Subject Index

A

- Academia
 - has narrowed the scope of expertise in education, 79
- Academic disciplines
 - seem decoupled from life, 37
- Academic material
 - large quantities presented each day, 58
- Achievement scores
 - as the product of schooling inadequate indicator of learning, 42
- Achievement tests
 - employed without knowing their relevance to classroom teaching for standardized evaluation, 73
- Administrators
 - as solo decision makers, 6, 24
- Affective bonds
 - between students, 28
 - between teachers, 28
- Alienation
 - in high schools, 31
- Allocation, 10, 18, 64, 81
- Alternative
 - assessment, 21, 78–80, 82–84
 - instructional methods, 7, 9, 16, 26, 52, 69, 73, 80, 82
 - schedule, 70–71
 - schedules involve reduction in number of classes, 74
 - schedules provide for extended duration of classes, 69
- Alternative assessment(s)
 - aims to motivate students to take responsibility for their learning, 80
 - decision making methods designed to foster productive learning, 80
 - entails judgments of peers, 82
 - examples of inherited some features of public performance from the arts, 84
 - involve teachers in collaborative, 83
 - refers to methods other than tests, 80
 - required professional sophistication, 80
 - teachers lack skills for, 82
- “Ancient history”
 - often cited to indicate irrelevance, 59
- Anonymity in schools
 - eliminated by small groups, 89
 - of the modern metropolis, 31
 - of teachers and students, 31, 89
- Apathy
 - of students due to irrelevant subject matter, 6
- Architecture
 - accommodates traditional school organization, 21
- Assessment
 - alternative, 21, 78–80, 82–84
 - as basis for planning new programs, 77
 - is the cart not the horse?, 43, 58
 - formative, 43, 79–82
 - in groups, 82
 - how to encourage learning, 79
 - need for documentation, 80
 - primarily serves teachers’, 84
 - role of, 77
 - of school processes, 14
 - self-supposedly stimulates adoption of effective teaching methods, 80
 - summative, 80–82
 - will not guide teachers on, 79–80
 - as a way to improve Education, 43, 78
- Atmosphere
 - of inquiry, not of centralized control, 86
- Atomization
 - organizational and intellectual, 20
- Autonomy
 - student, 44–45

B

- Balkanization
 - of subjects, disciplines, 19
- Basic knowledge
 - available today was unknown until recently, 71
 - is a valid notion in some subjects, antiquated in others?, 71
- Behavioral regularities
 - as habitual behavior, 29
- Belonging
 - sense of, 22, 28, 32, 45
- Block scheduling
 - entails 4 courses per day, 71–72
 - gets negative reactions when teachers are unprepared for their new role, 74
 - has class duration of 90 minutes, 71, 72
 - have several variations, 70
 - program lasts for one semester, 70, 71
 - still organizationally mechanistic teachers lecture as if nothing happened, 75
- Books on assessment
 - focus on student learning, 79
 - generally omit dealing with the process of teaching, 79
- Bored, Boredom
 - versus engagement, 19
- Budget increase
 - not required by community centered study projects, 39
- Bureaucracy, Bureaucracies
 - as a method of organization, 12
 - stresses uniformity in procedures, 82
 - as a theory, 11, 85
- Bureaucratic relationships
 - prevail in large schools, 54, 87

C

- Categories
 - aged-based, 87
 - such as 9th, 10th or 11th grade Biology, History, etc., 87
- Central Office authorities, 22, 74
- Centralized control
 - for maximum predictability, 86
- Challenge for schools
 - to create conditions for meaningful learning, 20
- Change, changes
 - in behavior to achieve, 25
 - in class size, 53
 - discouraged by one-by-one syndrome, 53
 - educational goals, 53

