

# Index

- Accidents, major chemical, 21 ff.
- Accidents, major chemical, European law, 25
- Accidents, major chemical, legislation, 25
- Acute Hazardous Events database, 22
- Acute toxicity, glufosinate-ammonium, 111
- Aeromonas* spp., shrimp pathogens, 4
- Alaska oil spill, Exxon Valdez, 21
- Alkyl(vinyl)phosphinic acid ethyl ester, synthesis, 79
- Aminotriazole, oxidized by lignin peroxidase, 58
- Antibacterial drugs, shrimp diseases, 4
- Antibiotic development, shrimp aquaculture, 9
- Antibiotic residues, in fish, 8
- Antibiotic resistance, human pathogenic bacteria, 8
- Antibiotic toxicity, human exposure aquaculture, 9
- Antimicrobial, development, shrimp aquaculture, 9
- Antimicrobial, regulations, seafood, 1 ff.
- Antimicrobial residues, fish, 7, 8
- Antimicrobial resistance, human pathogenic bacteria, 8
- Antimicrobial surveillance program, FDA aquaculture, 6
- Antimicrobial tolerances, fish, 7, 8
- Antimicrobial toxicity, human handling, 7, 8
- Antimicrobials, seafood safety, 1 ff.
- Antimicrobials, shrimp aquaculture, 1 ff.
- Antimicrobials, shrimp regulations, 1 ff.
- Aquaculture, antimicrobial regulations (US), 1 ff.
- Aquaculture drugs, FDA registration, 8
- Aquaculture, FDA antimicrobial surveillance program, 6
- Aquaculture, shrimp production, 2
- Aquaculture therapeutants, priority list, 10
- Aquatic habitats, chemical accident protocols, 27
- Aquatic habitats, industrial accident impacts, 34
- Aquatrine®, shrimp culture algicide, 6
- Basta®** herbicide, glufosinate-ammonium, 75, 110
- Bhopal, India, methyl-isocyanate gas cloud tragedy, 21
- Bilanafos herbicide (Herbiace®), biosynthesis, 99
- Bioaccumulation, clams river spills, 31
- Black spot disease, *Vibrio* spp. shrimp, 4
- Brown spot disease, *Vibrio* spp. shrimp, 4
- Buster® herbicide, glufosinate-ammonium, 75, 110
- Cellobiose quinone reductase, white rot fungi product, 57
- CERCLA, environmental compensation act, 25
- Challenge® herbicide, glufosinate-ammonium, 75, 110
- Chemical accidents, aquatic habitats, 27
- Chemical accidents, aromatic spills, 31
- Chemical accidents, chemical fires, 39
- Chemical accidents, frequency and cause, 22
- Chemical accidents, legislation, 25
- Chemical accidents, major industrial, 21 ff.
- Chemical accidents, PCB spills, 38

