

Short Bios

Editors

Miltiadis D. Lytras is an Assistant Professor in the Computer Engineering and Informatics Department-CEID (University of Patras). His research focuses on semantic web, knowledge management and e-learning, with more than 100 publications in these areas. He has co-edited / co-edits, 25 special issues in International Journals (e.g. IEEE Transaction on Knowledge and Data Engineering, IEEE Internet Computing, IEEE Transactions on Education, Computers in Human Behaviour etc) and has authored/[co-]edited 12 books [e.g. Open Source for Knowledge and Learning management, Ubiquitous and Pervasive Knowledge Management, Intelligent Learning Infrastructures for Knowledge Intensive Organizations, Semantic Based Information systems] . He is the founder and officer of the Semantic Web and Information Systems Special Interest Group in the Association for Information Systems (<http://www.sigsemis.org>). He serves as the (Co) Editor in Chief of 12 international journals [e.g. International Journal of Knowledge and Learning, International Journal of Technology Enhanced Learning, International Journal on Social and Humanistic Computing, International Journal on Semantic Web and Information Systems, International Journal on Digital Culture and Electronic Tourism, International Journal of Electronic Democracy, International Journal of Electronic Banking, International Journal of Electronic Trade] while he is associate editor or editorial board member in seven more.

Patricia Ordóñez de Pablos is professor in the Department of Business Administration and Accountability, at the Faculty of Economics of The University of Oviedo (Spain). Her teaching and research interests focus on the areas of strategic management, knowledge management, intellectual capital measuring and reporting, organizational learning and human resources management. She is Executive Editor of International Journal of Chinese Culture and Management, Executive Editor of the International Journal of Learning and Intellectual, Editor in Chief of the International Journal of Strategic Change Management and Co-Editor of China Insights Today. She serves in the Editorial Board of more than 15 scientific journals and has co-edited books, like Web 2.0: The Business Model (Springer).

Authors

Al Davis is a strategy and entrepreneurship professor at the U of Colorado at Colorado Springs. Previously, he was CEO of Omni-Vista, VP of Engineering Services at BTG, a Director of R&D at GTE Comm Sys, and Director of the Software Technology Cntr at GTE Labs. He has held academic positions at George Mason U and U Tennessee, and temporary academic positions at Atma Jaya U in Yogyakarta (Indonesia); U Jos (Nigeria); U Politecnica de Madrid (Spain); U Technology, Sydney (Australia); and U Western Cape, Cape Town (South Africa). He was Editor-in-Chief of IEEE Software (1994-1998). He is an editor for J Systems and Software (1987-present) and was an editor for Comm ACM (1981-1991). He is author of Software Requirements: Objects, Functions and States (Prentice Hall), 201 Principles of Software Development (McGraw Hill), Great Software Debates (Wiley & IEEE CS Press), and Just Enough Requirements Management (Dorset House). He has published 100+ articles in journals, conferences and trade press, and lectured 500+ times in 20+ countries. He is a founder of IEEE International Conferences of Requirements Engineering, and served as general chair of its 1st conference in 1994. He has been a fellow of IEEE since 1994, and earned his Ph.D. in Computer Science from U Illinois in 1975. Find out more about him at <http://web.uccs.edu/adavis>.

Alexander Brem received his Diploma in Business Administration from the University of Erlangen-Nuremberg in 2004, and earned his PhD there in 2007. From 2004 to 2007, he was Senior Research and Teaching Assistant at the Chair of Industrial Management, University of Erlangen-Nuremberg, where he now works as Senior Lecturer. Moreover, he is Founder and Partner of VEND consulting GmbH, Nuremberg. His current research interests include idea and innovation management and strategic management in SMEs.

