

INDEX

A

- Acid phosphatase, 59, 99, 100, 123, 125, 127, 128, 134, 172, 206, 237
- Adaptation, 4, 32, 37, 65, 83, 85–88, 91–93, 98, 100, 102, 104, 106, 117–119, 123, 124, 127, 128, 135, 143, 145, 149, 157, 185, 202–204, 206–209, 227, 235, 247, 248
- Adventitious root, 87–90, 92, 103, 107, 108, 118, 133, 202, 255
- Aerenchyma, 90, 92–94, 104, 107, 108, 202
- Agriculture, 3–5, 56, 57, 66, 105, 135, 143, 156, 157, 177–179, 189, 192, 198, 209, 211, 213, 216, 227, 228, 232, 238, 239, 262
- Algae, 5, 10, 13–16, 20, 22, 26, 145
- Allometric relationship, 9, 11, 12, 21, 85
- Aluminum, 1, 57, 83, 99, 100, 103, 167, 169, 194, 196, 199, 204–206, 209, 226, 230, 252
- Ammonium, 56, 180, 205, 209, 214, 215
- Angiosperms, 36, 51, 117, 145
- Anthropogenic, 42, 64, 271, 277, 278
- Aquatic, 2, 5, 9, 20, 22, 31, 32, 34, 35, 37–45
- Arabidopsis thaliana*, 102, 235–237, 252, 258, 275
- Arbuscular mycorrhiza, 100, 117–135, 143, 144, 203, 250, 276
- Arbuscule, 144, 146, 150, 151, 157
- Aspergillus*, 156, 168, 260, 261
- Auxin, 62–64, 127–133

B

- Bacterium, 130, 274
- Banksia*, 119, 120
- Barley (*Hordeum vulgare*), 93, 95, 97, 98, 105, 182, 188–191, 193–196, 201, 204, 234, 251, 253, 256–259

- Bean (*Phaseolus vulgaris*), 86–101, 104, 105, 107, 126, 127, 135, 202–205, 207, 255, 256
- Betulaceae, 118, 121, 144
- Big Bang, 272
- Biochemical, 3, 10, 53, 55, 85, 123, 124, 130, 135, 143, 157, 177, 200, 204, 216, 261
- Biochemistry, 272
- Biomass allocation, 53, 59, 85, 86, 92, 108, 273
- Biomonitoring, 42
- Bottlebrush roots, 206
- Brassica*, 60, 171–173, 205, 207–209, 252, 254
- Brassicaceae, 201, 203, 208, 276
- Breeding, 67, 85, 94, 97, 101–104, 107, 200, 202, 235, 247, 253, 255, 256, 262, 271

C

- Cadmium, 100, 210–212, 216
- Calcium, 1, 57, 156, 180, 181, 186, 196, 199, 204, 210, 226, 230, 231, 252, 276
- Carbon, 1, 9, 16–19, 24, 56, 58, 60–62, 90–93, 100, 101, 117, 124–127, 134, 144, 145, 153, 155, 166, 167, 170–173, 203, 206, 225, 272, 273, 276, 277
- Carboxylate, 58, 98, 99, 123, 125, 134, 135, 204–206, 209
- Casuarinaceae, 118, 121
- Cereal, 179, 189, 205–208, 253, 255
- Chemical test, 6, 229
- Chenopodiaceae, 203, 276
- Chickpea (*Cicer arietinum*), 252
- Chloroplast, 21, 54–56, 227, 236, 274, 275
- Citrate, 58, 65, 98, 123, 125, 204, 206, 230, 252, 257, 258
- Cluster root, 64, 65, 86, 99–100, 118–125, 127–130, 133, 171, 206, 207, 251, 252, 258, 276, 278

Competition, 34, 37, 65, 88, 92, 103–106, 124, 150, 154, 166, 169, 170

Compost, 208

Critical soil P concentration, 198

Critical tissue P concentration, 67

Crop
 model, 21–23, 88, 104, 117, 118, 123, 131, 189–190, 195, 234–235
 nutrition, 177–216
 rotation, 207, 208, 228, 262
 yield, 67, 177, 178, 180, 184, 190, 194, 225–230, 232, 233

