

Photo Credits

Photo credits are listed in parentheses. All other photos are by the author.

- 2.1. Reptilian portion of the brain.
 - 2.2. Cerebral cortex.
 - 2.3. Blind spot test.
 - 2.4. Closure.
 - 2.5. Chalice and faces.
-
- 3.1. Cerebral hemispheres.
 - 3.2. Corpus callosum.
 - 3.3. Self as content.
 - 3.4. Self as context.
-
- 5.1. What the Hubble Space Telescope saw when it looked at a tiny area of one of the darkest patches of the sky. Almost every spot is a galaxy (Robert Williams and the Hubble Deep Field Team [STScI] and NASA).
 - 5.2. Neptune (Voyager 2/JPL/CalTech/NASA).

- 5.3. Spiral galaxy NGC 4414 (Hubble Heritage Team/AURA/STScI/NASA).
 - 5.4. Comet Halley (W. Liller, Easter Island, International Halley Watch Large Scale Phenomena Network/NASA).
 - 5.5. Earth as seen by the Apollo 17 crew (NASA).
 - 5.6. Sun (NASA/SOHO/NSSDC).
 - 5.7. Sleeping and dreaming.
-
- 6.1. The faces of Brahma.
 - 6.2. Shiva the Destroyer.
 - 6.3. Siddhartha Gautama, the historical Buddha.
 - 6.4. Bodhi tree in Bodhgaya, India, where the Buddha sat.
 - 6.5. Yin and Yang.
 - 6.6. Bodhidharma.
 - 6.7. Zen teacher's stick.
-
- 8.1. Taizokai Mandala.
 - 8.2. Kongokai Mandala.