Ann Hickey is an associate professor of information systems and associate dean of the College of Business at the U of Colorado at Colorado Springs. Before beginning her academic career, she worked for 17 years as a program manager and senior systems analyst for the U.S. government. Her research focuses on requirements engineering and elicitation and has been published in journals including the Journal of Management Information Systems and the Requirements Engineering Journal, conference proceedings and other outlets. She is currently the Associate Editor-in-Chief for requirements for IEEE Software and has served on the program and organizing committees for requirements conferences and workshops. She earned her B.A. in mathematics from Dartmouth College and her M.S. and Ph.D. in Management Information Systems from the U of Arizona. Find out more about her at <http://web.uccs.edu/ahickey>.

Ants Kraus is a lecturer of operation management at the Estonian Business School. He received his M.B.A from the University of Tartu, Estonia, and his M.S. in electronics engineering from the Electrotechnical University of Saint Petersburg, Russia. His main research interest is operation management practice in different cultures. Ants Kraus is a member of the European Thematic Network for

the Excellence in Operations and Supply Chain Management Education, Research and Practice.

Chong Guan is currently a doctoral candidate at the Nanyang Business School, Singapore. She hold her first degree from the Beijing University and her research is in the area of online user behavior.

David L. Olson is the James and H.K. Stuart Professor in MIS Chancellor's Professor at the University of Nebraska. He has published research in over 100 refereed journal articles, primarily on the topic of multiple objective decision making. He teaches in the Management Information Systems, Management Science and Operations Management areas. He has authored or co-authored 21 books, including Decision Aids for Selection Problems, Managerial Issues of Enterprise Resource Planning Systems and Introduction to Business Data Mining. He is a Fellow of the Decision Sciences Institute.

Desheng Dash Wu is the affiliated Professor in RiskLab at the University of Toronto and the Director of RiskChina Research Center at the University of Toronto. His research interests focus on enterprise risk management, performance evaluation in financial industry and credit risk. His work has appeared in several journals as International Journal of Production Research, European Journal of Operational Research, Expert Systems with Applications, Socio-Economic Planning Sciences, Computers and Operations Research, International Journal of System Science. He has served as Editor/Guest Editors/Chairs for several journals/conferences. He is a Member of the Professional Risk Managers' International Association (PRMIA) Academic Advisory Committee.

Dexiang Wu is a PhD candidate majoring in Management Science at the University of Science and Technology of China. His research interests are supply chain and risk management.

Doug Vogel is Professor (Chair) of Information Systems at the City University of Hong Kong and an AIS Fellow. His research interests bridge the business and academic communities in addressing questions of the impact of information systems on aspects of interpersonal communication, group problem solving, cooperative learning, and multi-cultural team productivity. Professor Vogel is especially active in introducing group support technology into enterprises.

Edward J. Lusk is currently a Professor of Accounting, the State University of New York [SUNY], College of Economics and Business, Plattsburgh, NY, USA and Emeritus: The Department of Statistics, The Wharton School, The University of Pennsylvania, Philadelphia, PA. USA. From 2001 to 2006 he held the Chair in Business Administration at the Otto-von-Guericke University, Magdeburg Germany. He has also taught in China at the Shanxi University of Finance and Commerce and the Chulalongkorn University Bangkok, Thailand. He as published more than 160 articles in peer reviewed journals including: The Journal of Political Economy, Statistics and Probability, The Accounting Review, Management Science, The Journal of the Operational Research Society, Gender, Work and Organizations, and Decision Support Systems.

Feng Chen is a research fellow in School of Computing at De Montfort University, England. He got his BSc degree in Computer Science from NanKai Uni-

versity, China, in 1991 and MPhil degree in Computer Science from Dalian University of Technology, China, in 1994. He received the PhD degree in software engineering from De Montfort University, England, in 2007. His current research interests include software engineering, software evolution, software reengineering for security enforcement and software architecture.

Guangming Lu, Senior lecturer in the College of Humanities and Social Science, Beijing Forestry University; Postdoctor of the Renmin University of China, majoring in ICT application in China, especially in rural area; Ph.D. of the Zhejiang University, majoring in agriculture economics, management and rural development; Master of the Shanxi University, majoring in philosophy of science and technology, particularly in the relation between technology development and society changes. Current research focuses on the impact of ICT on the society and social development.

