

List of figures

- Figure 1 Huygens: sketch of 6 August 1679
- Figure 2 Spherical aberration
- Figure 3 Cartesian oval.
- Figure 4 Huygens: focal distance of a bi-convex lens
- Figure 5 Huygens: punctum concursus
- Figure 6 Huygens: refraction at the anterior side of a bi-convex lens
- Figure 7 Huygens: refraction at the posterior side of a bi-convex lens.
- Figure 8 Huygens: focal distance of a bi-convex lens
- Figure 9 Huygens: extended image.
- Figure 10 Huygens: magnification by a convex lens.
- Figure 11 Huygens: four of the cases of magnification by telescopes.
- Figure 12 Huygens: analysis of Keplerian telescope with erector lens.
- Figure 13 Diagram for Keplerian telescope with erector lens.
- Figure 14 Kepler's solution to the pinhole problem
- Figure 15 Kepler: focal distance of a plano-convex lens
- Figure 16 Kepler: image formation by a lens
- Figure 17 Della Porta: image of a near object
- Figure 18 Della Porta: image of distant object
- Figure 19 Della Porta: image by a telescope
- Figure 20 Barrow's analysis of image formation in refraction.
- Figure 21 Huygens: observations of Saturn with the 12- and a 23-foot telescope.
- Figure 22 Huygens: beam to facilitate lens grinding.
- Figure 23 Daza's scale
- Figure 24 Huygens' eyepiece.
- Figure 25 Diagram for Huygens' eyepiece.
- Figure 26 Huygens: spherical aberration of a plano-convex lens.
- Figure 27 Huygens: spherical aberration of a bi-convex lens
- Figure 28 Hudde's calculation of spherical aberration
- Figure 29 Huygens: Galilean configuration in which spherical aberration is neutralized.
- Figure 30 Huygens: 'Circle' of aberration.
- Figure 31 Huygens: Aberration produced by a Keplerian configuration.
- Figure 32 Rendering of Huygens' sketch of chromatic aberration.
- Figure 33 Huygens' invention of 1669
- Figure 34 Huygens' crossed out EUREKA.
- Figure 35 Newton's determination of chromatic aberration.
- Figure 36 The first stage of Kepler's attack of refraction.
- Figure 37 The final stage of Kepler's analysis of refraction
- Figure 38 Harriot's measurements.
- Figure 39 Mydorge's rule
- Figure 40 Descartes' analysis of refraction
- Figure 41 Descartes' analysis of reflection
- Figure 42 Barrow's explanation of reflection.
- Figure 43 Barrow's explanation of refraction.
- Figure 44 Huygens: sketch of refracted rays in Iceland crystal.
- Figure 45 Huygens: a refracted perpendicular caused by the composition of the crystal.
- Figure 46 Huygens: waves through Iceland crystal.
- Figure 47 Huygens: shape and main angles of the crystal.
- Figure 48 Bartholinus: double refraction.
- Figure 49 Bartholinus: refraction in two positions of the crystal.
- Figure 50 Bartholinus' law of strange refraction.
- Figure 51 Huygens: rays in the principal section.
- Figure 52 Huygens: construction for strangely refracted rays in the principal section

- Figure 53 Diagram of Huygens' construction for strange refraction.
Figure 54 Huygens' alternative for Bartholinus' law.
Figure 55 Huygens: description of polarization.
Figure 56 Ango's explanation of refraction.
Figure 57 The sine law in *Tractatus*.
Figure 58 Huygens' principle.
Figure 59 Huygens: two rays refracted by a plane surface.
Figure 60 Huygens: wave refracted by a plane surface forming a caustic.
Figure 61 Huygens: wave refracted at the plane surface of a glass medium.
Figure 62 Huygens: "Causam mirae refractionis in Crystallo Islandica".
Figure 63 Huygens: strange refraction of an arbitrary ray.
Figure 64 Huygens: waves around a source of light
Figure 65 Huygens' principle.
Figure 66 Huygens' explanation of refraction.
Figure 67 Huygens: refraction of the perpendicular.
Figure 68 Huygens: orientation of spheroid in the crystal.
Figure 69 Huygens: shape of the spheroidal wave.
Figure 70 Construction of the refraction of an arbitrary ray in *Traité de la Lumière*.
Figure 71 Hobbes' rays.
Figure 72 Hobbes: refraction.
Figure 73 Hobbes' derivation of the sine law.
Figure 74 Refraction in *Principia*.
Figure 75 The sine law in *Opticks*.
Figure 76 Huygens: new measurement of strange refraction.
Figure 77 Huygens' EUPHKA of August 1679.
Figure 78 Huygens: chromatic aberration of lenses.

Bibliography

References are made by author and short title. References to the twenty-two volumes of the *Oeuvres Complètes* are given by *OC* followed by the volume and page numbers, as in *OC10*, 153. References to the manuscripts, all of which belong to the collection *Codices Hugeniorum* housed at the University of Leiden, are given by manuscript number and folio, as in *Hug2*, 45v. Huygens is left out as author.

I do not explicitly refer to all seventeenth-century works listed in the bibliography, but I have drawn upon these in general conclusions regarding optics in the seventeenth century.

- Acloque, Paul. "L'oculaire de Huygens, son invention et sa place dans l'instrumentation" In *Huygens et la France, Pais, 27-29 mars 1979: table ronde du Centre national de la recherche scientifique*, pp. 177-186. Paris: Vrin, 1981