- Chemical accidents, pesticide spills, 32
- Chemical accidents, petrochemical spills, 33
- Chemical accidents, Rhine River, 24
- Chemical accidents, type distribution, 23
- Chemical accidents, warehouse fires, 27
- Chemical fires, air sampling/monitoring, 40
- Chemical fires, habitat impacts, 38
- Chemotherapeutants, shrimp diseases, 4
- Chernobyl, Ukraine, nuclear pollution, 21
- Chlorpyrifos, river spill, 32
- Clams, aromatic bioaccumulation, 31
- Comprehensive Environmental Response Compensation/Liability Act (CERCLA), 25
- Conquest® herbicide, glufosinate-ammonium, 110
- Copper Control®, shrimp culture algicide, 6
- Creosote, accident spills, 31
- Cyanide, oxidized by lignin peroxidase, 57
- Dash® herbicide, glufosinate-ammonium, 110**
- Databases, chemical accidents, 22
- DDT, degradation by white rot fungi, 64
- Defoliants, glufosinate-ammonium, 130
- Degradation mechanisms, white rot fungi, 57, 60
- Dermal toxicity, glufosinate-ammonium, 111
- Desiccants, glufosinate-ammonium, 130
- Dioxin release, Seveso, Italy, 21, 36
- D,L*-phosphinothricin, see Phosphinothricin, *D,L*-
- Drug development, shrimp aquaculture, 9
- Drug residues, in fish, 7, 8
- Drug resistance, human pathogenic bacteria, 8
- Drug tolerances, fish, 7, 8
- Drug toxicity, human handling, 7
- Dyes, oxidized by lignin peroxidase, 57
- Eels, Rhine River pesticide kills, 28**
- Endosulfan, fish kill, 26, 32
- EPA, aquaculture pesticide responsibilities, 7
- Ethyl benzene, accident spills, 31
- European law, major chemical accidents, 25
- Exxon Valdez, Alaska oil spill, 21
- FDA, aquaculture drugs registration, 8**
- FDA, aquaculture surveillance responsibilities, 6**
- Finale® herbicide, glufosinate-ammonium, 75, 110
- Final® herbicide, glufosinate-ammonium, 110
- Fires, warehouse chemical accidents, 27
- Fish kill, endosulfan, 26, 32
- Formalin, aquaculture parasiticide/fungicide, 6
- Freshwater habitats, industrial accident impacts, 34
- Glufosinate, mode of action, 104, 109**
- Glufosinate, naturally occurring herbicide, 73 ff.
- Glufosinate, produced by *Streptomyces hydroscopicus*, 74
- Glufosinate, produced by *Streptomyces viridochromogenes*, 74
- Glufosinate-ammonium, application to crops, 125
- Glufosinate-ammonium, aquatic organism effects, 122
- Glufosinate-ammonium, behavior in ecosystem, 115
- Glufosinate-ammonium, crop residues, 121
- Glufosinate-ammonium, defoliant/desiccant, 130

- Glufosinate-ammonium, dissipation in soil and water sediment, 116
- Glufosinate-ammonium, ecosystem states of charge, 115
- Glufosinate-ammonium, in minimum tillage systems, 129
- Glufosinate-ammonium, metabolism in mammals, 114
- Glufosinate-ammonium, metabolites, physicochemical properties, 117
- Glufosinate-ammonium, mode of action, see Phosphinothricin, *D,L*-
- Glufosinate-ammonium, mutagenicity, 114
- Glufosinate-ammonium, oncogenicity, 113
- Glufosinate-ammonium, physicochemical properties, 117
- Glufosinate-ammonium, reproductive toxicity, 113
- Glufosinate-ammonium, soil dissipation, 117
- Glufosinate-ammonium, soil half-lives, 118
- Glufosinate-ammonium, soil leaching behavior, 119, 121
- Glufosinate-ammonium, terrestrial organism effects, 123
- Glufosinate-ammonium, toxicology, 110-114
- Glufosinate herbicide, see Glufosinate-ammonium
- Glutamine synthetase inhibition, in microorganisms, 100
- Glutamine synthetase inhibition, in plants, 101
- Glutamine synthetase inhibitors, potential, 101
- Grayling, Rhine River pesticide kills, 28
- $H_2O_2$  generating enzymes, lignin degradation, 52
- $H_2O_2$ , role in lignin degradation, 51
- Harvest® herbicide, glufosinate-ammonium, 75
- Herbiace® herbicide (bilanafos), biosynthesis, 99
- Highly oxidized chemicals, reduction by lignin peroxidase, 59
- Human exposure, aquaculture drugs, 9
- Human food safety, shrimp aquaculture, 7
- Hydroxyl radical, lignin peroxidase-dependent production, 61
- Ignite® herbicide, glufosinate-ammonium, 75, 110
- Industrial accidents, legislation, 25
- IR-4, registration minor-use aquaculture drugs, 7
- Legislation, chemical accidents, 25
- Lignin, chemical description, 50
- Lignin degradation, lignin peroxidase catalytic cycle, 52
- Lignin degradation, manganese-dependent peroxidase catalytic cycle, 52
- Lignin degrading systems, white rot fungi, 50
- Lignin peroxidase catalytic cycle, lignin degradation, 52
- Lignin peroxidase-dependent hydroxyl radical production, 61
- Lignin peroxidase-dependent reduction pathway, 59
- Low regulatory priority chemicals (FDA), aquaculture, 6
- Major accidents, chemical, 21 ff.
- Major Hazard Incident Database Service, 22
- Major industrial chemical accidents, 21 ff.
- Manganese-dependent peroxidase catalytic cycle, lignin degradation, 52
- Marine habitats, industrial chemical accident impacts, 34
- Metabolism, *D,L*-phosphinothricin in plants, 103