Guangqian Peng, M.Sc in Supply Chain Management Information Systems in Business Administration Department, Wageningen University and Research Centre. Her research recently focuses on management information systems in food supply chains and networks, and E-commerce by SMEs, etc. She became an assistant professor in Guizhou University in 1999. She has participated or managed projects at regional or (inter-)national level. She has (co-)published books and academic articles in such presses and journals as Springer Science+Business Media, Yunnan Science & Technology Press, China Insights Today, Economy in length and breadth, Journal of Southwest Agricultural Univ., and Journal of Ecological Economics. E-mail: Guang-qian.Peng@wur.nl

Guisheng Wu is a professor at School of Economics and Management, Tsinghua University. Wu is considered the leading academic and researcher in the field of management of technological innovation in China. He has co-authored more than 5 articles in international journals such as Research Policy and Technovation. He also published 8 books and more than 130 journal articles in Chinese. The text 'Management of Technological Innovation' is widely used by students in Chinese university and institutes of technology.

He Guo is a professor in the School of Software at Dalian University of Technology, China. He got his BSc degree from Jinlin University, China, in 1982 and MPhil degree from Dalian University of Technology, China, in 1988. His research interests include software architecture and distributed computing.

Hongji Yang is a professor, the Head of Computer Science Division, in School of Computing at De Montfort University, England. He received his BSc and MPhil degree in Computer Science from Jilin University, China, and his PhD degree in Computer Science from Durham University, England. His research interests include software engineering and distributed computing. He was programme Chairing IEEE ICSM'1999, IEEE FTDCS'2001 and IEEE COMPSAC'2002.

Jeffrey Hsu is an Associate Professor of Information Systems at the Silberman College of Business, Fairleigh Dickinson University. He is the author of numerous papers, chapters, and books, and has previous business and IT experience in the software, telecommunications, and financial industries. His research interests include e-commerce, global IT management, human-computer interaction, IS educa-

tion, and business intelligence. Dr. Hsu also serves on the editorial boards of several journals, and has worked on global education, distance learning, and curriculum development initiatives. Professor Hsu received his Ph.D. in Information Systems from Rutgers University.

L. Richard Ye is Professor of Information Systems in the College of Business and Economics, California State University, Northridge. He received his Ph.D. in Management Information Systems from the University of Minnesota. His research interests include expert systems, business value of information technology, and electronic commerce. His work has appeared in such journals as *MIS Quarterly*, *Expert Systems with Applications*, *Information & Management*, and *International Journal of Man-Machine Studies*.

Liang-Hung Lin is currently an Assistant Professor in Department of International Business, National Kaohsiung University of Applied Sciences. Dr. Lin is interested in the fields of technology management, strategic management and organizational management. He ever published academic papers in the *Journal of Organizational Change Management*, *International Journal of Technology Management* and *Total Quality Management and Business Excellence*.

Louis-Francois Pau is born in Copenhagen (Denmark). Since 2001, he has been part-time Professor of Mobile Business and Media, Rotterdam School of Management, part of Erasmus University. He is also Adjunct Professor at Copenhagen Business School since 2004. From 1990-1995, Prof. Dr. Pau was the Technical Director of Europe for Digital Equipment (now part of Hewlett Packard). After which, he moved on in to be the General Manager (CTO) of L.M. Ericsson's Networks Division until 2003; he is since in charge of Technology management across L.M. Ericsson.

Maria Fernanda Pargana Ilhéu holds a PhD degree in Marketing at Sevilla University, and is a Professor of Marketing at ISEG. She is also the Director of the Portuguese-Chinese Chamber of Commerce, the Vice-President of EU-China Business Association, and a member of the Editorial Board of the *International Journal of Chinese Culture and Management*. She is a founding member of Asiânia, the Centre for Asian Studies at ISCTE Business School in Lisbon. Her research interests concern international marketing, international business and China.