Cropping system, 3, 83, 99, 135, 205, 207, 208, 225, 232, 262

Cucurbitaceae, 100, 118, 121

Cyanobacteria, 145, 272

Cyperaceae, 65, 118, 119, 121–124, 206, 276

Cytokinin, 63, 64, 129, 130, 133

Cytoplasm, 55, 150, 187

D

Dauciform roots, 117–119, 121, 122, 124, 129, 276

Diagnostic arrays, 238–239

Diffusion, 1, 2, 38, 57, 84, 96, 102, 143, 156, 187, 189, 195–197, 201–204, 247, 248, 276

DNA, 53, 63, 145, 274, 275

E

Ecological strategy, 85

Ecology, 32, 42, 58, 64, 147, 153, 214, 238

Ecosystem, 1–4, 6, 9–11, 26, 31, 35, 44, 53, 57, 64, 83, 85, 106–108, 143–145, 147, 152, 154, 156, 158, 202, 203, 213, 247, 252, 272, 278

Ectomycorrhiza, 100, 144, 168, 169

Eleagnaceae, 118, 121

Elemental stoichiometry, 9–11, 16–26

Endomycorrhiza, 144

Environment change, 271, 272, 278, 279

Ethylene, 62–64, 93, 129–133

Eutrophic, 39, 40, 41

Evolution, 119, 144, 145, 271, 273, 276, 277

Extraradical mycelium, 144, 146–149, 157

Exudate, 97, 99, 100, 103, 107, 108, 123–125, 147, 155, 165, 166, 169, 170, 204, 206–208

F

Fabaceae, 118, 120, 121

Fertilizer, 3–6, 56, 66–68, 83, 100, 106, 135, 170, 177–182, 184, 185, 190–192, 194–200, 202–205, 207–216, 228–230, 232–235, 239, 250, 251, 262, 277–279

G

Galactolipid, 62, 273

Gene expression, 62, 123, 125, 127, 128, 130, 134, 150, 234, 238, 248

Genetic modification (GM), 67, 209, 237, 271, 279

Genome, 134, 135, 151, 238, 257, 274–278

Genotype, 52, 58, 66, 68, 85, 87–89, 91–99, 101, 102, 104–107, 132, 173, 185, 202, 207–209, 254, 255, 257, 258, 260, 273, 274

Germplasm, 208, 248, 249, 255, 262

Gibberellin, 129

Glycolipids, 273

Grass, 65, 66, 87, 93, 194, 203–205, 212, 214, 215

Growth rate, 10, 11, 14, 16, 19–23, 25, 37, 41, 45, 51–53, 59–61, 67, 91, 117, 165, 167, 168, 171, 173, 271, 273–275

Gypsum, 210, 211

H

Hakea, 120, 124, 125, 127

Helper bacteria, 154, 169

Human population, 5, 271, 278

I

Inoculant, 155, 168, 250

Iron chelate reductase, 123

Iron, 57, 123, 129, 181, 273, 276

Isotope, 192

L

Lake, 4, 5, 31, 32, 275

Lateral root, 58, 59, 62, 63, 67, 87, 88, 95, 105, 108, 118, 120–122, 127, 129–133, 201, 206, 207, 255

Leaching, 1, 3, 5, 148, 198, 210, 273

Leaf, 2, 11, 13, 15–26, 32, 42, 51, 52, 56, 62, 87, 92, 102, 107, 128, 172, 187, 226, 227, 237, 274

Legume, 3, 55, 60, 64, 66, 87, 144, 166,
203–205, 207, 214, 273
Light, 10, 13–16, 20–22, 25, 31, 95, 127,
128, 188
Lupinus, 65, 206, 251, 278

M

Magnesium, 1, 199