- and improved test scores, 20
- incremental, 10
- and lack of policy coherence, 15, 16
- require time plans in light of ongoing needs, 71, 88
- in schedules require other changes as well, 67
- and school principals, 36
- in size alone does not affect teaching method, 52
- some principles of, 21
- teaching to group-centered methods, 67
- Cheating students
 - if the entire curriculum is not taught, 45
- Citizen groups
 - could back away from change in class size, 53
- Civilization
 - transmission of knowledge an essential component of, 59
- Class, classes, classroom
 - can be sub-divided, 87
 - change in size of, 53
 - constitution, 34
 - not democratic, 35
 - dropped from 6 or 7 per day to four in block scheduled classes, 74
 - as a miniature society, 35
 - and the 50-minute hour, 68–70
 - number per day not based on students' ability to concentrate, 69
 - schedule can be adjusted very week sessions, 71, 72
 - as semi-democratic, 35
 - as separate dominion, 16
 - six sessions per day, on average, 68
 - size small space for, 53
 - theory of class size, 49–50
- Class size
 - as co-variate with instructional methods, 51, 53
 - improve teacher-student relations, 41, 74
 - as inhibitor of instructional innovation, 52, 53
 - an interactive undertaking, 44
 - together with schedule reform, 72–74
- Collections
 - not systems, 12, 86–88
- Collective thinking
 - does not encourage dialogue, 32
 - support for change, 22
 - in teams, 22
- Comments
 - offered by peers, 82

- Committees
 - the brunt of jokes, 23
- Community, communities
 - are systems due to their, 28, 82, 85
 - inter-connectedness, 85
 - is a system by virtue of its
 - interconnectedness, 85
 - networks with the, 36
 - of practice possesses breadth of resources
 - for learning, 38
 - school, 27–40, 85
 - schools part of, 36–40
 - sense of...in large schools, 54
 - sense of...in the school, 26, 27, 36
 - as a site for learning cares for its members, 36–40
 - support human contact, 30
 - teachers are primary residents
 - of school, 27
- Competition
 - intrusive, 24
- Components
 - can be combined, 87
 - don't make a cake without being mixed
 - of a school, 87
- Concentration on studies
 - limited by prolonged listening and boredom, 68
- Conceptions of learning
 - affected by manner of teaching, 44
 - qualitative understanding, 43
 - quantitative or reproductive, 43
 - as not occurring *outside*
 - schools, 37
 - as occurring *inside* schools, 37
 - students', 43–44
- Conclusions from research
 - on effects of class size, 49
- Conditions for learning
 - so students gain appreciation of subject matter relevance, 59
- Consultants
 - needed to assist teachers, 64, 67
- Contrived cooperation
 - is utopian, 22, 23
 - pejorative term, 24
- Cooperation, collaboration
 - among teachers, 22
 - contrived, 22–24
- Cooperative learning
 - basic concepts derive from systems theory, 88, 89
 - classes could achieve more than large
 - or small traditional ones, 24
 - could eliminate achievement difference
 - between small and large classes, 51
 - elements of, 68
 - engenders increased engagement, 78
 - methods, 51, 67, 69, 88, 89
 - multi-lateral communication in, 88
 - not enough time for, 67
 - research on, 89
 - students' identification with one another
 - in, 88
- Cooperative planning
 - by teachers, 21
- Cooperative staff work
 - prerequisite for using cooperative learning
 - with students, 90
- Cooperative teams, groups
 - go through phases of input, throughput and output, 89
- Copernican plan
 - classes were 110 or 226 minutes per
 - day, 72
 - for scheduling classes, 70, 72
 - is revolutionary, 72
 - reduced subjects studied per day to one
 - or two, 70, 72
- Cost
 - of large school exorbitant, 54
- Cost-effectiveness
 - not supported for large schools, 54
- Council of representatives
 - of "houses" can discuss common
 - problems, 54
- Criteria
 - by students for evaluation, 82
- Criterion
 - for school effectiveness, 41
- Criticism
 - excessive, 82
- Curricular, curriculum integration
 - can be accomplished with
 - formulates problems from different
 - domains, 61, 62, 64, 70
 - help of consultants, 45, 57
 - identified 4 knowledge domains, 61
- Curriculum
 - adaptations, 63
 - based on values not on popular
 - appeal, 60
 - consultants decide on study
 - contents, 45
 - to meet students' needs, 54
 - provided by school insufficient, 63
 - provided by schools needs, 63
 - required of students, 61