Mikael Collan (D.Sc. econ & BA) is a Research Fellow at the Institute for Advanced Management Systems Research at Abo Akademi University, in Turku, Finland. Mikael is working for a consortium of Finnish industrial companies in a joint R&D project and has previously worked as a senior business consultant. His primary research is in real investment profitability analysis methods.

Mingyan Zhao is a senior lecturer in the School of Software at Dalian University of Technology, China. He got his BSc degree from Shenyang University of Technology, China, in 1995 and MPhil degree from Dalian University of Technology, China, in 2001. His research interests include software engineering and data warehouse.

Mo Pak Hung is an Associate Professor in Department of Economics, Hong Kong Baptist University. He receives his Ph. D from the University of Washing-

ton in 1991. Currently, he is studying and writing the mechanisms driving economic development, contemplating the possible evolution of the global economy and the institutions required for accommodating the evolution process. As a hobby, he develops a system of pictograph that may facilitate the harmony and prosperity of the global economy. As a professional economist, he studied and published on varieties of economic issues including Chinese economy and history, political system, economic development and consumer theory. It appears that he has solved some important mysteries about the evolution and stagnation of imperial China.

Ruth Alas is the Vice-Rector for Scientific Affairs and Head of the Management Department at the Estonian Business School. She has written twenty one management textbooks and more than 100 articles on the following subjects: Change management, Crises management, Fundamentals of Management, Human Resource Management, public and private sector management and Strategic Management.

Ru-Yang Hong is Ph.D. candidate in management science and engineering in the school of management at Zhejiang University, China. She received her M.A. in management science and engineering management from Zhejiang University and B.A. in machinery manufacture design and automation from Zhejiang University of Science and Technology. Now she is a senior lecturer in economics at Hangzhou Normal University. Her current research interest focuses on the interface between intellectual capital management and strategic management in the areas of corporate entrepreneurship, technological innovation, strategic network, and organizational learning.

Shouhua Wei is an associate professor at School of Business, Nanjing University. Before joining the university in 2007, Dr Wei received his PHD in Human Geography from Peking University in China in 2003 and then worked as a research assistant in Tsinghua University in China. His current research interests are in the areas of technological innovation management and industrial organization. He has co-authored 4 papers for International Conference Proceedings including Globalics (2004), International Association of Management of Technology (IAMOT, 2006), and International Symposium Management of Technology (ISMOT, 2007). He has also published one book, authored 10 book chapters and more than 30 journal articles in Chinese.

Sunanda Sangwan (PhD Rotterdam School of Management) is currently Associate Professor at Nanyang Business School in Singapore. She has earlier worked at Copenhagen Business School and the Erasmus University in the Netherlands. She has held visiting positions at the Trier University in Germany, the Imperial College in the UK and several other business schools in Central and Northern Europe. She has conducted training at MBA, EMBA level and executive development programs in Europe and Asia. She has published and made conference presentations in her research areas of Marketing and Information Systems at the local and international levels. She is on the editorial review board of International Journal of Electronic Commerce, Journal of Electronic Commerce, Journal of Management Information Systems, etc.

Sylvie Laforet is a Lecturer in Marketing at The University of Sheffield. She has researched and published in the areas of branding for more than a decade. She has worked on ESRC funded projects in innovation management in small and medium-sized enterprises and has published in this area. Recently, she has also researched in technology-based services. She has authored over 30 publications and has published in international journals. She has refereed journal articles, books, grants applications, has examined PhDs and has given talks on a number of issues in branding, packaging and consumer behavior at practitioners' conferences. She is a member of Academy of Marketing Science, British Academy of Management and Institute for Small Business & Entrepreneurship. She has taught marketing at undergraduate, postgraduate levels and has supervised at PhD level.

Tomas Eklund (D.Sc. econ & BA) is a researcher at the Institute for Advanced Management Systems Research (IAMSR) at Abo Akademi University, in Turku, Finland. He received his doctoral degree from the Department of Information Systems at Abo Akademi University in 2004, on the topic of using the self-organizing map for financial benchmarking. His primary research interests are in data mining, self-organizing maps, benchmarking and performance analysis, and text mining.

