

Index

A

- AAF, *see* anti-aliasing filter
- Aliasing, 29, 144, 152
 - time-domain, 14
- Anti-aliasing, 17
- Anti-aliasing filter, 1, 144, 152
- Approximate models
 - asymptotic sampling zeros, 85
 - ASZ, 85
 - fractional order systems, 271
 - frequency domain, 79
 - linear deterministic systems, 79
 - near Euler integration, 92
 - nonlinear deterministic systems, 101
 - nonlinear stochastic, 221
 - stochastic, 195
 - STTS, 201
 - successive integration, 200, 222
 - time domain, 90
 - truncated Taylor series, 92
 - TTS, 94, 95
 - up-sampling, 101
- Approximation errors
 - nonlinear sampled models, 105
- Asymptotic sampling zeros, 85
 - generalized hold, 63
 - refined approximation, 87
 - stochastic, 169, 172
 - time domain, 175
- ASZ, *see* asymptotic sampling zeros
- Auto-correlation, 139
- Auto-regressive system, 234
- Averaging filter, 152

B

- Band-limited signal, 15
- Bernoulli polynomials, 259

C

- Chain rule, 211
- Continuous-time
 - stochastic systems, 149
 - white noise, 209
- Control
 - nonlinear systems, 121
 - output feedback, 120
 - predictive, 130
 - state feedback, 118
- Convergence
 - path-wise, 218
 - strong, 217
 - weak, 217
- Correlation, 139

D

- Delta operator, 40, 42
- DTFT, *see* Fourier transform

E

- EM algorithm, 243
- Error
 - relative, 80
 - truncation, 108
- Euler, 83
 - integration, 82, 90
 - polynomials, 258
- Euler–Frobenius
 - fractions, 256
 - numbers, 255
 - polynomial, 50, 179, 253
 - polynomial delta operator, 53
 - polynomial fractional, 275
- Euler–Maruyama
 - approximation, 217
 - integration scheme, 198

Eulerian

- numbers, 256
 - polynomials, 254
- Eulerian polynomials
generalised, 260

F**Filter**

- anti-aliasing, 18, 144
 - averaging, 152
 - hybrid, 269
 - ideal low-pass, 15
 - integrating, 189
- Folding, 13, 14, 143
- Fourier transform, 7
- discrete-time, 9
 - properties, 8
 - table, 8
- Fractional calculus, 272
- Fractional integrator, 279
- Fractional order systems, 271

G

- Generalized hold, 59
- Generalized sampling filters, 181
- Generating function, 254

H**Hold, 1**

- first-order, 24
- generalized, 59
- zero-order, 24

- Hurwitz-zeta function, 144
- Hybrid regulator, 269

I

- Identification, 233
- continuous-time, 125
 - non-uniform data, 239
 - restricted bandwidth, 236
- Identity matrix, 22
- Incremental
- covariance matrix, 151
 - form, 21
 - model, 39, 57
 - model stochastic, 157
 - variance, 141, 150
- Independent increments, 140
- Innovations form, 184
- Integrating anti-aliasing filter, 187

Intersample response

- frequency domain, 265
- time domain, 268

Iterative learning, 267**Ito integral, 210****Ito rule, 211**

- multidimensional, 212

Ito–Taylor expansions, 213**L****Laplace transform, 22****Lie derivative, 102****Lifting, 268****Log-likelihood function, 238****Low-pass filter, 15****Lyapunov inequality, 218****M****Maximum likelihood, 243****Minimal realization, 23****Mittag–Leffler function, 272****Model**

- continuous-time, 21
- sampled-data, 24

N**Noise, 140****Non-causal, 15****Normal forms**

- linear systems, 92
- nonlinear systems, 102

Numerical analysis, 106**Numerical solution of SDEs, 217****Nyquist, 16****P****Poles, 23, 29****Power spectral density, 139, 150, 161**

- continuous-time, 163

- discrete-time, 163

- sampled process, 142

R**Reconstruction, 15, 16****Relative degree, 23**

- continuous-time, 32

- discrete-time, 33

- nonlinear, 102

- sampled-data, 44

Relative error, 80, 164**Riemann–Liouville operator, 273****Robustness**

- asymptotic sampled-data models, 73
- generalized hold, 75

- stochastic, 191
- S**
- Sampler, 2
- Sampling
 - frequency, 16
