

INDEX

A

Advanced manufacturing technologies, 8
Agile manufacturing, 7, 26, 54
Attractive requirements, 127
Axiomatic design, 129

C

Collaborative engineering, 153
Collaborative production planning, 177
Component commonality, 176
Consumer focused product development, 214, 215
CPFR, 175, 190
Customer needs, 127, 134
Customer requirements, 127, 134, 135
Customer satisfaction, 126

D

Decision modeling system, 80
DOME, 160
Dynamic constraints network, 220

E

Expected requirements, 133

I

ICT, 240
Information support system, 78
Information Technology, 105
Integrated product development, 151
Inventory Management, 103

K

Knowledge integration, 220

Knowledge management, 217, 219

M

MAS. *See* Multi agent system
Mass customization, 4
Competencies, 253
Enablers, 7
Framework, 14, 17, 66, 67, 72, 73, 91, 92, 93, 94, 99, 103, 104, 105, 117
Logistics, 96
Product postponement, 215
Strategy, 12
Mass customization and information technologies, 216
Modular design, 128
Modularity, 128
Multi agent system, 196
Must-be requirements, 127

N

Needs analysis, 126

O

Ontology, 214
Development, 231

P

Performance requirements, 127
PN. *See* Production network
Postponement, 101
Product concept integration, 137
Product concept analysis, 137
Product design, 128
Product development, 126
Teams, 155
Product features, 127, 133, 134, 135
Production network, 195, 196

Production networks
Simulation, 199
Product-process-resource, 229

Q

Quality function deployment, 127,
134

R

Reconfigurable enterprise, 195
Reconfigurable manufacturing,
194

S

Similarity index, 144
Spoken requirements, 133
Supply chain
Collaboration, 173, 174

Configuration, 71, 73, 75, 77,
80, 98
Mass customization, 216
Supply chain management, 8, 10,
24, 26, 29, 94
Supply chain management issues,
14
Supply chain system taxonomy,
227
System taxonomy, 226

T

The house of quality, 134
Third Party Logistics, 104

U

Unexpected requirements, 133
Unspoken requirements, 133
