

Index

- Abbreviations of chemical warfare agents, 152
- Acetylcholinesterase (AChE) inhibition, nerve agents and, 18
- Acetylthiocholine iodide, RBC-ChE activity and, 22
- AChE (acetylcholinesterase) inhibition, nerve agents and, 18
- Acronyms for chemical warfare agents, 152
- Acute inhalation toxicity, CK and, 114
- Acute toxicity, CK (cyanogen chloride) and, 113
- Acute toxicity, GA and, 68
- Acute toxicity, GB and, 78
- Acute toxicity, GD and, 94
- Acute toxicity, HD and, 30
- Acute toxicity, HN2 and, 51
- Acute toxicity, HT and, 49
- Acute toxicity, lewisite and, 103
- Acute toxicity, T sulfur mustard and, 50
- Acute toxicity, VX and, 54
- Agent CK, *see* CK or cyanogen chloride
- Agent GA, *see* GA or Tabun
- Agent GB, *see* GB or Sarin
- Agent GD, *see* GD or Soman
- Agent HD, *see* HD or Sulfur mustard HD
- Agent HN2, *see* HN2 or Nitrogen mustard
- Agent HT, *see* HT or Sulfur mustard HT
- Agent L, *see* L or Lewisite
- Agent T, *see* T Sulfur mustard
- Agent VX, *see* VX
- Aliesterases (carboxylesterases), nerve agent effects on, 21
- Anticholinesterase agents, 18
- Army chemical destruction, 3 ff.
- Army chemical non-stockpile sites U.S., 4
- Birds, GB toxicity effect on, 142
- Birds, VX toxicity effects on, 142
- Blood agents, chemical warfare, described, 9
- Blood ChE inhibition, nerve agent critical toxic effect on, 23
- Blood ChE inhibition, nerve agent species variation of, 21
- Blood cholinesterases, nerve agent effects on, 20
- Butyrylcholinesterase (plasma-ChE), nerve agent effects on, 20
- Carboxylesterases (aliesterases), nerve agent effects on, 21
- Carcinogenicity, CK and, 122
- Carcinogenicity, GA and, 73
- Carcinogenicity, GB and, 90
- Carcinogenicity, HD and, 38
- Carcinogenicity, HN2 and, 53
- Carcinogenicity, HT and, 49
- Carcinogenicity, lewisite and, 107
- Carcinogenicity, VX and, 61
- ChE (cholinesterase), nerve agent effects on, 20
- ChE inhibition, nerve agent potency on, 23
- Chemical warfare agent disposal techniques, 3
- Chemical warfare agent non-stockpile sites U.S., 4
- Chemical warfare agents, 1 ff.
- Chemical warfare agents, acronyms/abbreviations of, 152
- Chemical warfare agents, air exposure limits of, 7
- Chemical warfare agents, environmental cleanup of, 3
- Chemical warfare agents, environmental fate/effects resulting from, 127
- Chemical warfare agents, estimated reference doses of, 8, 146, 150
- Chemical warfare agents, glossary, 156
- Chemical warfare agents, identifications, 6
- Chemical warfare agents, physical/chemical properties of, 10, 12, 14, 16

- Chemical warfare agents, RfD (reference doses) of, 8, 146, 150
- Chemical warfare agents, storage sites U.S. of, 4
- Chemical warfare blood agents, described, 9
- Chemical warfare nerve agents, described, 9
- Chemical warfare vesicants, described, 9
- Chemical Weapons Convention, 3
- Cholinesterase inhibition, nerve agent potency and, 23
- Chronic toxicity, 32
- Chronic toxicity, CK and, 116
- Chronic toxicity, HN2 and, 52
- Chronic toxicity, HT and, 49
- Chronic toxicity, T sulfur mustard and, 50
- CK (cyanogen chloride), described, 9
- CK, acute inhalation toxicity caused by, 114
- CK, acute toxicity from, 113
- CK, carcinogenicity of, 122
- CK, chronic toxicity caused by, 116
- CK, developmental/reproductive effects of, 118