D

- Decision making
 - about curriculum, 60
- Density
 - definition of, 48
 - a function of, 48
- Departments
 - multi-disciplinary, 20
 - separation of disciplines into, 38, 58
 - uni-disciplinary, 12
- Design
 - of curriculum, 19, 59, 63
 - of the process of learning, 6, 43, 59
 - of schools, 21, 30, 35, 71
- Dichotomous thinking about curriculum
 - must not replace professional judgment, 63
- Discipline, disciplines
 - academic, 15, 19, 28, 34–35, 57
 - fusion of related, 57–58, 64
 - hardly discernible outside schools, 38
 - lack of interaction between, 16
 - oriented, 19–22
 - related, 15, 57, 61
- Direct instruction, 4, 15, 89
- Disciplinary
 - and integrated curriculum not mutually exclusive, 60, 63
 - inter-isolation (i.e. teaching English, Chemistry etc.) pervades education, 79
 - multi-specialization is premature for secondary students, 70
 - uni-, 12, 57
- Discipline
 - through rules and regulations, 34
- Disengagement
 - consistent with imposed learning tasks, 45
- Distraction
 - engagement or enthusiasm decreases, 48
 - more salient in large classes, 88
- Distinctive processes
 - of systems should be evident at every level, 89
- Dividing schools into “houses”
 - superior to maintaining large schools, 54
- Dramatic presentations
 - by teachers, 49, 83

E

- Economic dilemmas
 - regarding class size, 52
- Education
 - all knowledge is relative, 60
 - confronts insoluble dilemma if, 60

- individualistic/deterministic approach to, 44
- is life itself not preparation for life, 37
- and prediction, 14
- and students’ careers, 38
- student’s competition, 32
- of teachers, 79, 90
- Educational measurement
 - evaluates results of previous events, 79
- Educational reform
 - requires attention to implementation, 64
- Elementary schools
 - and educational research, 50
- Engagement, engaged
 - affected by environmental factors, 43
 - critical criterion for school effectiveness, 41
 - definition of, 42
 - effects of...in first year of school, 42
 - emotional, 20, 24, 41
 - has positive effect on achievement, 42, 48
 - linked to student selection of study topics, 44
 - mutual, 27, 28
 - personal, 20, 41
 - and a personal connection with the teacher, 41
 - student, 3, 18, 20, 26, 41–45, 68
 - students can maintain learning for many hours, 68
 - students’ conception of learning, 43–44
- Enrollment
 - increased five times from 1940 to 1990, 54
- Environmental approach
 - to education, 30
- Evaluation
 - can be mechanistic, 77
- Experimental research
 - is very limited in education, 79, 89
- Extended classroom sessions
 - allow teachers to cultivate better relationships with students, 73
 - allowed teachers to use cooperative learning, 73
- Extensive transmission of knowledge
 - not realistic anymore, 59
- Extensive versus intensive
 - argument should be discarded, 72
 - knowledge 72

F

- Face-to-face interactions
 - limited in large schools, 54
- Fifty-minute hour
 - exerts negative impact on schools, 72

- Finance, financial
 - change in class size, 53
 - considerations of class size, 53
- Flexible scheduling
 - avoids pitfalls of rigid schedule, 70
- Formative assessment
 - can inform teachers about, 79
 - does not direct teachers how to challenge students, 79
 - is not widely used, 81
 - students' needs, 86