- Metabolism, glufosinate-ammonium, 114
- Methyl(vinyl)phosphinic acid methyl ester, synthesis, 78
- Methyl-isocyanate gas cloud release, Bhopal, India, 37
- Methylation of phenolic compounds, white rot fungi, 62
- Methylphosphinic acid ester, synthesis, 77
- MIC gas cloud release, Bhopal, India, 37
- Minimum tillage, glufosinate-ammonium herbicide use, 129
- Minor-use aquaculture drugs, IR-4 registration, 7
- Mode of action, *D,L*-phosphinothricin, 104, 109
- Mode of action, glufosinate-ammonium, see Phosphinothricin, *D,L*-
- Mode of action, *L*-phosphinothricin, 100, 104
- Molecular structure, *L*-phosphinothricin, 104
- MS-222, aquaculture anesthetic, 6
- Mutagenicity, glufosinate-ammonium, 114
- Mycobacterium* spp., shrimp pathogens, 4
- Nuclear pollution, Chernobyl, 21
- Oil spill, Exxon Valdez Alaska, 21
- Oral toxicity, glufosinate-ammonium, 112
- Ormetoprim, aquaculture therapeutant, 11
- Oxalate, role in lignin degradation, 55
- Oxalate, synthesis by *Phanerochaete chrysosporium*, 55
- Oxytetracycline, aquaculture chemotherapeutant, 4, 10
- PAH, clam bioaccumulation, 31
- PAHs, contaminants listed, 31
- PCB spills, habitat impacts, 38
- PCB, transformer coolant, 39
- PCP, wood treatment formula, 41
- Penaeus chinensis*, Chinese white shrimp production, 2
- Penaeus monodon*, giant tiger prawn production, 2
- Penaeus stylirostris*, Pacific blue shrimp production, 2
- Penaeus vannamei*, western white shrimp production, 2
- Pentachlorophenol (PCP), wood treatment formula, 41
- Peroxidase catalytic cycle, illustrated, 53
- Phanerochaete chrysosporium*, glucose-1-oxidase isolate, 52
- Phanerochaete chrysosporium*, veratryl alcohol synthesis, 53
- Phanerochaete chrysosporium*, white rot fungus, 51
- Phenol, accident spills, 31
- Phenolic compounds, methylation by white rot fungi, 62
- Phosphinothricin, *D,L*-, kinetics, 102
- Phosphinothricin, *D,L*-, mode of action, 104, 109
- Phosphinothricin, *D,L*-, physiological effects plants, 106
- Phosphinothricin, *D,L*-, plant metabolism, 103
- Phosphinothricin, *D,L*-, structure-effect relationships, 93
- Phosphinothricin, *D,L*-, substituted derivatives, 96
- Phosphinothricin, *D,L*-, synthesis, 77-86
- Phosphinothricin, *D,L*-, uptake and translocation, 102
- Phosphinothricin, *L*-, asymmetrical induction with chiral auxiliaries, 88
- Phosphinothricin, *L*-, biosynthesis, 97
- Phosphinothricin, *L*-, chiral pool syntheses, 92
- Phosphinothricin, *L*-, enzymatic transamination of 2-oxo acid, 91

- Phosphinothricin, *L*-, microorganism glutamine synthetase inhibition, 100
- Phosphinothricin, *L*-, mode of action, 100, 104
- Phosphinothricin, *L*-, molecular structure, 104
- Phosphinothricin, *L*-, synthesis, 86
- Phosphinothricin, naturally occurring herbicide, 73 ff.
- Phosphinothricin, produced by *Streptomyces hygroscopicus*, 74
- Phosphinothricin, produced by *Streptomyces viridochromogenes*, 74
- Phosphinothricin-NH<sub>4</sub>, see also Glufosinate-ammonium
- Phosphinothricin-NH<sub>4</sub>, *D,L*-, behavior in ecosystem, 115
- Phosphinothricin-NH<sub>4</sub>, *D,L*-, toxicology, 110–114
- Phosphonic acids, fungicidal/herbicidal qualities, 74–76
- Pollutant degradation, by white rot fungi, 49 ff.
