Systems & Control: Foundations & Applications

Aims and Scope

The aim of this series is to publish top quality state-of-the-art books and research monographs at the graduate and post-graduate levels in systems, control, and related fields. Both foundations and applications will be covered, with the latter spanning the gamut of areas from information technology (particularly communication networks) to biotechnology (particularly mathematical biology) and economics.

Readership

The books in this series are intended primarily for mathematically oriented engineers, scientists, and economists at the graduate and post-graduate levels.

Types of Books

Advanced books, graduate-level textbooks, and research monographs on current and emerging topics in systems, control and related fields.

Preparation of manuscripts is preferable in \LaTeX. The publisher will supply a macro package and examples of implementation for all types of manuscripts.

Proposals should be sent directly to the editor or to:
Birkhäuser Boston, 675 Massachusetts Avenue, Cambridge, MA 02139, U.S.A.
or to Birkhäuser Publishers, 40-44 Viadukstrasse, CH-4051 Basel, Switzerland

A Partial Listing of Books Published in the Series

Representation and Control of Infinite Dimensional Systems, Vol. I
A. Bensoussan, G. Da Prato, M. C. Delfour, and S. K. Mitter

Representation and Control of Infinite Dimensional Systems, Vol. II
A. Bensoussan, G. Da Prato, M. C. Delfour, and S. K. Mitter

Mathematical Control Theory: An Introduction
Jerzy Zabczyk
H$_\infty$-Control for Distributed Parameter Systems: A State-Space Approach
*Bert van Keulen*

Disease Dynamics
*Alexander Asachenkov, Guri Marchuk, Ronald Mohler, and Serge Zuev*

Theory of Chattering Control with Applications to Astronautics, Robotics, Economics, and Engineering
*Mikhail I. Zelikin and Vladimir F. Borisov*

Modeling, Analysis and Control of Dynamic Elastic Multi-Link Structures
*J. E. Lagnese, Günter Leugering, and E. J. P. G. Schmidt*

First-Order Representations of Linear Systems
*Margreet Kuijper*

Hierarchical Decision Making in Stochastic Manufacturing Systems
*Suresh P. Sethi and Qing Zhang*

Optimal Control Theory for Infinite Dimensional Systems
*Xunjing Li and Jiongmin Yong*

Generalized Solutions of First-Order PDEs: The Dynamical Optimization Perspective
*Andrei I. Subbotin*

Finite Horizon $H_\infty$ and Related Control Problems
*M. B. Subrahmanyam*

Control Under Lack of Information
*A. N. Krasovskii and N. N. Krasovskii*

H$^\infty$-Optimal Control and Related Minimax Design Problems: A Dynamic Game Approach
*Tamer Başar and Pierre Bernhard*

Control of Uncertain Sampled-Data Systems
*Geir E. Dullerud*

Robust Nonlinear Control Design: State-Space and Lyapunov Techniques
*Randy A. Freeman and Petar V. Kokotović*

Adaptive Systems: An Introduction
*Iven Mareels and Jan Willem Polderman*

Sampling in Digital Signal Processing and Control
*Arie Feuer and Graham C. Goodwin*
Ellipsoidal Calculus for Estimation and Control
Alexander Kurzhanski and István Vályi

Minimum Entropy Control for Time-Varying Systems
Marc A. Peters and Pablo A. Iglesias

Chain-Scattering Approach to $H^\infty$-Control
Hidenori Kimura

Output Regulation of Uncertain Nonlinear Systems
Christopher I. Byrnes, Francesco Delli Priscoli, and Alberto Isidori

High Performance Control
Teng-Tiow Tay, Iven Mareels, and John B. Moore

Optimal Control and Viscosity Solutions of Hamilton–Jacobi–Bellman Equations
Martino Bardi and Italo Capuzzo-Dolcetta

Stochastic Analysis, Control, Optimization and Applications: A Volume in Honor of W.H. Fleming
William M. McEneaney, G. George Yin, and Qing Zhang, Editors

Mutational and Morphological Analysis: Tools for Shape Evolution and Morphogenesis
Jean-Pierre Aubin

Stabilization of Linear Systems
Vasile Dragan and Aristide Halanay

The Dynamics of Control
Fritz Colonius and Wolfgang Kliemann

Optimal Control
Richard Vinter

Advances in Mathematical Systems Theory: A Volume in Honor of Diederich Hinrichsen
Fritz Colonius, Uwe Helmke, Dieter Prätzel-Wolters, and Fabian Wirth, Editors

Nonlinear and Robust Control of PDE Systems: Methods and Applications to Transport-Reaction Processes
Panagiotis D. Christofides

Foundations of Deterministic and Stochastic Control
Jon H. Davis

Partially Observable Linear Systems Under Dependent Noises
Agamirza E. Bashirov

Switching in Systems and Control
Daniel Liberzon
Matrix Riccati Equations in Control and Systems Theory  
*Hisham Abou-Kandil, Gerhard Freiling, Vlad Ionescu, and Gerhard Jank*

The Mathematics of Internet Congestion Control  
*Rayadurgam Srikant*

$H^\infty$ Engineering and Amplifier Optimization  
*Jeffery C. Allen*

Advances in Control, Communication Networks, and Transportation Systems:  
In Honor of Pravin Varaiya  
*Eyad H. Abed*

Convex Functional Analysis  
*Andrew J. Kurdila and Michael Zabarankin*

Max-Plus Methods for Nonlinear Control and Estimation  
*William M. McEneaney*

Uniform Output Regulation of Nonlinear Systems: A Convergent Dynamics Approach  
*Alexey Pavlov, Nathan van de Wouw, and Henk Nijmeijer*

Filtering Theory: With Applications to Fault Detection and Isolation  
*Ali Saberi, Anton A. Stoorvogel, and Peddapullaiah Sannuti*

Representation and Control of Infinite-Dimensional Systems, Second Edition  
*Alain Bensoussan, Giuseppe Da Prato, Michel C. Delfour, and Sanjoy K. Mitter*

Set-Theoretic Methods in Control  
*Franco Blanchini and Stefano Miani*

Stability of Dynamical Systems: Continuous, Discontinuous, and Discrete Systems  
*Anthony N. Michel, Ling Hou, and Derong Liu*

Control of Turbulent and Magnetohydrodynamic Channel Flows: Boundary Stabilization and State Estimation  
*Rafael Vazquez and Miroslav Krstic*

*Chang-Hee Won, Cheryl B. Schrader, and Anthony N. Michel*

Numerical Methods for Controlled Stochastic Delay Systems  
*Harold J. Kushner*