Fragmentation. *See* Atomization

- Funds for schools
 - based on assessment of students, 77

G

- Gemeinschaft*, 30, 32
- Gesellschaft*, 30, 32
- "Good" teaching
 - means "interesting" lectures, 50
- Grades
 - affect teachers and students, 78
 - affect teachers' decisions about what, how and when to teach subjects, 78
 - are publicly visible, 80
 - cited by politicians as a measure of learning for public accountability, 80
- Group Investigation
 - suited for out-of-school projects, 38, 39
- Greater-than-one formula
 - as alternative to one-by-one formula holds promise of more cooperative learning by students, 14–15
 - a departure from traditional schooling, 15
 - and a higher level of productive learning, 15
 - involves teacher teams, an integrated curriculum, multiple teaching methods, etc., 58
 - vision for secondary schools, 26
- Groups
 - should be limited to 3, 4 or 5, 89
 - of 9 will subdivide, 89
- Group think, 23
- Growth
 - in size of schools, 53–55

H

- High schools
 - frequently number two thousand students or more, 53–54
 - should not grow beyond 600, 54

- History and culture
 - of their country studied by students everywhere, 60
- "Houses"
 - can encompass 250 students, 54, 88
 - can implement multi-age grouping, 88
 - have their own staff and curriculum, 54
 - make their own decisions, 12
- Human organization, 22–24

I

- Identification
 - with family, 18
 - with the school, 32, 41, 54, 88
- Improving schools
 - not considered by most professionals in education, 79
- Individual, individuals, individualism
 - a euphemism for isolation and, 55
 - isolated as a result of 1 x 1 organization, 57
 - lack of communication, 55
- Information society, 30
- Informational-transfer theory
 - of school learning, 43
- Innovation
 - is it inhibited by class size?, 52–53
- In-service training, 73
- Institutional support
 - for alternative assessment, 80
- Instruction
 - alternative methods of, 7, 9, 16, 26, 73, 78–80
 - of disciplines, 15–16, 19–20, 57, 62
 - in the Far East, 48
 - planned on basis of assessment, 78, 79
 - of schools, 15, 16
 - of teachers, 7, 43, 47, 48, 52, 53, 71, 73, 75
 - traditional, 9, 15
 - as verbal transmission of information, 48
- Instructional methods
 - not considered vital, 52
 - not equally appropriate at all times, 43
 - not equivalent, 43
 - for students' learning, 25
- Insulation, isolation, 7, 12, 22, 26–28, 31, 55, 58, 79, 87, 89
- Integrated curriculum
 - can pose difficult impediments, 37, 64
 - does not mean whatever educators decide, 59
 - as a general term cannot help, 64
 - may not affect students' perception of relevance, 60
 - prepare teaching materials, 50, 63
 - seeks to enhance relevance, 64

