Margaret S. Archer took her first degree and PhD from the London School of Economics and was a post-doc. at the Ecole Pratique des Hautes Études in Paris while also working with Pierre Bourdieu’s équipe. She is now professor in Social Theory at Ecole Polytechnique Fédérale de Lausanne and Directrice of its Centre d’Ontologie Sociale (see http://cdh.epfl.ch/ontology). She was professor of Sociology at the University of Warwick from 1979 until 2010 where she wrote over 20 books including The Reflexive Imperative in Late Modernity (2012), Making our Way through the World: Human Reflexivity and Social Mobility (2007), Structure, Agency and the Internal Conversation (2003), Being Human: The Problem of Agency (2000), and Realist Social Theory: The Morphogenetic Approach (1995). Her first book was Social Origins of Educational Systems (about to be re-printed [1979]), where she first developed and used her “Morphogenetic Approach.” She was president of the International Sociological Association (1986–1990), is a founder member of the Pontifical Academy of Social Sciences (1994–), and a trustee of the Centre for Critical Realism.

Nick Crossley is professor of Sociology and cofounder/director of the Mitchell Centre for Social Network Analysis at the University of Manchester, UK. His first major foray into relational sociology was his 1996 book Intersubjectivity. This was followed more recently by Towards Relational Sociology (2011). He has just finished a book for Manchester University Press titled, Networks of Sound, Style and Subversion: the Punk and Post-Punk Worlds of Liverpool, London, Manchester and Sheffield, 1975–1980.

François Dépelteau is associate professor of Sociology at Laurentian University, Canada. He has published on themes including social theory, environmental issues, social movements, and research methods.
He recently coedited two books with Tatiana Savoia Landini on Norbert Elias: *Norbert Elias and Social Theory* (2013) and *Norbert Elias and Empirical Research* (which will be published in Fall 2014). He is co-editor, with Christopher Powell, of two other books on relational sociology: *Conceptualizing Relational Sociology* (2013) and *Applying Relational Sociology* (2013). He is currently working on the development of a “deep” relational sociology inspired by the pragmatic philosophy of John Dewey and other compatible approaches.

**Mustafa Emirbayer** is professor of Sociology at the University of Wisconsin at Madison. He is the author of numerous articles on social theory, civil society and democracy, and race in America, among other topics. Recent publications include “Tilly and Bourdieu” (*American Sociologist*, 2010), “Dewey and Bourdieu on Democracy” (coauthored with Erik Schneiderhan; *Bourdieu and Historical Analysis*, edited by Philip Gorski, 2013), and *The Racial Order* (coauthored with Matthew Desmond; forthcoming).

**Kenneth Fish** is assistant professor of Sociology at the University of Winnipeg where he teaches courses in sociological theory and political economy. His current research is focused on grounding a critique of neoliberalism in the social and technological differences between human and nonhuman animals. He is the author of *Living Factories: Biotechnology and the Unique Nature of Capitalism* (2013).

**Debbie Kasper** is a sociologist in the interdisciplinary Environmental Studies Department at Hiram College in Northeastern Ohio. There, she teaches and practices sociological theory and environmental sociology, among many other things. Her teaching and scholarship generally aim to foster the development of a clearer sense of humans’ place in the world and the consequences of how people understand that. She is particularly interested in community formation and maintenance and in the development of “normal”—especially the perceptions and practices that characterize everyday life, their environmental impacts, and the processes by which they change.

**Craig McFarlane** teaches sociology and legal studies at Carleton University in Ottawa. He is about to complete his dissertation titled “Early Modern Speculative Anthropology,” which studies the concept of the human in seventeenth century social theory. He is currently pursuing two research projects. The first is a sociology of the animal welfare regime in Ontario, Canada and the other seeks to reconcile actor-network theory and critical realism. He has recently completed
Christopher Powell is assistant professor in the Department of Sociology at Ryerson University in Toronto. His work examines the interplay of difference and violence in contemporary societies. To this end he has examined genocide in several articles and book chapters and in his book Barbaric Civilization: A Critical Sociology of Genocide (2011), which argues that the expansion of Western civilization produces genocides as a systematic byproduct. His next project, provisionally titled Playing Nice: Hazards and Successes of Direct Democracy in Practice, examines how difference is resolved (or not) in forms of social organizing, ranging from workers’ co-operatives and participatory budgets to Occupy and the Maple Spring, which aim at direct democracy and a minimum of hierarchy.

Sarah Redshaw is currently a research fellow in Sociology at Macquarie University, New South Wales. She has had a number of successful research projects including as an Australian Research Council funded postdoctoral research fellow on the project Transforming Drivers, a partnership with the National Roads and Motorists Association. Her book In the Company of Cars: Driving as a Social and Cultural Practice (2008) and numerous journal articles resulted from this research. She was then senior researcher with the Kid’s Research Institute where she managed and produced publications on projects such as Heart Beads on parents’ and children’s narratives after cardiac surgery. Other projects she has managed include Bereavement Support in Community Nursing. She has maintained an interest in relational perspectives from her initial PhD work on Spinoza, “Spinoza and an Ethics of Expression,” completed in 2003.

Christopher Thorpe is lecturer in Sociology at the Robert Gordon University, Aberdeen. He writes in the areas of social theory, cultural sociology, and reflexive sociology. Empirically, he has a very keen interest in the history of Anglo-Italian cultural interchange and has also written in this area. He is coeditor of the journal Cultural Sociology and coauthor of a social theory textbook with David Inglis entitled An Invitation to Social Theory (2012).

Charalambos Tsekeris graduated with Distinction from the Department of Human Sciences at Brunel University (West London, UK) and earned his doctoral degree in Reflexivity from the Department
of Sociology at Panteion University of Social and Political Sciences (Athens, Greece). He is visitor at the Hellenic Naval Staff and Command College and senior researcher at the Laboratory of Virtual Reality, Internet Research & E-Learning (Department of Psychology, Panteion University). He has taught at the University of Piraeus and the National and Kapodistrian University of Athens, and given numerous invited lectures and papers in scientific meetings and conferences. His current research interests involve relational approaches in the social science, reflexivity and the self, methodology and meta-theory, social epistemology and psychosocial studies, theoretical and philosophical psychology, chaos theory, and the social dynamics of Web 2.0, human complex systems, and social networks.
