

Index

A

Acetate, 591–595
Actin, 174, 307, 342–356, 526, 569, 576
 cables, 329–337
 polymerization, 331, 333, 342, 343,
 347–349, 351, 355, 401–409, 504
 waves, 405, 406, 409
Adaptation, 14, 20, 33, 197, 200, 297–308,
 386, 387, 391–392, 394, 483, 488–490,
 503–518
Anatomy, 555, 653, 663, 665, 666, 668–673,
 675, 676, 678
Apoptosis, 38, 138, 215–235, 239–248,
 266–268, 270, 272–274, 276, 280, 284,
 318, 568
Appetite regulation, 431, 434, 439–441
Arp2/3 complex, 330, 348, 401–403, 407, 409
Artificial leaf, 454
Artificial photosynthesis, 446
Atlas informatics, 679–680
Attrition, 612, 613

B

Bayesian analysis, 187
Bayesian inference, 59–78, 289–291, 499
Bet-hedging, 280, 283–284, 292
Biological data visualization, 177–178
Biological networks, 3–15, 97–118, 140, 261,
 526, 613
Biomedical atlas, 661–680
BioUML, 240–243, 247
Bipolar disorder, 567–578
Boolean, 44, 45, 50, 51, 60, 141, 185–190,
 252–255, 258, 259
Bottom up vs. top-down, 583–598

Brain, 121–127, 429–442, 568, 570, 571, 573,
 577, 615, 616, 665, 667, 670–673,
 677–679
Budding yeast, 139–141, 143, 150, 154, 156,
 173, 180, 330–333, 336, 403, 406, 408

C

Caenorhabditis elegans, 215–235
Catabolite repression, 376
Cell
 mechanics, 346
 migration, 215–235, 341, 354
 motility, 329, 341, 342, 347, 353, 355
 polarization, 290, 329
The Cell as a thermostat, 197–202
Cell cycle timing, 139–140, 148–154,
 204–205, 209, 211
Cellular
 decision making, 267, 276, 279–292, 303
 information processing, 286
Central carbon metabolism, 186, 187, 376,
 414, 421
Chemotaxis, 14, 289, 290, 385–399, 415,
 424–426, 510–512, 516
CNS penetration, 615
Coarse graining, 51, 385–399
Composite diagrams, 240, 242, 244, 245
Comprehensive map, 246
Computational modeling, 140–141, 151, 157,
 159, 216, 233, 332, 365, 446–447,
 548–553, 555, 556, 559, 561–562,
 674
Cow, 602, 603, 605, 607
Cytoskeleton, 305, 329, 330, 342, 344,
 347–350, 356, 576

D

- Data integration, 99, 115–116
- Dephosphorylation cycle, 290
- Development, 14, 20, 22, 42, 51, 71–72, 99, 109, 123, 128, 132, 138–139, 146, 159, 211–212, 216, 219, 221, 227, 228, 230, 231, 233–235, 239, 286–287, 317, 318, 322, 324, 365, 386, 413, 421, 532, 537–545, 547–562, 568, 578, 602, 603, 605, 607–608, 612, 626, 627, 641, 651–658, 662–665, 668, 674, 677, 679, 680
- Diagnostic validation, 568, 571
- Differentiation, 113, 203–212, 215–235, 251–263, 280, 284, 318, 319, 321, 555
- Drug
 - development, 548–552, 554, 555, 559, 562, 612, 652–654, 658
 - discovery, 123, 318, 324, 612–614, 617, 618, 651–658
- Dynamic modeling, 307, 505, 553–555, 589
- Dynamic optimization, 414, 416