- Interaction
with colleagues and peers, 12, 16, 24, 44,
48, 51, 54, 55, 63, 87, 89, 90
- Interdisciplinary curriculum
definition of, 57
- Inter-student contact during classes
frowned upon in high schools, 88
- Investigative form of study
concentrates on problem solving, 72
- Involvement. *See* Engagement
- K**
- Knowledge
atomization of, 58
experienced directly, 59
functions in the real world, 57
itself is the key to teaching, 61
knowledge not to be categorized in
post-modern world, 60
must be conveyed, not only, 59
no integration of, 58, 64
objective criteria of validity, 60
required to integrate elements from
different disciplines, 70
significance of knowledge itself, 61
subordinated to relevance denies, 60, 64
valid and invalid, 60, 71
- L**
- Labor, laborious
versus “work”, 20
- Large class, classes
and the analogy with large schools, 55
can be productive, 51
coerce teachers into uniform
instruction, 49
considered difficult to teach, 47, 54
created to permit teacher teams and
cooperative learning, 24
effects reduced by instructional method, 51
generates lack of attention, 49
includes room size, 48
may be housed in large areas, 47
may not be an “obstacle course”, 48
- Large schools
can provide varied curriculum, 28
demand high level leadership, 35, 54, 55,
87, 88
social behavior more negative in, 54
virtues canceled by negative behavior, 54
- Laws
set standards for behavior, 34, 35, 60
- Leadership
qualities of, 35–36, 54, 87, 88
and school principals, 29, 35
- Learning
less meaningful when imposed, 44
nature of, 5, 20
projects out of school, 37, 39, 40, 52
valuable in its own right, 32
- Lecture, lectures
allegedly due to large classes, 49
method as fall back for teachers, 73
not due to class size, 49
- Levels
of school organization, 23, 42, 55,
87, 88
- Low test scores
class size and teaching method could be
due to co-variation of, 51
ostensibly due to less effective learning,
51
- M**
- Measurement of human behavior
can be manipulated and distorted, 77
must follow understanding of mental
functioning not the rules of
measurement, 77
- Motivation to learn
and competition, 16
derives from connection with, 41
as an independent variable, 50
indifference to, 18
others, 41
overlaps with engagement, 41
- Multilateral communication
within and between groups is the essence
of a social system, 88
- N**
- Narrow focus
cannot improve schools, 20, 31, 57, 79
- Narrow scope of expertise
decreases the possibility to effect
change, 79
- No Child Left Behind
cannot avoid manipulation of student
assessment for other goals, 77
depends on assessment, 77
did not seek to support any, 86
particular form of instruction, 86
- Non-productive learning
more common in large classes, 50

- Number of students
 - in a class, 7, 48, 49, 52, 53
 - generally above 20 per class, 48, 51, 52, 74
 - in a school, 47
- Number of teachers
 - per class, 47, 48, 58, 73
- O**
- One-by-one formula
 - and absence of cooperation, 11–13
 - and lack of attention, 49
 - and low productive learning, 15
- One-method approach
 - to instruction, 52
- Ongoing interaction
 - transforms instruction, 89–90
- On-site learning
 - failure to promote students' motivation, 38
- Open-space
 - class, 21, 53
 - schools, 47, 48,
- Organization
 - cannot solve all problems, 24
 - discipline-oriented, 19–21
 - hierarchical, 11–13
 - as a “group of groups”, 87–88
 - often ignored by professionals, 30
 - perceived as remote from specialists, 22–23
 - of schools, 31
- Organizational
 - authority, 19
 - change necessary but not sufficient, 9–10
 - change not a panacea, 25
 - conceptions of, 21
 - development, 23–24
 - environment, 29–30
 - features related to instructional ones, 25
 - nesting, 12, 55
 - norms, practices, 7, 29, 30, 32, 44
 - norms prevent adoption of integrated curriculum, 58
 - principles, 11, 14
 - rules, 10, 32–33
- P**
- Parents
 - can oppose out of school projects, 39
 - can participate in planning, 39
 - ignore necessary changes in behavior, 10, 36
 - incessantly demand smaller classes, 49, 53
 - population is double the size of student body, 39
 - projects, 39
 - support for out-of-school projects, 39
- Participation in selection of curriculum
 - not support for control of curriculum by students, 45
- Performances
 - can be judged by teachers who are experts in the arts, 83
 - do not require skills distinct from the performance itself, 83
 - as an integral part of learning, 83–84
- Performer's skills
 - all displayed in performance, 83
- Personal meaningfulness
 - an essential component of productive learning, 45
- Policy
 - about class size dissuades teachers from using innovations, 53
 - about instruction, 15–17
 - about one-by-one syndrome, 53
 - about “out of school” projects, 39
 - coherence in, 15
 - discourages change, 32, 53
 - lack of coherence in, 16
 - misguided, 38
 - of school, 27, 38–39
- Portfolios
 - can give teachers a sense of helplessness due to press of time, 81
 - as a form of alternative assessment, 81–84
 - must be completed on time, 81
 - for report to parents, 81
- Powers-that-be
 - must relinquish hold on the reins of change, 90
- Predictability
 - through uniformity, 86
- Prediction, predicting
 - of human behavior, 14
 - of society from education, 13–14
- Presentations by students
 - reflect their progress, 82
- Pressure to teach more
 - in blocked schedule because of fewer sessions, 73
- Principals
 - backing needed for study projects
 - contact between, 12
 - as gatekeepers of change, 36
 - as resistors to change, 38
 - not democratic leaders, 36
 - outside the school, 12

