Subject Index

A

- Abdominal pain and melena
 - clinical presentation, 209–210
 - diverticulitis
 - clinical manifestations, 210
 - complications, 211
 - Hinchey staging system, 211
 - medico-legal discussion, 211–213
 - mortality rate, 211
 - uncomplicated diverticulitis, 211
 - medico-legal issues, 210
- Abdominal pain post-partum
 - appendicitis
 - antibiotics, 204–205
 - clinical manifestations and differential diagnosis, 203
 - conditions mimicking, 203
 - incidence, 204
 - medico-legal discussion, 205
 - scoring system, 203–204
 - clinical presentation, 202
 - medical aspects, 202–203
 - medico-legal issues, 202–203
- Abdominoplasty
 - complications, 218–219
 - medico-legal discussion, 220
 - office-based outpatient plastic surgery facilities, 218
 - Pseudomonas aeruginosa*, 219
 - risk factors, 219
 - surgical site infection, 219
- Accident Compensation Corporation (ACC), 6–7
- Acute generalized exanthematous pustulosis (AGEP), 113–114
- Adverse drug reactions (ADR)
 - categories, 256
 - drug interactions, 255
 - economic impact, 256
 - error types, drug treatment, 255
 - host and extrinsic factors, 255
 - management and prevention, 256–257
 - meta-analysis, 255
 - WHO definition, 255
- Adverse events, hospitals
 - drug complications, 253
 - Harvard Medical Practice Study, 252
 - incidence/prevalence, primary care, 253
 - malpractice claims, 253
 - mortality rate, 252–253
 - surgical procedures, 253
- Aminoglycosides. *See* Gentamicin toxicity
- Anemia and low grade fever
 - autopsy report, 84
 - clinical presentation, 81–82
 - differential diagnosis, 82
 - fatigue and tiredness, 82
 - infections and inflammatory condition, 87
 - iron and vitamin deficiency, 82
 - medico-legal issues, 84–86
 - pathogenesis, 86
 - patient history, 84
 - pro-inflammatory cytokines, 87
 - SBE, 87
- Arthroscopic knee surgery, infections.
 - See* Orthopedic complications

B

- Backache. *See also* Spine infections
 - categories, 188
 - low back pain, acute, 188
 - low back pain, chronic
 - blood test, 191
 - cancer, 190
 - fever, 189
 - initial assessment, guidelines, 190
 - patient history, 189

- Backache (*cont.*)
 plain radiography, 191
 risk factors, 189
 severe prolonged back pain, 190
 urinary retention, 190
 vertebral infection, 190
 clinical presentation, 186–187
 medico-legal issues, 187–188
 non-specific backache, 188
- Bacterial meningitis
 antibiotic administration delay, 29–30
 children appearance, 25–26
 clinical presentation, 24–25
 community-acquired bacterial meningitis, 29
 fever interval, 29
 history, examination and appropriate tests, 27
 medico-legal issues, 25–26
 standard of care, 28
 tri-phasic process, 28–29
- Bacteriuria
 asymptomatic, 60, 61
 incidence, 61
 neonatal death rates and prematurity, 60
- Bilateral painful feet
 clinical presentation, 87–88
 heel pain/calcanodynia, 88
 medico-legal issues, 88
 plantar heel pain syndrome (*see also* Plantar fasciitis)
 corticosteroid injections, 89–90
 diagnosis, 89
 incidence, 88
 risk factors, 88
- Blepharoplasty, 222
- Browlift, complications. *See* Plastic surgery
- C**
- Calcaneodynia, 88
- Canadian liability model, 5–6
- Clostridial myonecrosis
 intramuscular injections
 anti-inflammatory substances, 41
 cocaine injection, 41
 epinephrine injection, 41–42
 spontaneous
Clostridium septicum, 43
Clostridium perfringens, 43–44
 open and laparoscopic cholecystectomy, 43
 tissue destruction, 44
 treatment, 45
- Collagen vascular disorders, 82–83
- Compartment syndrome, 46, 47, 49, 50
- Corticosteroids, 147
- Cryoglobulinemia vasculitis, 103
- Cutaneous necrotizing vasculitis
 cryoglobulinemia vasculitis, 103
 diagnosis, 100
 erythema induratum, 102
 etiology, 100
 human immunodeficiency virus, 103
 leukocytoclastic vasculitis, 102–103
 non-steroidal, anti-inflammatory agents, 100
 parasites and fungi, 104
 Parvovirus B–19 infection, 103
 rickettsiae, 104
 SBE, 104
 small vessel vasculitis, 103–104
 tuberculous aortitis, 104
 vasculitides, 102
- Cytomegalovirus (CMV) retinitis
 complications, 242
 diagnosis, 244–245
 incidence, 242
 medico-legal discussion, 244
 pre-HAART, 243
 symptoms, 243
- D**
- Diabetic foot infection
 clinical presentation, 124–125
 medical aspects, 126
 medico-legal issues, 125–126
- Diagnostic errors
 assessment, key challenges, 251
 avoidance, strategies, 251
 cognitive errors, 250
 diagnostic thinking, shortcuts, 252
 misdiagnosis, 250
 no fault errors, 250
 pattern-recognition approach, 252
 problem-solving list, Physicians, 252
 processing stages, 251
 radiology and pathology, 250
 system-related errors, 250
- Diverticulitis. *See* Abdominal pain and melena
- Drug-induced hepatitis
 clinical presentation, 133–134
 latent tuberculosis (*see* Latent tuberculosis)
 medico-legal issues, 134

