolene-benzopyrans], 118
Spiro [fluorene-benzopyrans], 330, 331
Spiro fluorenyl indolizines, 14, 53
Spiro[indoline-benzoxazines], 262, 284, 285, 287, 290, 420
Spiro [indoline-benzopyrans], 186, 190, 203, 212, 226, 229, 262, 288–290,426
Spiro [indoline-naphthopyrans], 127, 135, 149, 212, 234,416
Spiro [indoline-naphthoxazines], 132, 149, 212, 233, 234, 286, 287,416, 420,432
Spiro[indoline-oxazines], 430
Spiro[indoline-phenanthrolineoxazines], 420
Spiro[indoline-phenanthroxazines], 420, 432
Spiro[indoline-pyrans], 416,425
Spiro indoline benzopyrans, 52
Spiro-2H-naphtho[1,8-bc]-oxepins, 318
Spiro-naphthoxazines, 245
 ¹³C NMR shift, 245
 relative energy of open forms calculation, 248
 visible absorption of the colored forms, 245
Spiro[oxaindane-pyrans],425, 426
Spiro[oxazepine-naphthoxazines], 420
Spirooxazines, 359, 364,372
Spirooxazine-doped polymer films, 253
Spirooxazines, 324, 326
 benzoxazines, 325
 naphthoxazines, 325
 quinolinoxazines, 325

- Spirooxazines photodegradation, 115, 120
 effect of solvent polarity on photodegradation and colorability, 119
 effect of structure on photodegradation and colorability, 119
 effect of wavelength irradiation on photodegradation and colorability, 119
- Spiropyran(s), 298, 302, 323, 357, 364
 colorability, 324, 329

 free energies of activation, 323
- Thermochromic perimidine
 spirocyclohexadienones, 421, 458
- Time-resolved resonance Raman (**TR³spec**-tscopy), 358, 366–370, 372–377
- TiO₂**, 216
- 2-(Thioxanthene-9-ylidene) indane-1,3-dione, 455
- β-TKN**, 224, 225
- Trans isomers, 372, 375
- Trans-trans-cis isomer (TTC), 372, 373, 375–378
- Triads DDD, MDD, MDM, 29
- Trianions, 233, 234
- Tribenzoyl cellulose, 263
- 1',3',3'-Trimethyl-5'-nitrospiro[indoline-2,2'[2H-1]benzopyran], 304
- 1',3',3'-Trimethyl-8-nitrospiro[indolino-benzopyran], 226
- 1,3,3-Trimethyl oxindole, 76, 123, 129, 387, 388
- TR³ instrumentation, 367, 368
- Triphenylgermyl radicals, 234
- Triphenyl imidazolyl radical, 191–194
- Triplet biradicals, 212, 227
- Triplet diradical, 227
- Triplet spectra, 212
- Triplet spectrum, 226, 228
- α-Tocopherol**, 223
- Unsubstituted spiroopyrans and spirooxazines, 70

Viologens, 212–214, 216–223

Viologen polyionenes, 19, 53

Water-soluble azo dyes, 48, 50

Watson–Crick base pair, 408

Woodward–Hoffmann rules, 249

Xanthylidene anthrone, 455

X-Ray diffraction, 297

X-Ray diffraction, 439, 445, 446, 451, 456–459

Zeolites, 218

Zindo method, 242

Zwitterionic, 416, 49

Zwitterionic structure (form), 364, 366, 369, 370

Zwitterionic structure of merocyanine, 308, 309