E

- EGFR. *See* Epidermal growth factor receptor
- Endocrine dynamics, 608
- Endocytosis, 42, 318–320, 322, 323, 329, 330, 403–404, 406, 407, 576
- Energy metabolism, 429–442
- Epidermal growth factor receptor (EGFR), 34, 35, 47, 49, 72–74, 76, 77, 319, 321–324, 522–524, 526, 653
- EpoR. *See* Erythropoietin receptor
- Erythropoietin receptor (EpoR), 319–323
- Escherichia coli*, 10, 14, 197, 199–201, 289, 298, 385–399, 414, 421, 425, 503–504, 509, 515, 583–598
- Evolution, 4, 33, 37, 39, 41, 42, 121–133, 188, 200–201, 211, 239, 266, 284, 365, 379, 419, 420, 446, 456, 482, 483, 485, 486, 494, 499, 523, 528, 540, 663
- Evolution strategy, 284

F

- Feedback loop, 14, 41, 75, 157, 256, 257, 287, 348, 376, 404, 405, 408–409, 437, 518
- Fisher information, 288, 423
- Flattening algorithm, 242, 243
- Flow cytometry, 23–24, 175, 366
- Fluorimetry, 367, 369, 373
- Fold change detection, 516–518
- Follicle wave pattern, 607, 608

- Formins, 144, 157, 177, 253, 254, 319, 330–333, 336, 387, 401, 425
- Forward loop, 156, 256, 376, 377, 512–516, 518

G

- GA. *See* Genetic algorithm
- Gaussian adaptation, 481, 483, 488–490
- Gene expression, 99, 103–107, 115–117, 175, 187, 216, 253–255, 258–260, 287, 379, 483, 552, 554, 567–578, 585, 590, 623, 654–656, 658, 663, 665, 668–679
- Gene regulatory network (GRN), 22, 39, 252–254, 260, 289
- Genetic algorithm (GA), 255, 257, 418, 483, 492
- Germ line, 216–221, 225, 228–235
- Global optimization, 255, 413–426, 456, 483, 494, 497, 500
- Global optimization methods, 414, 418–419, 424
- GRN. *See* Gene regulatory network

H

- Hepatitis C Virus (HCV), 616–617
- Hypothalamic–pituitary–adrenal (HPA) system, 431, 434, 437–439, 441

I

- IL3R. *See* Interleukin 3 receptor
- Image processing, 668–669, 672, 673, 675
- Incoherent feed, 512–518
- Information processing, 20, 31, 279–292, 319
- Integral feedback, 14, 511–512
- Interleukin 3 receptor (IL3R), 319–321, 323
- Intracellular stochasticity mixed strategy, 284

K

- Kinase, 21, 59, 81, 113, 125, 138, 176, 184, 199, 268, 298, 319, 344, 392, 404, 448, 504, 523, 560, 615
- Kinetic modeling, 154, 185, 300, 319, 542–543, 556

L

- Ligand binding, 318–320, 322, 503–504, 506, 507, 523, 526
- Logarithmic sensing, 385–399
- Logical models, 269–270

M

Mass-action kinetics, 41, 82, 83
 Mathematical model, 3–5, 20, 141, 151, 152, 154, 155, 205, 240, 265–276, 299, 302, 303, 306, 307, 318, 323, 331, 336, 342, 353, 355, 356, 386, 405, 429–442, 583, 597, 601–603, 608, 612, 614, 622, 667
 Mechanistic mode, 38, 127, 537, 547–562, 618
 Medical data integration, 674
 Metabolic engineering, 14, 15
 Metabolism, 15, 35, 109, 113, 118, 172, 177, 183–190, 201, 266, 279, 286–287, 301, 307, 321, 363–379, 414, 421, 429–442, 445–462, 552, 553, 574, 576, 578, 585, 588, 597, 598, 653
 Metaheuristics, 414, 418, 419
 Michaelis–Menten kinetics, 247, 507
 Microarray reanalysis, 568
 microRNA (miRNA), 571, 575, 578, 646
 Mining medical imaging, 99
 Mitochondria, 172, 247, 266–268, 274, 276, 365, 370–373, 375–377, 379, 568
 Model, 3, 19, 60, 82, 98, 121, 139, 173, 184, 205, 215, 239, 252, 267, 268, 281, 298, 318, 330, 342, 386, 402, 413, 431, 446, 465, 482, 504, 522, 537, 548, 568, 583, 601, 612, 622, 663
 Model inference, 37, 40, 41
 Modeling, 3, 19, 64, 137, 185, 241, 252, 265, 300, 319, 333, 341, 386, 405, 414, 429, 446, 465, 482, 518, 521, 537, 547, 588, 602, 621
 Molecular
 dynamics, 144, 151, 156–157, 218–219, 234
 interactions networks, 4, 523
 modeling, 39, 40, 42, 44, 123, 132, 133, 137–159, 218–219, 330, 482, 524, 525, 527, 555, 646, 832
 noise, 267
 Morphodynamics, 341–356
 Mouse, 109, 117, 125, 150, 251–263, 276, 346, 662, 663, 665–673, 675, 679, 680
 Movement, 176–178, 202, 218–219, 222, 223, 225–227, 233, 234, 331, 341, 342, 346, 347, 354, 396, 403, 425, 473, 504, 555
 Multi-oscillatory, 365, 371–377
 Multiple flagella, 392
 Multi-scale modeling, 137–159, 188, 551–562
 Mutual information, 288–290, 642, 643