- CK, ecotoxicology of, 145
- CK, environmental fate of air caused by, 144
- CK, environmental fate of water caused by, 144
- CK, estimated reference dose of, 123, 146, 151
- CK, fish toxicity and, 145
- CK, genotoxicity and, 122
- CK, hydrolytic pathway (diagram) of, 144
- CK, physical/chemical properties of, 15, 16
- CK, subchronic toxicity of, 114
- CK, toxicity mechanisms/symptoms caused by, 25
- Cyanogen chloride, acute toxicity of, 113
- Cyanogen chloride, described, 9
- Cyanogen chloride, physical/chemical properties of, 15, 16
- Cyanogen chloride, toxicity mechanisms/symptoms caused by, 25
- Cyanogen chloride, environmental fate and, 144
- Cyanogen chloride, estimated reference dose of, 123, 146, 151
- Cyanogen chloride, lacrimation, coughing caused by, 25
- Delayed neuropathy, nerve agents and, 19
- Delayed toxicity, HD and, 34
- Delayed toxicity, HN2 and, 52
- Developmental/reproductive effects, CK and, 118
- Developmental/reproductive effects, GA and, 73
- Developmental/reproductive effects, GB and, 88
- Developmental/reproductive effects, HD and, 35
- Developmental/reproductive effects, HN2 and, 52
- Developmental/reproductive effects, lewisite and, 105, 109
- Developmental/reproductive effects, VX and, 60
- Distilled mustard (Agent HD), 11
- Ecotoxicology, CK and, 145
- Ecotoxicology, lewisite and, 143
- Ecotoxicology, mustard agents and, 132
- Ecotoxicology, nerve agents and, 141
- Environmental fate, mustard agents and, 127
- Estimated reference dose, CK (cyanogen chloride), 123, 146, 151
- Estimated reference dose, GA (tabun), 74, 146, 150
- Estimated reference dose, GB (sarin), 91, 146, 150
- Estimated reference dose, GD (soman), 100, 146, 150
- Estimated reference dose, HD, 45, 146, 149
- Estimated reference dose, HN2, 53, 146
- Estimated reference dose, HT, 50, 146
- Estimated reference dose, lewisite, 108, 146, 151
- Estimated reference dose, VX, 62, 146, 149

- Estimated reference doses, chemical warfare agents, 146
- Exposure limits (air), chemical warfare agents, 7
- Fetal effects, HD and, 36**
- Fish, CK toxicity in, 145
- Fish, GA toxicity in, 141
- Fish, GB toxicity in, 141
- Fish, mustard agents toxicity in, 132
- Fish, nerve agent toxicity in, 141
- Fish, VX toxicity in, 141
- Fluorophosphonate chemical warfare agents, 137
- GA (tabun), acute toxicity of, 68**
- GA (tabun), carcinogenicity of, 73
- GA (tabun), described, 9
- GA (tabun), developmental/reproductive effects caused by, 73
- GA (tabun), estimated reference dose of, 74, 146, 150
- GA (tabun), genotoxicity of, 74
- GA (tabun), LD₅₀ values, 68
- GA (tabun), neurotoxicity, 72
- GA (tabun), physical/chemical properties of, 13, 14
- GA (tabun), plasma-ChE subchronic activity of, 71
- GA (tabun), RBC-ChE subchronic activity of, 70
- GA (tabun), subchronic toxicity of, 68
- GA, fish toxicity and, 141
- GA, hydrolysis of, 136
- GA, hydrolytic pathway (diagram) of, 136
- GA, hydrolytic products of, 137
- GB (sarin), acute toxicity of, 78
- GB (sarin), carcinogenicity of, 90
- GB (sarin), chronic toxicity of, 85
- GB (sarin), described, 9
- GB (sarin), developmental/reproductive effects caused by, 88
- GB (sarin), estimated reference dose of, 91, 146, 150
- GB (sarin), genotoxicity of, 90
- GB (sarin), LD₅₀ values of, 79
- GB (sarin), neurotoxicity of, 87