- Principles
 at all levels of schooling, 55, 87
 of relatedness should be applied, 87
- Prior knowledge
 its absence need not impede, 81
 acquisition of new knowledge, 81
 not necessary for study of many intellectual domains, 81
- Prisoners of Time document, 67–68
- Problems
 facing organizations have more than one solution, 85
- Process of schooling
 precedes products, 6
- Productive learning
 means students want to learn, 88
 as a personal and interpersonal affair, 20
 to schooling, 6–7, 18–19
 to society, 61
 sustained by schools as communities, 28
- Productive teaching
 with an enjoyable social atmosphere, 45
- Products of schooling
 are preceded by process, 6
 greater than one, 14
- Professional discretion
 and absence of priorities, 16
- Public performance
 as a means of assessment, 83–84
- Pursuit of knowledge, 26, 42, 52, 61, 77, 86, 88, 89
- R**
- Rapid information delivery system
 typical of secondary schools, 88
- Real-life events
 as subject of students' investigations, 65
- Reduction in class size
 entails enormous expenditures, 52–53
 as a means to improve learning, 48–49
- Relationships
 democratic, 35
- Relevance
 is not equivalent to accepting students' wishes, 58–59
 not be appreciated upon initial exposure to subject matter, 59
 not comprehended by young people, 59
 not as a precondition, 59
 not a simplistic notion, 59
 a problem not to be evaded, 59
 of subject matter to students' lives, 59
 as subjective, 58–59
 understood as part of learning, 59
what is it and how can it be explored, 59–60
- Repetition, in classroom experience
 creates monotony and boredom, 68
- Research
 involved one school only, 73
 should distinguish between teachers with and without relevant training, 73–74
- Research on schedule reform
 is of low quality, 72
 presents contradictory results, 72–73
- Resistance to change
 encouraged by 1 X 1 syndrome, 53
- Resource networks, 38, 57, 65
- Restructure
 instruction through assessment of each lesson, 81
- Rigid scheduling, 75
- Rules and laws
 in civilized society, 34–35
 positive commandments, 34–35
 in schools, 34–35
 students formulate, 34
 about what students *should* or *should not* do, 34
- S**
- Schedule of classes
 epitomizes schools as dull and repetitive, 69
 functions mechanically, 69
 links factory to school, 69
 remains fixed while students and subject matter vary, 67–68
 unrelated to facilitating productive learning, 68
- School, schools
 architecture, 21
 barricaded behind bureaucratic impediments, 37
 can design various alternative schedules of classes, 70–71
 can they move from bureaucracies to systems, 82
 as a community, 27–36
 as conglomerates, 87
 as conservative organizations, 29
 contact between, 12
 different from society, 31
 disregard real-life phenomena, 37
 divided into “houses”, 88

