# SUBJECT INDEX

## A

- asymptotic distribution
  - sample correlation matrix 289–292
  - sample dispersion matrix 285–287
  - sample mean 285
  - eigenprojectors
    - correlation matrix 309
    - dispersion matrix 309
    - symmetric matrix 305–308
  - eigenvalues
    - correlation matrix 303–305
    - dispersion matrix 299–302
    - symmetric matrix 297, 298
  - eigenvectors
    - correlation matrix 303–305
    - dispersion matrix 299–302
    - symmetric matrix 297, 298
  - Hotelling  $T^2$  312–314
  - MANOVA matrix 309–311

asymptotic normality 283

## B

bound

- lower 21
- greatest 21
- upper 21
- least 21

## C

- characteristic function
  - elliptical distribution 224
  - matrix elliptical distribution 232
  - patterned matrix 174
  - random
    - matrix 174
    - symmetric matrix 174
    - variable 172
    - vector 174
  - spherical distribution 222
  - Wishart distribution 244

cofactor 7

complement, Schur 74

convergence

- in distribution 277, 278
- in probability 278
- weak 277, 278

covariance

- matrix, see dispersion matrix
- of matrices 179

cumulant function

- of matrix 175
- of patterned matrix 175
- of vector 175

cumulant of random

- matrix 182
- patterned matrix 183
- vector 181, 182

cumulants

- correlation matrix 348
- elliptical distribution 228
- matrix elliptical distribution 235, 236
- matrix normal distribution 207
- minimal, of matrix 185
- minimal, of vector 185
- Wishart distribution 266, 267

## D

decomposition

- Bartlett 240
- Cholesky 12
- spectral 57

density function

- beta distribution 248
- centered Wishart 273
- elliptical 231
- inverted Wishart 246
- matrix elliptical 234
- matrix normal 193
- multivariate normal 192

- multivariate beta type I 248, 249
- multivariate beta type II 250
- Wishart 245
- density expansion
  - differentdimensional 329–333
  - differentdimensional normal 335–339
  - differentdimensional Wishart 341–344
  - matrix, formal 321
  - Edgeworth type 321–323
  - Wishart 323–327
  - multivariate, formal 320
  - Edgeworth type 321
  - of correlation matrix 350–353
  - of noncentral Wishart 326, 327
  - of sample dispersion matrix 324
- derivative
  - of centered Wishart density 273, 274
  - Fréchet 122
  - matrix 127
  - higher order 137
  - tables of properties 148, 149
  - minimal 146
  - patterned matrix 135
  - higher order 139
  - of Wishart density 270, 271
- determinant 7
  - partitioned matrix 74
- diag 6
- diagonalization of matrix 6
- differential, Fréchet 122
- dispersion matrix 173, 176
  - sample 284
- distribution
  - Dirichlet 223
  - centered Wishart 273
  - elliptical 224
  - inverted Wishart 246, 256
  - matrix
    - elliptical 232
    - normal 192, 193
    - spherical 232
  - multivariate
    - beta type I 249
    - beta type II 250
    - normal 192
    - $t$  222
    - normal 191
    - multilinear 215, 216
    - $\varepsilon$ -contaminated 221
    - spherical 221, 222
    - Wishart 237
      - central 237
      - noncentral 237
- E**
- eigenprojector 56
- eigenspace 56
- eigenvalue 52
  - of symmetric matrix 64
  - properties 52, 53
- eigenvector 52
  - standardized 52
  - of symmetric matrix 54, 64
- elliptical distribution
  - matrix 232
  - characteristic function 232
  - cumulants 235, 236
  - density function 234
  - central moments 235
  - moments 234, 235
  - multivariate 224
    - characteristic function 224
    - cumulants 228
    - density function 231
    - central moments 226
    - moments 228
- equation
  - characteristic 51
  - consistent 15
  - Hamel 225
- F**
- factorization of matrix
  - eigenvalue-based 64–71
  - Jordan 71
  - Schur 70
- G**
- g-inverse, see inverse
- growth curve model 356
  - parameters 356
    - maximum likelihood estimators 358–366
  - with singular dispersion matrix 366–372

- with rank restriction 372
- extended 374
- moments of  $\widehat{\mathbf{B}}$  411
- moments of  $\widehat{\Sigma}$  417, 418
- bias correction of  $\widehat{\Sigma}$  425, 426
- density approximation of  $\widehat{\mathbf{B}}$  450–457
- density approximation of  $\widehat{\Sigma}$  457–460
- H**
- Hermite polynomial
  - multivariate 211–213
  - univariate 210
- I**
- independence, linear, of vectors 8
- integral, Aitken 11
- integration by parts 152–155
- inverse
  - generalized 15
  - Moore-Penrose 17
  - reflexive 17
  - matrix 8
  - of partitioned matrix 74, 75
- J**
- Jacobian 156
  - matrix 156
  - of composite function 156
- K**
- kurtosis, elliptical distribution 229
- L**
- lattice 21
  - Dedekind 20
  - modular of subspaces 23
  - orthomodular of subspaces 28
    - law, orthomodular 28
    - law, symmetry of commutativity 28
  - subspaces 22
    - identities, modular 23
    - identities, shearing 23
    - law, cancellation 25
    - law, median 25
