INDEX

0/1 constraints, 39

A

Anytime agorithm, 43, 45, 144, 29, 45, 137, 141
Approximate reasoning, 59, 146
Approximate relation, 121
Approximate relational algebra, 127, 129
Approximate relational model, 118, 120

B

Bounded tasks, 63
Breadth-first search, 59

C

Certain set, 120
Critical instant, 74
Critical region, 72
Critical section, 72

D

Deadline constraints, 35
Deadline
  hard, 64
  intermediate, 70
  soft, 150
Diagnosis servers, 92
Distributed real-time systems, 90
Distributed systems, 63

E

Earliest deadline first, 88
EDF, 88
See earliest deadline first
Epilogue task, 82

F

Fault-tolerant, 87-88, 90
Fixed priority pre-emptive scheduling, 65, 72

G

Greedy algorithm, 95, 113

I

Imprecise and approximate computation, xv
Imprecise computation time, 21
Imprecise computation, 1, 3, 25, 39, 63, 87, 113, 149
  unbounded, 65
Imprecise notice, 7, 20

M

Markov server, 2
Mean flow time, 38
Model-based diagnostic

reasoning, 58
Monotone algorithm, 118
Monotone approximate query processing, 129-130
Mutual exclusion, 68, 79

P

Parallelizable, 90
PDSA, 88
See priority-driven scheduling algorithms
PMA, 137
See possible models approach
operator, 138
update, 137, 139
Possible models approach, 137
Possible set, 120
Precise computation time, 21
Preemptive priority-based, 77, 83
Preemptive scheduling, 36
Priority assignment, 74
Priority inversion, 75
Priority-driven scheduling algorithms, 88
Processor utilization, 88
Prologue task, 82

R

Rate montonic algorithm, 88
Real-time
soft, 2, 65
hard, 64-65
Real-time applications, 63
Real-time environments, 43
Real-time process, 66
Real-time scheduling, 23
Real-time services, 64
Real-time systems, 63
Real-time tasks, 71
Release time, 36, 82
Replicated hard real-time systems, 113
Replicated periodic tasks, 87
Reasoning
task-oriented, 161
temporal, 136
Resource-bounded computing, 150
Resource allocation, 69, 152
decision, 155
protocol, 75
scheme, 75
strategy, 159
Resource availability, 160
Resource constraints, 149
Resource usage, 154
Resource-bounded problem solving, 154
Resource-bounded reasoning, 154
RM, 88
See rate montonic algorithm

S

Schedulability analysis, 64, 70
Schedulability test, 63
Schedulability threshold, 88, 94, 97
Sieve function, 63, 66
Sieve Function, 68
Sieve function, 82
Slack time, 73
Soft real-time, 2, 65
Sporadic processes, 77
Sporadic tasks, 72
Standard relational algebra, 117
Subjunctive reasoning, 143

T

Task allocation, 90, 94
  imprecise, 89
  feasible, 94
  infeasible, 108
Time constraint, 2, 48, 66
Timing
  behavior, 13
  faults, 87
  granularity, 159
  requirements, 150
Total weighted utilization, 89
Transient overload, 1

U

Unbounded tasks, 65