- exchange the 1 x 1 formula for the more complex one, 43, 52
- exemplary (called Green Valley), 20
- as a factory, not community, 32, 69, 78
- have a narrow range of goals and processes, 31
- improvement, improving schools, 19–20
- industrial model of, 30
- inter-connected parts of a, 87
- in its entirety, 28
- keep academic learning inside their walls, 37
- learning not aimed at public performance, 84
- not a reflection of society, 31
- offer narrow range of expression, 83
 - of 400 offers varied curriculum, 54
- organization atomized into disciplines, 38
- organization the result or cause of curricular fragmentation, 58
- organization, 11–12, 26–30
- oriented, 19
- as part of broader community, 36–40
- relationship with parents, 36–37, 39
- scales of social relationships in, 32–33
- within a school, 54–55
- size, 53–56
 - social relationships in, 17, 32
 - some akin to penal institutions, 86
 - standardized organizations, 17
 - strive (i.e. goals), 26, 32–33
 - support from community for change, 36–39
 - unaccustomed to subdividing themselves, 55
 - without walls not recommended here, 40
- Secondary school, schools
 - fusion of disciplines appropriate for, 57–58, 64
 - make little attempt to integrate subjects, 58, 86
 - students encounter 10-15 teachers per week in some countries, 58
 - students encounter 5 to 6 teachers each day, 31, 68
- Self-subordination
 - of teachers in meetings, 22
 - through groupthink, 22
- Self-fulfilling prophecy, 14
- Separation
 - of classes, individuals, subjects etc. from one another, 87
- Service learning
 - integrated into curriculum, 37
- Short classes
 - unfortunately coupled with multi-disciplinary curriculum, 70
- Site-based learning, 38, 40
- Size
 - of school, 53–56
 - of space available, 48
- Skepticism
 - about schools' capacity to change, 24
- Small classes
 - do not necessarily change instruction, 49
 - might increase student aggressiveness, 48
 - more attention from teachers, 48
 - not necessarily positive re student relations, 48
 - promote student attentiveness, 48
 - with twenty or less students, 48
- Small group, groups
 - in cooperative learning classes, 55
 - engage in learning through interaction, 55
 - is a paradigm for restructuring large units, 55
 - members related to one another, 58
- Small schools
 - unfair due to limited curriculum, 56
- Society
 - cannot afford large numbers of failures, 83
- Solutions to problems
 - best identified by teams rather than by a solo leader, 85
- Space-time allocations
 - and lack of skills interfere with alternative methods, 82
- Standard schedules
 - reduce work authenticity, 69
- Student, students
 - in blocked scheduled classes improved grades significantly, 74
 - clients and members of the school, 27
 - conceptions of learning, 43–44
 - focus on grades as their objective, 4–5
 - invited to regulate classroom life, 35
 - not to be viewed as collections of individuals, 87
 - outcomes an indirect function of class size, 52
 - perceptions of relevance, 59
 - primary subject of Educational Psychology, 45
 - questions almost non-existent, 42
 - responsible for their engagement in learning, 42, 44

- Student, students (*cont.*)
 selection of topics affect, 44
 socialization of, 32
 turned off by tests, 8
 want to feel autonomous, 44
- Study project, projects
 centered in the community, 39
 incorporates ideas from different domains, 62
 outside the school, 37–40
 selected by students, 88
- Studying
 real-life phenomena, 37
- Subject matter
 can be the main obstacle to good teaching, 73–74
 is not automatically relevant, 59
- Suggestions
 for alternative schedules, 70–71
 for learning activities in three-hour classes, 70
 for three 105-minute classes, 71
- System, systems
 approach to schools seeks to connect not separate departments, 8
 and communities related approach, 85
 as a concept is very practical, 85
 emphasize free flow of information, 86
 interlocking is not always a system, 11
 rely on the flow of feedback, 87
 some are not communities, 85
 their relation to communities, 86
 theory: smaller systems are embedded in larger ones, 89
 used in the popular sense of an organization, 12, 25, 85
 view can extract schools from their uniformity where, 82
- T**
- Teacher, teachers
 blocked schedule classes, 73
 cannot prepare curriculum for every group of their students, 63
 commitment to subject matter, 73
 current high schools cannot introduce cooperative learning, 55, 67
 as decision makers, 71, 78
 decision making power, 12
 defining achievement by test scores, 77
 empowerment of, 12
 as ever-flowing fountain of knowledge, 89
 increase pace of talking in, 73
 indifferent to students, 42
 as “information delivery system”, 44
 learn about students’ characteristics, 42
 lectures, 48, 50, 67, 68
 may not master techniques of expressing specific knowledge, 84
 novice, 20
 often tells classes what they are to know, 89
 personal associations not a basis for curricular integration, 64
 professional status affected by, 78
 rarely withstand pressure of official policy, 53
 satisfied with academics who don’t relate to teaching methods, 79
 skills determine teaching methods not class size, 51
 as solo practitioners, 12, 53
 talk 80% of class time, 52
 training programs require renewal, 73–74
- Teaching
 is sharing with students ways of living that are of value, 61
 as a performing art, 83
 as telling, 73
 “to the test”, 78
- Teaching and learning
 deals with practitioners, 44
 not prestigious in universities, 79
- Teaching methods (see also Instruction)
 alternative, 7–8, 9, 25
 are resistant to change, 50
 changes in, 67, 69–70
 as the independent variable, 51
 lectures as, 48–50, 67–68, 73–74, 78, 80
 in small versus large classes, 49–51
 traditional, 67
 un-coordinated, 16
- Teams, teamwork
 can teach different groupings of students at different times, 70
 effective for suggesting solutions to complex problems, 85
 for feedback and problem solving, 85–86
 institutionally organized, 23
 for planning and implementing classroom instruction, 26
 productive, 23
 of teachers, 65, 81, 87–88
- Techniques
 for expressing knowledge, 84