Varadharajan Sridhar is Professor in Information Management at the Management Development Institute, India. He received his Ph.D. from the University of Iowa, U.S.A. Dr. Sridhar's primary research interests are in the area of telecommunication management and policy and global software development. He has published his research work in European Journal of Operational Research, Telecommunication Systems, International Journal of Business Data Communications and Networking, Applied Econometrics and International Development, Journal of Regional Analysis and Policy, and Journal of Information System Security. He was the recipient of the Nokia Visiting Fellowship awarded by the Nokia Research Foundation. He is Associate Editor of International Journal of Business Data Communications and Networking and is on the editorial board of the Journal of Global Information Management.

Wensheng Wang, Chinese, In 1998 he was awarded DAAD scholarship for his PhD study in Bonn University, Germany, and obtained his PhD in agricultural economics in 2001. He is currently the deputy Director General of the Agricultural Information Institute of CAAS, Professor and PhD Supervisor, as well as Visiting Professor of Shandong University of Science and Technology. Since joining the Agricultural Information Institute of CAAS, he has led or jointly led more than 20 projects, including the national scientific and technological key project, namely the Research on China Rural Information Service Mode and Mechanism; and the National 863 Project, namely the Research on Networked Agricultural Remote Diagnosis Platform, and so on. He has published over 30 papers in journals and magazines home and abroad.

Xi Zhang is currently a PhD student in the USTC-CityU Joint Advanced Research Center (Suzhou), a collaborative scheme for PhD student supervision sponsored by University of Science and Technology of China and City University of Hong Kong. His research interests include software development management,

distributed work, and knowledge management in Chinese enterprises, with more than 10 publications in these areas.

Xianjun Li is an associate professor at Department of Automotive Engineering, Tsinghua University. Dr Li joined the department in 2004 after he worked as a research assistant at the University. His current research interests are in the areas of technological innovation management in automobile industry. He has presided several key projects in technological innovation management in this sector for governments and enterprises. Li has authored 5 papers for International Conference Proceedings such as International Symposium Management of Technology (ISMOT, 2002), Globalics (2004), and he also published 3 books and more than 30 journal articles in Chinese.

Xiao-Bo WU is Professor of Management, at School of Management, Zhejiang University, Hangzhou, China. His first degree is B. EE. After five years' work as an engineer in Beijing and Hangzhou, he went back to Zhejiang University, got the M.S. in Energy Economics, PhD in Technology Management. He was the Post-Doctorate at AIT, Bangkok, Thailand, visiting scholar at Cambridge University, Fulbright Scholar at Sloan School, MIT. His research interests include Innovation Management, Global Manufacturing and Strategic Management, Information Technology and Management Change. Now he is the vice dean of School of Management, and director of National Institute for Innovation Management.

Yen-Chun Jim Wu is Professor of Department of Business Management at National Sun Yat-Sen University, Taiwan. His papers have appeared in Sloan Management Review, IEEE Transactions on Engineering Management, International Journal of Operations & Production Management, International Journal of Supply Chain Management, Journal of the American Society for Information Science and Technology, International Journal of Physical Distribution & Logistics Management, International Journal of Logistics Management, European Journal of Operational Research, Transportation Research Part A, International Journal of Technology Management, and Journal of Enterprise Information Management. He is listed in Marquis "Who's Who in the World" and "Who's Who of Supply Chain in Asia". His research interests include supply chain management, technology management, and lean manufacturing. He holds a Ph.D. in Industrial & Operations Engineering from the University of Michigan, Ann Arbor, U.S.A.

Ying HOU is PhD. student in international relations at University of Macau, China. She obtained her undergraduate degree in French language and literature from Nanjing University, M.A. in international relations from Fudan University in 2001 and 2004. She has published the articles on international relations theory and Chinese President regime: "The Continental School in Theories of International Relations" (in Chinese), in *World Economics and International Politics*, No.276, August 2003, pp.26-31; and "Changing Diplomatic Functions of Chinese President", in Xiao Jialing, Tang Xianxing ed., *Diplomacy of The Great Powers: Theory, Decision-making and Challenge* (Shishi Press, Beijing, 2003), pp.417-440.