- Drug rash
 allergic skin rash, TMP-SMX
 incidence, 141
 medico-legal issues, 143–144
 clinical presentation, 138–139
 epidermal necrolysis
 clinical features, 141
 intravenous immunoglobulin, 143
 management, 142–143
 pathogenesis, 141
 prognosis, 142
 SJS and TEN, incidence, 141
 medico-legal issues, 139
 sinusitis
 bacterial sinusitis, 139–140
 etiology, 140
 management, 140
 Drug-related problems, 253–254
 Drug-related skin rash
 acute generalized exanthematous
 pustulosis, 113–114
 clinical presentation, 111–112
 cutaneous drug reactions, 112–113
 medico-legal issues, 112

E

- Epidermal necrolysis (EN). *See* Drug rash
 Epidural abscess. *See* Spine infections
 Erythema induratum, 102

F

- French medical liability system, 6

G

- Gentamicin toxicity
 aminoglycosides
 endolymphs, 127
 inherited predisposition, 128
 once-daily dosing, 128–129
 ototoxic effects, 127
 renal impairment, 127–128
 vestibular toxicity, 127
 diabetic foot infection (*see* Diabetic foot
 infection)
 infective endocarditis (*see* Infective
 endocarditis (IE))
 medico-legal aspects, 129–130
 nephrotoxicity, 127
 pelvic infections (*see* Pelvic
 infections (PID))

- Staphylococcus aureus* bacteremia and
 endocarditis, 128
 ventricular shunt infection (*see* Ventricular
 shunt infection)
 Gonococcal arthritis, 168–169
 Good medical practice
 adverse events, 10
 CMPA guidelines, 11

 early post-operative complication
 clinical presentation, 155
 medico-legal issues, 156
 patient's symptoms, 157–158
 wound infection, *Streptococci* and *Clostridia*, 156–157
 hip surgery
 clinical presentation, 158–159

decision and the judicial outcome, 161–162
 gram stain, clostridial infection, 162
 medico-legal issues, 159
 post-operative fever, 159–160
 symptomatic hypotension, 161
 post-arthroscopy infection
 articular cartilage injury, 167
 clinical presentation, 166
 medico-legal issues, 167
 septic arthritis (*see* Septic arthritis)
 post-operative knee pain
 clinical presentation, 174–175
 foreign-body related infection, 175–176
 medico-legal issues, 175–178
 prosthetic infections, 176
 total hip replacement, infections
 clinical presentation, 162–163
 medico-legal issues, 163
 prosthetic joint infection (*see* Prosthetic joint infection)

P

Palpable purpura
 clinical course, 100–101
 clinical presentation, 99
 medico-legal issues, 101–102
 NSAIDs, 100
 Parvovirus B–19 infection, 103
 Pelvic infections (PID)
 clinical presentation, 122–123
 medico-legal issues, 123
 Neisseria gonorrhoeae, 124
 spontaneous PID, 123–124
 Streptococcus pyogenes, 124
 Peritonitis
 laparoscopic cholecystectomy
 atrial fibrillation, 200–201
 clinical presentation, 199
 medical aspects
 medico-legal issues, 199–200
 operative mortality, 200
 surgical complications, 200
 non-operative management, 200
 open laparotomy, 201–202
 Pharyngitis, 71–72
 Plantar fasciitis
 incidence, 88
 risk factors, 88
 skin preparation, 90–91
 treatment

- Plantar fasciitis (*cont.*)
 corticosteroid injections, 89–90
 non-steroidal anti-inflammatory agents, 88
 symptomatic therapies, 89
- Plastic surgery
 breast reconstruction
 clinical presentation, 224–225
 medical aspects, 225–226
 medico-legal issues, 225
 breast reduction mammoplasty,
 complications
 breast augmentation, 227
 clinical presentation, 226
 complication, 228–229
 management, 228
 medico-legal issues, 227
 microbes, 228
 browlift, complications
 blepharoplasty, 222
 clinical presentation, 220–221
 cranial osteomyelitis, 222–223
 medico-legal issues, 221–224
 mycobacterial infections, 223
Staphylococcus aureus and
Staphylococcal epidermidis, 223
 liposuction
 abdominoplasty (*see* Abdominoplasty)
 clinical presentation, 217
 medico-legal issues, 217–218
- Post-gastroplasty sepsis
 central venous catheter infections
 medico-legal discussion, 208
 microbes causing, 207
Staphylococcus aureus bacteremia,
 207–208
 clinical presentation, 204–205
 medico-legal issues, 206–207
- Primary axillary vein thrombosis, 47
- Prosthetic joint infection
 diagnosis, 164
 management, 164–165
 medical and surgical treatment cost,
 163–164
Pseudomonas infection
 imipenem/meropenem, 165
