

# Index

## A

Additive model, 29–31, 42–44, 57–60, 76, 87–89, 186–189, 213, 214, 219, 349, 356, 463, 464, 472, 478, 479, 482  
Adequacy, 3–4, 23, 274, 291–293, 316, 408, 416, 427, 433, 437, 454, 467  
Allocative efficiency, 3, 5, 26–29, 31, 34, 36, 96, 99, 134–136, 244, 279–281, 455  
Assurance regions (AR), 22, 23, 95–99, 104, 105, 112, 113, 168–170, 208, 471–472

## B

Banker, Charnes and Cooper (BCC) model, 12, 16, 28, 43–48, 50–56, 59, 60, 68, 69, 94, 214, 219, 224, 227, 245, 275, 277, 281, 284, 290, 322, 327, 343, 347, 348, 350–352, 387, 411, 417, 433, 456, 482  
Banker-Morey model, 19, 57, 330  
Banking institution, 319, 320  
Baseball, 298  
Best-practice, 4, 22, 318, 323, 380, 440, 446, 447, 452, 454–456, 465, 466, 468–474, 477–479, 481–483, 486–490  
Bootstrap, 237, 241–269, 274, 277, 286, 328

## C

Catch-up, 341, 342  
Categorical variable, 5, 7, 21, 35, 474  
Centralized, 300–303, 305, 306, 311  
Chance constrained DEA, 210–238  
Charnes, Cooper and Rhodes (CCR) model, 3–26, 41–43, 45, 48–59, 68, 69, 78, 85, 87, 107, 108, 111–113, 115–117, 195, 198, 200, 201, 208, 220, 223, 224, 231, 234, 244–245, 277, 304,

321, 322, 327, 343, 348, 350, 353, 355, 417, 422, 433, 448, 456, 482  
Competitive index, 329  
Complementary slackness, 15, 80, 81, 87, 108  
Confidence intervals, 100, 242, 250–253, 257–259, 261–263, 266–268, 286  
Congestion, 18, 145, 173–192, 224, 229, 237, 386–387  
Constant returns to scale (CRS), 12, 45, 48, 51, 53, 56, 63, 67, 69, 94, 121, 129, 133, 135, 139, 143, 144, 165, 166, 171, 196, 197, 208, 245, 246, 248, 250, 257–258, 260, 262–264, 278, 299, 303, 305, 306, 311–312, 317, 329, 354, 387, 417, 465, 472–473  
Contextual variables, 274, 288–291  
Control charts, 384–385  
Cost function, 61, 134  
Coverage, 18, 23, 258–262, 266, 268, 366, 451  
CRS. *See* Constant returns to scale  
Culture, 320, 323, 332, 334–335, 352, 451

## D

DEA estimator, 241–269, 273–276, 288–291, 293  
Distribution-free approach (DFA), 317–318

## E

Education, 4, 7, 100, 118, 219, 404–410, 413, 467  
E-model, 211, 212, 223, 224, 231  
Engineering applications, 363–391  
Environmental controls, 385–386  
Environmental factor, 167, 320, 328–329, 331, 352, 354, 405, 406, 425, 440

Equity, 98, 324, 328, 331, 338, 343, 347, 370, 372–373  
 Excel, 90  
 Exogenous, 5, 18, 19, 67, 122, 147, 291, 292, 427, 429–431, 439, 474

**F**

Free disposal hull (FDH), 98, 244–246, 248–255, 257, 258, 260, 266, 268–269, 318, 321, 322, 372

**G**

Game, 35, 103, 119, 212, 298–300, 302–306, 311

**H**

Health, 346, 403, 404, 410, 444–490  
 Highway maintenance patrols, 115, 383–384  
 Hospital, 1, 7, 99, 404, 405, 413–415, 444–490

**I**

Identification, 2, 23, 24, 33, 36, 41, 45, 48, 51, 54, 61, 73, 80, 84, 104, 112, 145, 153, 167, 173–192, 231, 233, 274, 288, 289, 317, 319, 321, 325, 327, 328, 332, 334–335, 338, 343–345, 350, 353, 354, 365, 371, 376, 378–381, 384, 385, 389, 405, 407, 410, 414, 416, 417, 419, 420, 424–430, 433, 437–440, 447, 449–453, 455, 465, 467, 469, 471, 477, 478, 481, 482, 486–489  
 Index number, 4, 353, 409, 413  
 Inference, 211, 237, 242, 247, 250, 268, 274, 472  
 Influential observations, 378, 379, 488  
 Input-oriented, 12–16, 21, 29, 44, 45, 69, 84, 107, 133, 176, 178, 183, 184, 197–198, 200, 203, 208, 281, 300, 347, 351, 353, 386, 387  
 Input separability, 274, 281–282  
 Intermediation approach, 321, 426  
 Internal, 34, 153, 154, 297–312, 316, 318, 323, 328, 344, 364, 390, 426, 427, 435, 446  
 Intertemporal, 38, 148, 356, 394, 441, 442  
 Iterated bootstrap, 253, 266–268

