

## INDEX OF CONTRIBUTORS

---

- Achatz, K. 265  
Backhouse, R. 49  
Bicarregui, J.C. 187  
Curtis, S. 1  
Desharnais, J. 212  
Fiadeiro, J.L. 240  
Frappier, M. 212  
Genaud, S. 107  
Goyal, D. 382  
Hu, Z. 76  
Iwasaki, H. 76  
Lano, K.C. 187  
Liu, Y.A. 357  
Lopes, A. 240  
Maibaum, T.S.E. 187,  
240  
Mili, A. 212  
Möller, B. 24  
Norvell, T.S. 415  
Obermayer, K. 132  
Onoue, Y. 76  
Paige, R. 382  
Partsch, H. 265  
Pepper, P. 132  
Perrin, G.-R. 107  
Pettorossi, A. 296  
Piepenbrock, C. 132  
Proietti, M. 296  
Srinivas, Y.V. 164  
Südholt, M. 132  
Takeichi, M. 76  
Vaccari, M. 49  
Violard, E. 107  
Wile, .D.S. 324

## KEYWORD INDEX

---

- abstract syntax trees 324
- action logic 187
- backtracking 265
- Bird-Meertens formalisms 76
- caching intermediate results 357
- circuit derivation 49
- complex systems 240
- compositionality 164
- data distribution algebra 132
- data fields 107
- data-parallelism 107
- destructive updating 24
- dynamic programming 1
- encapsulation 187
- feature interactions 212
- fixed point semantics 415
- formal methods 187
- functional implementation 265
- functional programming 132
- fusion 76
- generalization strategy 296
- incremental development 240
- incrementalization 357
- initialization 357
- interconnection 240
- iteration 357
- list introduction strategy 296
- logic programming 212
- logic programming 296
- loop optimization 357
- loops 415
- maintaining auxiliary information 357
- metaprogramming 324
- mixed-variance refinement 164
- modular specification object-oriented 187
- numerical algorithm 132
- object calculus 187
- OO 187
- optimization problems 1
- parallel programming 132
- parameterized specifications 164
- pointer structures 24
- predictive semantics 415
- program calculation 49, 76
- program optimization 357
- program transformation 24, 107, 132, 296
- programming calculus 324
- recursion 357, 415
- refinement 107
  - calculi 415
- regular languages 49
- relation algebra 49
- relational calculus 1, 24, 49
- relational specifications 212
- retiming 49
- set comprehension 265
- sharing 24
- silicon compilation 49
- skeleton 132
- slowdown 49
- strength reduction 357
- synthesis 240
- syntropy 187
- systolic circuits 49
- temporal logic 187
- termination condition 357
- transformational programming 265
- transformations 324
- tupling strategy 296
- unfolding/folding transformation rules 296