- GB (sarin), physical/chemical properties of, 13, 14
- GB (sarin), rat tracheitis incidence caused by, 86
- GB (sarin), subchronic toxicity of, 80
- GB (sarin) type I, RBC-ChE subchronic activity of, 83
- GB (sarin) type II, plasma ChE subchronic activity of, 84
- GB (sarin) type II, RBC-ChE subchronic activity of, 82
- GB, bird toxicity caused by, 142
- GB, fish toxicity caused by, 141
- GB, hydrolysis of, 136
- GB, hydrolytic pathway (diagram) of, 137
- GB, hydrolytic products of, 137
- GD (soman), acute toxicity of, 94
- GD (soman), estimated reference dose of, 100, 146, 150
- GD (soman), genotoxicity of, 100
- GD (soman), LD₅₀ values of, 94
- GD (soman), neurotoxicity of, 98
- GD (soman), plasma-ChE subchronic activity of, 97
- GD (soman), RBC-ChE subchronic activity of, 96
- GD (soman), subchronic toxicity of, 95
- GD, hydrolytic pathway (diagram) of, 138
- GD, hydrolytic products of, 137
- GD, photolysis of, 134
- Genotoxicity, CK, 122
- Genotoxicity, GA, 74
- Genotoxicity, GB, 90
- Genotoxicity, GD, 100
- Genotoxicity, HD, 43
- Genotoxicity, HT, 50
- Genotoxicity, lewisite, 108
- Genotoxicity, T sulfur mustard, 51
- Genotoxicity, VX, 61
- Glossary, chemical warfare agents, 156
- H sulfur mustard, described, 9**
- HD, acute toxicity of, 30
- HD, carcinogenicity of, 38
- HD, chronic toxicity of, 32
- HD, delayed toxicity of, 34

- HD, developmental/reproductive effects caused by, 35
- HD, distilled mustard, 11
- HD, environmental fate of air caused by, 128
- HD, environmental fate of soil caused by, 131
- HD, environmental fate of water caused by, 128
- HD, estimated reference dose of, 45, 146, 149
- HD, fetal effects caused by, 36
- HD, genotoxicity of, 43
- HD, human carcinogenicity and, 38
- HD, hydrolytic products of, 130
- HD, physical/chemical properties of, 11, 12
- HD, primary hydrolytic pathway (diagram) of, 129
- HD, skin tumors caused by, 43, 44
- HD, subchronic toxicity of, 31
- HD sulfur mustard, described, 9
- HD sulfur mustard, physical/chemical properties of, 11, 12
- HD, teratogenicity of, 46
- HD, toxicity effects on dogs caused by, 34
- HD, vapor effects on eyes caused by, 33
- HN2 (nitrogen mustard), physical/chemical properties of, 12
- HN2, acute toxicity of, 51
- HN2, carcinogenicity of, 53
- HN2, chronic toxicity of, 52
- HN2, delayed toxicity of, 52
- HN2, developmental/reproductive effects caused by, 52
- HN2, estimated reference dose of, 53, 146
- HN2 nitrogen mustard, described, 9
- HT, acute toxicity of, 49
- HT, carcinogenicity of, 49
- HT, chronic toxicity of, 49
- HT, developmental/reproductive effects caused by, 49
- HT, estimated reference dose of, 50, 146
- HT, genotoxicity of, 50
- HT, physical/chemical properties of, 11, 12
- HT sulfur mustard, described, 9
- HT sulfur mustard, physical/chemical properties of, 11, 12
- Human carcinogenicity, HD and, 38
- Hydrolytic pathway, GA (diagram), 136
- Hydrolytic pathway, GB (diagram), 137
- Hydrolytic pathway, GD (diagram), 138
- Hydrolytic pathway, HD (diagram), 129
- Hydrolytic pathway, VX (diagram), 135
- Hydrolytic products, GA, GB, GD, 137
- Hydrolytic products, HD, 130
- Hydrolytic products, VX, 135
- L (lewisite), described, 9
- L, acute toxicity of, 103
- L, carcinogenicity of, 107
- L, ecotoxicology of, 143
- L, environmental fate of air caused by, 142