**K**

Key performance indicators (KPI), 316, 317, 380, 416

**L**

Likert scale, 151, 155, 163, 167, 169, 171, 329

**M**

Malmquist index, 127–147, 257, 283, 336, 339–342, 387  
 Management, 3–5, 18, 22, 67, 103, 104, 121, 122, 151, 152, 154, 167, 173–192, 218, 232, 299, 315–317, 320, 322–324, 326, 328, 332, 333, 336, 337, 339, 342, 344–345, 347–350, 352, 353, 355, 365, 369, 371, 374, 378, 380, 383, 386, 388, 403, 405, 412, 414, 416, 418, 419, 421, 424, 425, 427, 437–439, 451, 454, 457, 459, 461–462, 464, 466, 469, 479, 481, 487, 489  
 Monte Carlo simulation, 251, 286, 288, 290, 354–355

**N**

Naive bootstrap, 253–254, 258, 260–262  
 Network DEA, 35, 298, 300, 311, 405, 425, 426, 429–431  
 Non-discretionary, 5, 7, 18–20, 35, 320, 322, 330, 331, 469, 474, 478  
 Non-oriented, 196, 199–200, 432–434, 437, 440  
 Non-parametric, 237, 241, 242, 249, 254, 268, 274, 276–280, 282, 283, 288, 293, 318, 321, 328, 356, 365, 404, 446, 475

**O**

Operational thinking, 388–389  
 Ordinal data, 152–154, 156–164, 166, 168–171  
 Outlier, 72, 114, 326–327, 355, 378–379  
 Output-oriented, 12–16, 20, 44, 45, 61, 66, 69, 128, 139, 146, 176, 183, 189, 196, 198–199, 203, 204, 347, 352, 386, 417

**P**

Panel data, 337, 338, 341  
 Parametric, 35, 223, 266, 268, 273, 276, 281, 287, 290–294, 317, 328, 365  
     functional, 274, 283, 291–293  
 Performance analysis, 315, 323, 366  
 Performance Measurement Science, 389–390  
 P-model, 211, 212, 231  
 Production approach, 321, 409

Productivity change, 127, 138–143, 274, 283–286, 339, 341, 342  
 Profitability, 2, 297, 316, 321–323, 343, 345, 347, 348, 353, 405, 419–421, 424, 425, 438, 463–464  
 Profitability vs. efficiency, 321, 322, 405, 464  
 Progress, 72, 90, 191, 246, 324, 336, 348, 390, 410

## Q

Qualitative data, 35, 151–171

## R

Radius, 73, 75, 76, 229  
 Rank position, 82, 83, 152, 157–159, 163, 164, 168, 170, 171  
 Ratio analysis, 98, 316–317, 331–332, 415, 416, 426  
 R&D, 118, 152–154, 164–165, 170  
 Resampling, 253, 258–265  
 Returns to scale (RTS), 12, 28, 36, 41–69, 121, 122, 129, 132, 135, 136, 175, 245, 257, 277–279, 411, 414, 417, 456, 465, 473, 487

## S

SBM. *See* Slacks-based measure  
 Scale efficiency, 36, 144, 145, 319, 371, 404, 412, 414, 417, 451, 456, 457, 482  
 Sensitivity, 24, 26, 71–90, 99, 103, 212, 227–229, 319  
 Service quality, 170, 318, 323, 329, 332–335, 405, 414, 415, 417, 419, 440, 445

SFA. *See* Stochastic frontier analysis  
 Slacks-based measure (SBM), 195–208, 349, 350, 426, 431, 433–437  
 Software, 89, 90, 105, 107, 141, 153, 154, 268, 317, 381, 432  
 Solver, 432  
 Stackelberg, 300, 303–306, 311  
 Stochastic frontier analysis (SFA), 317–318, 452–453  
 Super-efficiency, 120, 204, 205, 284, 327, 434, 435  
 Super-SBM, 196, 202, 204–205

## T

Terrestrially-based large scale commercial power systems, 384  
 Thick frontier approach (TFA), 317–318  
 Tobit, 290, 331, 452, 454, 468, 474–476  
 Transit systems, 386–387  
 Translog function, 143, 453

## V

Variable returns to scale (VRS), 12, 115, 119, 129, 144, 156, 158, 161–163, 165, 166, 171, 196, 202, 203, 311–312, 329, 387

## W

Weights restrictions, 103  
 Window analysis, 23–26, 72, 90, 337–339, 341

## X

X-inefficiency, 446