- Temporal duration
 - of class session, 48
- Testing, tests
 - can hinder change in teaching, 74
 - to communicate what they learned, 78
 - conditions that exert decisive effect on test performance, 78
 - discourage shared social purposes, 32
 - distorts our view of student progress, 77
 - do not evaluate students' ability, 78
 - do not evaluate students' involvement, 78
 - education not required, 81
 - focus on student's immediate memory, 78
 - as a form of standardization, 14
 - high-stakes, 78
 - introduces bias that detracts from student status, 77
 - is a mechanism of control, 80
 - for prior knowledge in secondary, 81
 - as a true indicator of learning, 14
- Time, time slots
 - allocation to classes for innovations, 80
 - allocation to complete portfolios, 81
 - the avenue of life, 67, 83
 - for discussion of change, 59
 - held constant while subject, students and learning vary, 47, 75
 - of knowledge, 84
 - the meaning of, 67
 - needed to complete projects, 71, 81
 - not available for innovations, 80
 - prisoners of, 67, 68
 - rigid periods of, 68–70, 75
 - should be invested in the pursuit, 85
 - spent on teaching and learning, 69
 - unlock, 68
 - use of, 67
- Trans-disciplinary curriculum, 26, 58, 61, 87
- Transfer of learning
 - from one discipline to another, 79
 - of skills not of content, 79
- Transmitting large amounts of material
 - is the essence of high school teachers' self-image, 73
- U**
- Uniformity
 - quasi-military, 86
 - retained by high schools most everywhere, 86
- University, universities
 - extremely conservative, 90
 - teacher training programs must be revamped, 90
- Utopian
 - organizational conditions, 23
- Unproductive learning, 4, 40, 63
- V**
- Variable ignored
 - is teachers' command of alternative teaching skills, 25
- Variation, variety
 - engagement, 3
 - has potential to stimulate, 65
 - in instructional method depends, 73
 - involves change in students' learning environment, 3
 - plus clear relevance to students' lives, 60
 - on teachers' repertoire, 73, 88
 - in teaching method, 50–52
- W**
- What and how
 - are the basic questions of education, 61
 - are closely linked, 57
 - to teach ignored as basic, 65
- Work, works, working
 - of academics in schools is, 79
 - on assessment don't deal with, 79
 - largely ex post facto, 79
 - teaching, 88
 - versus labor, 20
- World of work
 - provides range of options, 83
 - for styles of functioning, 83
- Written tests
 - may have no relation to the knowledge acquired, 78, 83
