

Index

B

Bilinear matrix inequality (BMI), 168

C

Central polynomial, 171, 172

Characteristic multipliers, 199

Conservatism, 6, 9, 14, 28–32, 47–49, 51, 53, 57, 59, 107, 108, 113, 123, 124, 126, 133, 134, 136, 158, 191, 195, 203, 204, 210, 219, 226, 229, 234, 241, 243, 244

Coordinate descent-type algorithm, 188

D

Decoupling, 15, 21, 124, 139, 168

Descriptor system, 23, 116

Dilated LMI, 6

Discrete-time periodic system, 3, 7, 199

Discrete-time system lifting, 207, 230

Dual system, 17, 18, 23, 28, 35, 44, 108, 205, 220, 230–232, 234, 235, 238

E

Elimination lemma, 5, 15, 19, 167, 169–172, 191

Enhanced LMI, 6

Extended LMI, 6

F

Finsler's lemma, 5, 20, 183

Frequency domain inequality (FDI), 38–41

I

Impulsive mode, 63, 65, 69, 71, 83

Iterative LMI algorithm, viii

K

Kalman-Yakubovich-Popov lemma (KYP lemma), 38, 216

L

Linear matrix inequality (LMI), 2, 3, 6, 12–15, 17, 18, 20, 22–24, 26–31, 36, 39, 42, 46, 47, 51, 54, 57, 58, 108, 111, 113–118, 121–126, 130, 132, 133, 139, 141–145, 147–153, 157, 166, 168, 169, 171–173, 175, 177, 187, 188, 190, 191, 193, 200, 202–206, 208, 209, 211–213, 216, 217, 219–223, 225, 229, 231–241, 243

Linearizing change of variables, 107–109, 143, 145, 146, 148, 151, 152, 231

Lyapunov function, 4, 12, 14, 17, 18, 21, 46, 139, 183, 184, 187–189, 203, 234

Lyapunov inequality, 2, 12, 167, 200

Lyapunov variable, 15, 139, 145, 164

M

Monodromy matrix, 199

Multi-objective control design, vii

N

Non-dynamic mode, 63

O

Output-feedback design
 dynamic, 141, 165
 static, 165, 166, 171

P

Parameter-dependent Lyapunov function,
 17, 21, 139, 183, 184, 188, 189
 Parametric uncertainty, vii
 Periodic Lyapunov lemma, 200
 Periodic state-feedback controller, 231, 232,
 235, 236, 238
 Polynomial matrix interpretation, 171
 Polytopic uncertainty, 185, 186, 201, 210,
 218, 233, 236, 238, 240

Q

QMI regions, 24, 27, 31, 117, 118, 122
 Quadratic matrix inequality (QMI), 24–26,
 29, 117, 118, 122
 Quadratic stability condition, 14, 16, 18, 19,
 108
 Quarter-car suspension model, 10, 11, 45,
 126

R

Recovery property, 143, 146, 153, 164
 Robust H_2 performance analysis, 32, 35,
 208, 210–212, 218
 Robust H_∞ performance analysis, 37, 218,
 222, 224
 Robust impulse-to-peak performance analy-
 sis, 43–45, 58
 Robust regional pole location analysis, 24
 Robust stability analysis, 9, 13, 14, 16, 201,
 202, 208, 211, 212, 222, 223, 234

S

Semidefinite programming (SDP), 51, 145,
 146, 153, 154, 157, 158, 175, 180,
 188, 190, 193, 212, 216, 219, 222,
 223, 225, 237, 239, 240, 242–244
 S -procedure, 3–6
 State-feedback design, 17, 116, 118, 121,
 122, 136
 Static output-feedback (SOF), 7, 165–176,
 179–187, 189–196
 S -variable, 1–3, 5, 6
 System augmentation, 6