- L, environmental fate of soil caused by, 143
- L, environmental fate of water caused by, 142
- L, estimated reference dose of, 108, 146, 151
- L, genotoxicity of, 108
- L, physical/chemical properties of, 15
- L, toxicity mechanisms/symptoms caused by, 25
- L, subchronic toxicity of, 103, 109
- LD₅₀ values, GA, 68
- LD₅₀ values, GB, 79
- LD₅₀ values, GD, 94
- LEL (lowest-effect level), nerve agent ChE inhibition and, 24
- Lewisite (L), described, 9
- Lewisite, acute toxicity and, 103
- Lewisite, carcinogenicity and, 107
- Lewisite, developmental/reproductive effects caused by, 105, 109
- Lewisite, ecotoxicology of, 143
- Lewisite, environmental fate of air caused by, 142
- Lewisite, environmental fate of soil caused by, 143
- Lewisite, environmental fate of water caused by, 142
- Lewisite, estimated reference dose of, 108, 146, 151

- Lewisite, genotoxicity of, 108
Lewisite, microbial degradation of soil caused by, 140
Lewisite, physical/chemical properties of, 15
Lewisite, subchronic toxicity of, 103, 109
Lewisite, toxicity mechanisms/symptoms of, 25
Lewisite, visicant/systemic poison, 25
Lipid peroxidation, mustard agent mechanisms, 17
LOAEL (lowest-observed-adverse-effect level), nerve agent ChE inhibition and, 24
- Mechanisms of toxicity, mustard agents and, 15**
Methodology, oral reference dose derivation, 26
Mustard agents, ecotoxicology of, 132
Mustard agents, environmental fate of air caused by, 128
Mustard agents, environmental fate/effects caused by, 127
Mustard agents, environmental fate of soil caused by, 131
Mustard agents, environmental fate of water caused by, 128
Mustard agents, estimated reference dose of, 146
Mustard agents, fish effects caused by, 132
Mustard agents, mechanisms of toxicity of, 16
Mustard agents, physical/chemical properties of, 12
Mustard agents, toxicity symptoms of, 15
Mustard gases, described, 9
Mustard gases, estimated reference dose of, 146
Mustard gases, physical/chemical properties of, 10, 12
- Nerve agent ChE inhibition, LEL, 24
Nerve agent ChE inhibition, LOEL, 24
Nerve agent ChE inhibition, NOEL, 24
Nerve agents, acetylcholinesterase inhibitions and, 18
Nerve agents, blood cholinesterase effects on, 20
Nerve agents, delayed neuropathy, 19
Nerve agents, ecotoxicology of, 141
Nerve agents, environmental fate caused by, 133
Nerve agents, environmental fate of air caused by, 134
Nerve agents, environmental fate of soil caused by, 138
Nerve agents, estimated reference dose, 146
Nerve agents, fish toxicity and, 141
Nerve agents, hydrolysis to alkyl methylphosphonates, 133
Nerve agents, microbial degradation soil caused by, 140
Nerve agents, nervous system effects caused by, 19
Nerve agents, physical/chemical properties of, 13, 14
Nerve agents, toxicity mechanisms/symptoms caused by, 17
Nerve gases, chemical warfare, described, 9
Nervous system effects, nerve agents and, 19
Neurotoxicity, GA, 72
Neurotoxicity, GB, 87
Neurotoxicity, GD, 98
Neurotoxicity, VX, 59
Nitrogen mustard (HN2), described, 9
Nitrogen mustard (HN2), physical/chemical properties of, 11, 12
Nitrogen mustards, hydrolysis of, 130
NOEL (no-observed-effect-level), nerve agent ChE inhibition and, 24
Non-stockpile chemical material, defined, 2
- Oral reference doses, chemical warfare agents and, 1 ff.**
Oral reference doses, derivation methodology of, 26
