

Index

- Adenoma 67, 140, Figs. 8.7–8.10
Alagille syndrome 113, 117, Figs. 5.45–5.48
Alpha 1 antitrypsin deficiency Figs. 3.26, 3.27, 5.46
Alveolar ecchinococcosis 92, Fig. 4.41
Anatomy 7
Aneurysm 127
Angioplasty 131, Fig. 3.59
Arantius duct 35, Fig. 8.6
Azygos vein derivation Fig. 3.28
- Bile ducts and portal vein thrombosis** 11
Biliary atresia 23, Figs. 3.29–3.35, 5.1–5.14
 cystic form 95, 112, Figs. 5.1, 5.3, 5.10
Budd–Chiari syndrome 35, Figs. 3.54–3.58, 3.60–3.64, 4.34
Byler’s disease 108, Figs. 3.24, 5.25, 5.26
- Calcification Figs. 4.8, 4.16, 4.17, 4.22
Cardiac liver 43
Caroli’s disease 35, 113, Fig. 5.39
Catheter 3
 needle 3
Cholangiography 4
Cholecystography 4
Choledochal cyst 108, Figs. 5.10, 5.32–5.44
Choledochal veins Fig. 3.15
Choledocholithiasis 108, Figs. 5.27–5.29
Cirrhosis 11
Congenital hepatic fibrosis 23, Figs. 3.43–3.51
Congenital portocaval shunt 42, 136
- Diaphragmatic veins Figs. 3.22, 3.61
Duodenal duplication Fig. 5.44
Duplication *See* portal vein duplication
- Epithelioid haemangioendothelioma 35, 67, Fig. 4.34
- Femoral artery 1
 spasm 2
 vein 2
Fibrolamellar hepatocarcinoma Fig. 4.30
- Gallbladder
 rupture 135, Fig. 8.3
 veins Figs. 3.2, 3.4, 3.10, 3.13, 3.22
- Haemobilia Fig. 8.1
Heparin 2
Hepatic artery
 duplication Fig. 3.50
 stenosis 126
 thrombosis 126, Figs. 7.1, 7.2, 7.6
Hepatic veins 42
Hepatico-ombilical shunt Fig. 3.59
Hepatoblastoma and portal vein thrombosis Figs. 4.22, 4.23
Hepatocarcinoma Figs. 4.27–4.29
Hepatopetal collaterals and congenital fibrosis 35, Figs. 3.45, 3.46, 3.50
Hepatoportocholecystostomy Fig. 5.5
Hepatoportoenterostomy Fig. 5.4
Histiocytosis X Figs. 3.28, 5.21
Humeral artery 2
- Iliomesentericocaval anastomosis Fig. 3.21
Immunodeficiency syndrome Figs. 5.22–5.24
Inferior vena cava stenosis 127, Fig. 3.62
- Jugular vein 3
- Lipiodol Fig. 4.27
Liver transplantation
 and bile duct necrosis 130, Fig. 7.6
 and bile duct stenosis Fig. 7.8
 and biliary sludge Fig. 7.9
 and hepatic artery aneurysm Fig. 7.4
 and mycotic aneurysm Fig. 7.5
Lymphatics Figs. 5.6, 5.8, 5.14
- Mesenchymoma malignant Figs. 4.31, 4.32
Mesentericocaval anastomosis Figs. 3.14, 3.16
- Pancreatic angioma Fig. 6.1
Pancreatic veins 121
Pancreaticoduodenal collaterals Figs. 3.1–3.3, 3.6, 3.7, 3.18
Perforation, bile ducts Figs. 5.30, 5.31
- Peribiliary veins 11, 35, Fig. 3.46
Polysplenia 23, Fig. 3.42
Portal flow inversion 11, Figs. 3.24, 3.34–3.36, 3.41
Portal hypertension 9
Portal vein
 amputation Fig. 4.19
 duplication 11, 35, Figs. 3.11, 3.43, 3.45, 3.48, 3.51, 5.12, 5.20
 stenosis 126
 thrombosis 9, 126
 thrombosis and bile duct dilatation Fig. 3.9
 thrombosis, diffuse Figs. 3.1, 3.2, 3.4
Portocaval anastomosis congenital Figs. 3.46, 8.4
Portohepatic shunt Figs. 3.55, 4.4, 8.6
Portoportal anastomosis Fig. 3.15
Portosystemic anastomosis Fig. 3.23
Portosystemic shunts 23, 51, Figs. 3.23, 3.65, 8.10
Preduodenal portal vein 23, Figs. 3.40, 3.41
- Radiotherapy 43, Figs. 4.10, 4.11
Regeneration nodules 23
Replaced
 left hepatic artery Figs. 2.1, 3.39, 3.40
 right hepatic artery Fig. 2.1
Rhabdomyosarcoma Fig. 4.36
- Sarcoma 67, Fig. 4.33
Sclerosing cholangitis Figs. 3.28, 5.15–5.21
Sheath 2
Situs inversus 23, Figs. 3.36–3.38
Splenorenal anastomosis,
 spontaneous 11, Figs. 3.6, 3.12, 3.22, 3.27–3.29, 3.46, 3.47
Surgical portosystemic shunts 50,
 Figs. 3.14, 3.18, 3.21, 3.43, 3.59, 3.65
- Technique 1
Thoracic duct Fig. 5.8
Transhepatic access 4
- Umbilical artery 2
 vein Fig. 3.43
- Veno-occlusive disease 42, Fig. 3.61
