

INDEX

- Antennas
 - array, 101-103, 143-151, 153-160
 - conical, 25-32, 63
 - descriptors, 75-82
 - dispersion, 63-68
 - folded monopole, 49-56
 - impulse radiating, 9-16, 117-120
 - loop, 33-40
 - omnidirectional, 41-48
 - pattern variation, 57-62
 - self complementary, 17-24
 - slot, 1-8
 - TEM 6-8
 - tuning, 83-87
 - UWB (general), 251-258
 - Vivaldi (phase center), 69-73
 - VSWR, 41-48
- Clutter, 222-225
- Communication, 243-250
- Data processing, 113-120, 121-125
- Deconvolution 129
- Dielectric, 187-193, 196, 229-230
- Directional coupler, 114-117, 179-188
- DORT, 203-210, 220-221
- Electromagnetic implosion, 97-104
- E-pulse, 199
- E-wave (TM), 92-93
- FFT (fast Fourier transform), 197-199
- High-voltage, 179-186
- H-wave (TE), 5-6
- Human beings, 227-234
- Imaging, 153-160
- Impulse response, 127
- Integrated circuit, 161-170
- IRA, (impulse radiating antenna)
 - see antennas
- Lens, 89-96
- M-Sequence, 125-142
- Multipath, 172
- Radar, 153-186, 243-250,
 - ground penetrating, 153-160
- Ray tracing, 176
- Reflector (prolate spheroidal), 98-101
- Sampling, 161-170
- Scattering, 197-104, 187-234
- Scattering center,s 127-134
- Semiconductor, 234-242
- SEM (singularity expansion method),
 - 187-193, 195-202
- Spherical modes, 85
- Subregions, 211-218
- SVM regressor, 143-150
- Switching, 235-242
- Target detection, 148
- Time integrals, 105-112, 121-125,
 - 219-226
- Time reversal, 105-112, 171-178,
 - 203-210, 219-226
- Wireless, 105-112