Organic arsenical warfare chemicals, described, 9

- Organophosphate-induced delayed neuropathy, GB and, 88
- Phosphofluoridate fluorohydrolase (sarinase), 21
- Photodegradation, nerve agents, 134
- Photolysis, GD, VX, 134
- Photolysis, nerve agents and, 134
- Physical/chemical properties, chemical warfare agents, 10, 12, 14, 16
- Plasma-ChE (butyrylcholinesterase), nerve agent effects of, 20
- Poly(ADP-ribose)polymerase, mustard agent mechanism, 17
- RBC-AChE (red blood cell acetylcholinesterase), nerve agent effects on, 20
- RBC-ChE activity, species variation and, 22
- Reference dose (RfD), chemical warfare agents, 8
- Reference dose (RfD), defined, 26
- RfD (reference dose), defined, 26
- RfDs, chemical warfare agents, 8, 146
- Rhodanese, cyanide conversion to thiocyanate, 26
- Sarin (GB), described, 9
- Sarin (GB), estimated reference dose of, 91, 146, 150
- Sarin (GB), physical/chemical properties of, 13, 14
- Sarinase (phosphofluoridate fluorohydrolase), 21
- Sodium cyanide, drinking water effects in rats caused by, 119
- Soman (GD), estimated reference dose of, 100, 146, 150
- Soman (GD), physical/chemical properties of, 14, 15
- Species variation, nerve agent effects and, 21
- Species variation, RBC-ChE activity and, 22
- Subchronic toxicity, CK, 114
- Subchronic toxicity, GA, 68
- Subchronic toxicity, GB, 80
- Subchronic toxicity, GD, 95
- Subchronic toxicity, HD, 31
- Subchronic toxicity, lewisite, 103, 109
- Subchronic toxicity, VX, 55
- Sulfur mustard agents, physical/chemical properties of, 11, 12
- Sulfur mustard, environmental fate of soil caused by, 131
- Sulfur mustard H, described, 9
- Sulfur mustard HD, described, 9
- Sulfur mustard HT, described, 9
- Sulfur mustard, vapor effects on eyes caused by, 33
- T sulfur mustard, acute toxicity of, 50
- T sulfur mustard, chronic toxicity of, 50
- T sulfur mustard, estimated reference dose of, 146
- T sulfur mustard, genotoxicity of, 51
- T sulfur mustard, physical/chemical properties of, 11, 12
- Tabun (GA), described, 9
- Tabun (GA), estimated reference dose of, 74, 146, 150
- Tabun (GA), physical/chemical properties of, 13, 14
- Teratogenicity, HD, 46
- Thiol-Ca²⁺ peroxidation, mustard agent mechanism, 17
- Toxicity mechanisms, CK (cyanogen chloride), 25
- Toxicity mechanisms, lewisite, 25
- Toxicity mechanisms, mustard agents, 16
- Toxicity mechanisms, nerve agents, 18
- Toxicity symptoms, CK (cyanogen chloride), 25
- Toxicity symptoms, lewisite, 25
- Toxicity symptoms, mustard agents, 15
- Toxicity symptoms, nerve agents, 17
- Uncertainty Factor, oral reference dose derivation, 28
- VX (nerve agent), physical/chemical properties of, 13, 14

- VX, acute toxicity of, 54
- VX, bird toxicity caused by, 142
- VX, carcinogenicity of, 61
- VX, developmental/reproductive effects caused by, 60
- VX, estimated reference dose of, 62, 146, 149
- VX, fish toxicity caused by, 141
- VX, genotoxicity of, 61
- VX, hydrolysis of, 134
- VX, hydrolysis soil, 139
- VX, hydrolytic pathway (diagram) of, 135
- VX, hydrolytic products of, 135
- VX, neurotoxicity of, 59
- VX, photolysis of, 134
- VX, RBC-ChE activity in fed sheep and, 57, 58
- VX, RBC-ChE activity in injected rats and, 56
- VX, RfD vs human toxicity data comparison and, 67
- VX, subchronic toxicity of, 55
- VX warfare agent, described, 9