Yong Zhou is an Assistant Professor in the School of Software at Dalian University of Technology, China. He got his BSc degree from Chongqing University, China, in 1993 and MPhil degree from Gansu University of Technology, China, in

1996. Having worked in industry for eight years, he returned to Dalian University of Technology in 2004. His research interests include software process, quality-based software engineering and software architecture.

Yue "Jeff" Zhang is Associate Professor of Information Systems in the College of Business and Economics, California State University, Northridge. He received his Ph.D. in Business Administration from Oklahoma State University. His current research interests are electronic commerce, electronic government, information privacy, and virtual collaborations. He has published articles in refereed journals such as *Communications of the ACM*, *Journal of E-Commerce Research*, *Journal of Internet Commerce*, *MIS Review*, *Journal of International Technology and Information Management*, *Journal of Database Marketing*, and *International Journal of Services and Standards*, among others.

Yufan Hao is Professor of Political Sciences and Dean of Faculty of Social Sciences and Humanities at University of Macau. He obtained his MA and PhD from the Johns Hopkins University School of Advanced International Studies in 1984 and 1989. He has published widely on Chinese politics, Chinese foreign relations, U.S.-China relations, and American politics in such journals as *Asian Survey*, *Asian Perspective*, *Journal of Democracy*, *Journal of Contemporary China*, *American Studies Quarterly*, the *China Quarterly*, etc. His latest books include *Chinese Foreign Policy Making* (Social Science Academic Press, Beijing, 2007) and *Chinese Foreign Policy Making: Societal Forces in Chinese American Policy Making*, (Ashgate, London, co-edited, 2005)

Yuxin Wang is a senior lecturer in the Department of Computer Science and Engineering at Dalian University of Technology, China. He got his BSc degree and MPhil degree from Dalian University of Technology, China, in 1997 and 2001 respectively. His research interests include software engineering and software architecture.

ZHAO Jing-Yuan, Ph.D. in Management Science and Engineering, Chinese Academy of Sciences (CAS) and University Science and Technology of China, Post-doctor in Harbin Institute of Technology. Dr. ZHAO's expertise is in Regional Economy and Urban Management. She is the author of more than 40 articles and papers, and 2 monographs that focus on regional innovation management and policies, High-tech industry cluster, knowledge management, technology diffusion. She is the assistant dean of School of Management of Beijing Union University, the invited reviewer for the state newspaper *West Times* to provide economic strategies and policy analyses.

Zhenjiao Chen is currently a PhD student in the USTC-CityU Joint Advanced Research Center (Suzhou), a collaborative scheme for PhD student supervision sponsored by University of Science and Technology of China and City University of Hong Kong. Her research focuses on justice and conflict, harmony, cross-cultural psychology.

Zhiyang Lin is a professor in School of Management, Xiamen University, China. He received his Ph.D. in Business Administration from Xiamen University. His current research interests are organizational theory and marketing. He has published articles in top journals in China, such as *Economy and Management*,

China Industrial Economy, Journal of Xiamen University. Quan Lin is a Ph.D. student in School of Management, Xiamen University, China, and visiting scholar in School of Business, University of Washington. His current research interests are organizational theory, enterprise informatization strategy, electronic commerce, and electronic government. He has published articles in top journals in China, such as *Economy and Management* and *China Industrial Economy*.

Zhongyun Zhou is currently a PhD student in the USTC-CityU Joint Advanced Research Center (Suzhou), a collaborative scheme for PhD student supervision sponsored by University of Science and Technology of China and City University of Hong Kong. He serves now in the Knowledge and Innovation Management research group of the scheme. His current research interests include the adoption and utilization of new information technology (IT) applications, the roles and strategic value of IT for managing knowledge in distributed work groups.