N

Naive Bayes clustering, 78
 Nervous system, 122, 125, 568, 616
 Network component analysis, 587–588
 Network inference, 38–41, 46, 49, 60, 75, 78
 Network parameter estimation, 490
 Neuronal model, 431, 435–437
 NFkappaB (NFkB), 270, 273–275, 614, 615
 Nicotinamide adenine dinucleotide, 379

O

Ontologies, 8, 98, 99, 103, 570, 663–667, 672, 673, 678
 Optimal experimental design, 413–414, 416, 418, 422–425
 Oscillations, 154, 156, 198, 231, 352–355, 365, 369, 371–373, 375–379, 433, 607, 615

P

Parameter
 estimation, 4, 42, 413–414, 416, 418–425, 483, 499, 604, 605
 identification, 481–500, 604
 Pathway inference, 74
 PBPK modeling. *See* Physiology-based pharmacokinetic modeling
 Pharma research, 537–545, 547–562, 611–618
 Phosphorylation, 20–21, 28, 33–36, 45, 47, 51, 59–78, 81, 82, 90, 91, 128, 138–140, 148–153, 247, 272, 290, 320, 321, 344, 387, 504, 522–524, 530, 553, 585
 Phosphorylation networks, 59–78
 Physiological modeling, 553, 555, 556, 558–559, 602, 671
 Physiology-based pharmacokinetic (PBPK) modeling, 556–559, 562
 Piecewise linear, 252
 p27^{Kip1}, 138–140, 142–152
 Protein interaction network, 5, 32, 61, 64

R

Reaction kinetics, 25, 468, 526, 597
 Reactions network, 6, 7, 14, 15, 291, 414, 473, 477, 481–500, 522–532
 Receptor signaling, 113, 128, 318, 320, 323, 513, 515
 Redox biochemistry, 378, 379
 Reproduction, 349, 355, 399, 602
 Robust design, 414, 449, 488

- Robustness, 141, 204, 253, 260–263, 419, 421, 446, 449, 453–455, 458, 488, 509–511, 622, 643, 644
- Rule-based, 31, 37, 43–44, 51, 128–130, 132, 306, 524–532
- Rule based model, 43–44, 51, 128–130, 132, 524–532
- S**
- SBGN. *See* Systems biology graphical notations
- SBML. *See* Systems biology markup language
- Schizophrenia, 567–578
- Segmentation and tracking, 335
- Selfish brain theory, 429–442
- Semi quantitative, 251–263, 587
- Sensitivity analysis, 14, 39, 43, 49, 154–155, 186, 267, 271, 272, 274, 275, 414, 423, 446, 448–451, 604, 605, 614, 615
- Sequestration, 82, 85, 87, 90, 92
- Sic1, 137–159
- Signal transduction, 20, 36, 46, 51, 103, 117, 148, 187–189, 285, 298, 300, 302–303, 307, 318, 323, 324, 387, 466, 522, 524, 559–560, 562, 568
